Vertebræ

1 A lumbar vertebra 2 A thoracic vertebra 3 A cervical vertebra *a* body *b* vertebral foramen surrounded by pedicles (*c*) and the laminæ (*d*) forming the neural arch *e* the spinous process *f* a transverse process *g* an articular facet

A typical vertebra consists of a more or less cylindrical solid piece of bone the *body* or *centrum*, from whose dorsal surface a process arises on each side and meets in the middle line above, forming an arch (the **neural arch**) enclosing a space (the **neural canal**) through which passes the spinal cord There are two median unpaired processes — the **spinous process, neural spine,** or **neurapophysis,** borne on the upper surface of the arch, and the **hemapophysis,** less frequently found on the lower surface of the centrum The paired processes are the articular or **zygapophyses,** rising from the anterior (**prezygapophyses**) or posterior (**postzygapophyses**) edges of the base of the neural arch and the transverse, of which there may be two pairs, superior or transverse (**diapophyses**) and inferior (**parapophyses**) Additional processes also found are the **anapophyses** and **metapophyses** In vertebrates with well-developed limbs the vertebræ anterior to those that bear ribs connecting with the sternum are **cervical,** those that bear ribs and succeed the cervicals are **dorsal** or **thoracic,** those anterior to the sacrum and bearing no movable ribs are **lumbar,** the one or more that coalesce to form the sacrum are **sacral,** and the succeeding ones are **caudal** or **coccygeal** In man there are 7 cervical (the usual number in mammals), 12 dorsal, 5 lumbar, 5 sacral, and usually 4, sometimes 5, and less frequently 3 coccygeal vertebræ

2. One of the segmented portions of the entire axial skeleton In this sense vertebræ may be segments of the cranium, and include not only the vertebræ *proper*, but the ribs, costal cartilages, and segments of the sternum or sternebers **3.** *Echin* One of the axial ossicles of the arms of a starfish or ophiuran [< L *vertebra*, joint, < *verto*, turn] **ver'te-berț; ver'te-breț.**

— **false vertebra,** a vertebra that is firmly ankylosed with others, as in the sacrum and coccyx — **true v.,** one of the vertebræ that are movable upon each other, as distinguished from a fixed or *false vertebra* — **v prominens** [L], the seventh cervical — **ver"te-bra'ri-um,** *n* The spinal column. — **ver"te-brar-te'ri-al,** *a* Of or pertaining to the vertebral artery, as the *vertebrarterial* foramen in the transverse process of a cervical vertebra, through which that artery passes **ver"te-bro-ar-te'ri-al**‡.

ver'te-bral, 1 vûr'tɪ-brəl, 2 vĕr'te-brəl, *a* **1.** Of, pertaining to, composed of, or seated near the vertebræ, of the nature of a vertebra, as, the *vertebral* ossicles of an echinoderm

The *vertebral* column of the gorilla differs from that of man in its curvature and other characters as also does the conformation of its narrow pelvis D WILSON *Anthropology* p 3 [HUM 1885]

2. Having vertebræ, vertebrate

— **vertebral aponeurosis,** a fascia covering the muscles of the back in the thoracic region, extending from the vertebræ to the angles of the ribs — **v. artery,** a large branch of the subclavian artery that passes up along the spinal column and supplies the brain See ARTERY — **v. canal,** the spinal canal — **v. caries,** ulceration of a vertebra or of several vertebræ — **v. column,** the spinal column — **v. foramen,** the large opening in a vertebra enclosed by its body, pedicles, and lamina — **v. groove,** one of the two deep furrows on the back one on each side of the spine — **v plate** 1 *Embryol* The part of the mesoblast near the notochord forming the primitive segments in *Crantata* 2 *Zool* A mid-dorsal plate (of a turtle) — **v plexus,** a network of nerves about the vertebral artery — **v rib,** a rib attached to the vertebræ only a floating rib — **v vein** (*Anat*), a vein arising in the occipital region, flowing into the innominate vein, and joined near its terminus by the *anterior vertebral* and *posterior vertebral* branches — **ver'te-bral,** *n* **1.** A vertebral artery or vein 2 [Rare] A vertebrate — **ver'te-bral-ly,** *adv*

Ver"te-bra'ta, 1 vûr'tɪ-brē'tə, 2 vĕr'te-brā'ta, *n pl* *Zool* A division of the animal kingdom, variously ranked and limited (1) A subbranch of chordate metazoans having a longitudinal nervous cord ending in an anterior brain, protected by a sheath or axial skeleton, and separated by it from the visceral cavity including *Marstipobranchii, Elasmobranchii, Pisces, Amphibia, Reptilia, Aves,* and *Mammalia* and often also the *Leptocardii* (2) The *Chordata* including in addition to the above the *Cephalochorda,* the *Urochorda,* and the *Hemichorda* See ZOOLOGY [< L *vertebratus,* jointed, < *vertebra* see VERTEBRA]

ver'te-brate, 1 vûr'tɪ-brĭt, 2 vĕr'te-brāt, *vt* [-BRAT ED, -BRAT'ING] [Rare] To cause to be vertebrate or back-boned, figuratively, to endow with stamina or vigor

ver'te-brate, 1 vûr'tɪ-brĭt 2 vĕr'te-brāt, *a* **1.** Having a back-bone or spinal column, as mammals, birds reptiles, amphibians, and fishes, more widely, having a notochord, temporary or persistent 2 Of or pertaining to the *Vertebrata* 3 Having vertebræ or axial ossicles resembling vertebræ, as the arms of a starfish **4.** *Bot* Contracted at intervals, like the spine of an animal **5.** [Rare] Vertebral [< L *vertebratus,* see VERTEBRATA]

ver'te-brate, *n* A vertebrate animal, one of the *Vertebrata,* popularly, an animal with a back-bone

2†. Veracious, truthful [< F *vrai,* < L *verax,* < *verus,* true]

ver'y, *adv* **1.** In a high degree, in large measure, extremely, exceedingly, as, *very* generous

From the grammarian's point of view *very* properly qualifies a participle only when the latter is used merely as an adjective, as *very tired very pleasing* The grammatical critics accordingly object to such expressions as *very pleased, very dissatisfied* or *very hated* It must be said, however that, altho it may be better grammar to interpose an adverb as, *very much pleased very greatly dissatisfied,* or *very bitterly hated,* yet this use of *very* has been good English for centuries In some circumstances this word fails to add any real intensification "That is very well done" is little, if any, stronger than the commendation expressed without *very*

2†. Actually, really

Altho in the United States *veto* is applied as a common term to the constitutional power of the President to refuse his assent to an act of Congress, the word itself is unknown to the Constitution A vetoed bill may be passed by a two-thirds vote of each house of Congress and become a law notwithstanding the President's veto The same or similar power is conferred on the executive in the Constitutions of most of the States, also on the mayors of some cities, but in some cases only a simple majority is necessary to pass a bill over the veto In England the sovereign's veto of an act of Parliament is absolute but the prerogative has not been exercised since 1692 and may now be considered obsolete In France the President has the right to refer back bills for further consideration, and in Germany the Emperor, as King of Prussia, has the right of veto against bills and decisions of the federal council In other representative governments of Europe the executive veto power exists in forms more or less qualified by constitutional limitations Both the term and the right are commonly traced back to the power vested in the tribunes of the people in ancient Rome to nullify any senatorial or other measures which they deemed injurious to their order or to the welfare of the people, which is said sometimes to have been done by pronouncing the word *veto* I forbid"
Vetoes are named according to their qualifications as, **absolute veto** (which destroys a bill wholly), **limited or qualified v.** (which is final except against a vote of an extraordinary majority of the legislature as in the case of a veto by the President of the United States), and **suspensive or suspensory v.** (which suspends but does not necessarily defeat or forbid the completion of a legislative measure) The right to reject certain parts of a bill and assent to the rest is called **veto in detail.**

Vi-at'ka, 1 vi-āt'ka, 2 vi-at'ka, *n* Same as VYATKA

vi"a-tom'e-ter, 1 vai"ə-tom'i-tər, 2 vi"a-tŏm'e-ter, *n* A viameter

vi-a'tor, 1 vai-ē'tər *or* -tor, 2 vi-ā'tor, *n* [-TO'RES, 1 -tō'riz; 2 -tō'rĕş, *pl*] **1.** A traveler **2.** A freedman who attended upon and executed the commands of certain Roman magistrates, an apparitor [L, < *via*, way] — **vi"a-to'ri-al,** *a* Pertaining to traveling — **ly,** *adv*

Vlaud, 1 vyō, 2 vyō, **Louis Marie Julien** (1/181850–4/121923). A French novelist pen-name *Pierre Loti*

Vi-az'ma, 1 vi-āz'ma, 2 vi-az'ma, *n* Same as VYAZMA

Vi"bert', 1 vi"ber', 2 vi"bĕr', **Jehan Georges** (1/201840–7/21 1902) A French genre-painter

vi'bex, 1 vai'beks, 2 vi'bĕks, *n* [VI-BI'CES, 1 vi-bai'sīz, 2 vi-bi'çēş, *pl*] **1.** A mark on the skin produced or appearing as if produced by a whip, characteristic of certain fevers Vibices are called also **molopes. 2.** A linear ecchymosis [< L *vibex* (*vibic-*), weal]

Vi'borg, 1 vi'bōrg, 2 vi'bōrğ, *n* **1.** A government in Finland, 12,096 sq m **2** Its capital on the Gulf of Finland, occupied by the Germans, April 30, 1918. **3.** An amt in central Jutland. **4.** Its capital

vi-brac'u-lum, 1 vai-brak'yu-ləm, 2 vi-brăc'yu-lŭm, *n* [-LA, *pl*] One of the filamentous appendages of the cells of many polyzoans, maintaining lashing movements and serving to bring particles of food within reach [< L *vibro*, vibrate] **vi-brac"u-la'ri-um†.— vi-brac'u-lar,** *a*

vi'bran-cy, 1 vai'brən-si, 2 vi'bran-çy, *n* The character or state of being vibrant, resonance

vi'brant, 1 vai'brənt, 2 vi'brant, *a* **1.** Having a rapid motion to and fro, as a musical string, vibrating, as, a *vibrant* music-string **2.** Due to or showing vibration, resonant, sonorous, also, tremulous said of sound, as, vibrant tones [F, < L *vibran (t-)s*, ppr of *vibro*, shake]

vi'brant, *n Phon* A trill, as trilled r.

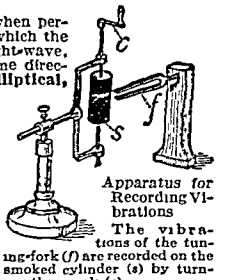
vi'brate, 1 vai'brēt, 2 vi'brāt, *v* [vi'BRAT-ED, vi'BRAT-ING] **I** *t* **1.** To give a rapid swinging or oscillating motion to, move to and fro, especially with a quick motion

The last spotted adder that I had the pleasure of finding *vibrated* the tail in a very marked manner C C ABBOTT *Naturalist's Rambles* p 303 [A 1887]

2. To have as a period of vibration, measure by each vibration

An inch is determined as a certain fraction of the length of a pendulum *vibrating* seconds in the latitude of London PROCTOR *Great Pyramid, Origin of Week* p 209, note 1 [c & w 1883]

3 To put in vibration, send forth by vibration



II. *i* **1.** To move or swing back and forth, as a pendulum, play to and fro, oscillate, hence, figuratively (1) To fluctuate, vacillate (2) To throb, thrill, respond, as, the heart *vibrates* with excitement

2. *Physics* To move back and forth unceasingly over the same path generally said of the rapid succession of motions of the parts of an elastic body **3.** To sound; produce the vibrating effect of sound, as, the note *vibrates* on the ear [< L *vibratus*, pp of *vibro*, brandish] Syn. see QUAKE SHAKE

vi'bra-tile, } 1 vai'brə-til, 2 vi'bra-tĭl, *a* **1.** Adapted to
vi'bra-til†, } or used in vibratory motion, vibratory **2.** Responsive to subtle emotion, as, "woman is *vibratile* and resonant all over" HOLMES *Autocrat* p 211 [o & co 1871] — **vi"bra-til'i-ty,** *n*

vi-bra'tion, 1 vai-brē'shən, 2 vi-brā'shon, *n* **1.** The act of vibrating, or the state of being vibrated, oscillation **2.** *Physics* (1) Rapid motion back and forth, especially, the repeated motion of the parts of an elastic solid, or of a fluid, of which the equilibrium has been disturbed, by extension, similar rapid variation to and fro of electrical condition, as in a circuit Compare WAVE (2) One complete movement of this kind from the time when the vibrating particle leaves its equilibrium position to the time when it again passes through that position in the same direction called a **complete vibration.**

Vibrations are **transverse** when perpendicular to the direction in which the energy is propagated, as in a light-wave, **longitudinal** when in the same direction, as in sound **circular, elliptical,** or **rectilinear,** according to the form of the path traversed by the moving particles A vibration is completely determined by its *amplitude, frequency,* and *period* See these words

Apparatus for Recording Vibrations

The vibrations of the tuning-fork (*f*) are recorded on the smoked cylinder (*s*) by turning the crank (*c*)

The fewest *vibrations* appreciated as a musical note are 16 per second and those which produce the highest tone 41 000 in a second R O DONEMUS in *Homiletic Review* Feb 1892, p 109

3. *Pathol* A shaking motion, a quivering

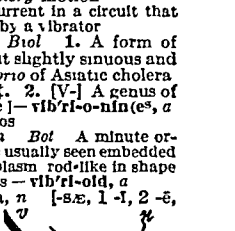
— **forced vibration,** a vibration whose period is modified by an outside force especially, that due to the neighborhood of another vibrating body of different period — **free v.,** a vibration whose period is determined only by the size elasticity, etc, of the vibrating body, a natural vibration, as of a swing left to oscillate — **harmonic v.,** simple harmonic motion See HARMONIC — **isochronous v.,** a vibratory movement in which the successive vibrations consume equal time as in those causing musical tones — **synchronous vibrations,** two or more vibrations having equal periods and simultaneous direction of motion — **vi-bra'tion-al,** *a* Of or pertaining to vibration

vi-bra'ti-un"cle, 1 vai-brē'shi-uŋ'kl, 2 vi-brā'shi-ŭŋ'cl, *n* [Rare] A slight vibration [Dim of VIBRATION] — **vi-bra"ti-un-cu-la'tion,** *n* A slight thrill or shudder

vi'bra-tive, } 1 vai'brə-tiv, 2 vi'bra-tĭv, *a* Causing or
vi'bra-tiv†, } tending to cause vibration, vibratory

vi-bra'to, 1 vi-brā'to 2 vi-brā'to, *n* [It] *Mus* A trembling or pulsating effect, not confined to vocal music, caused by rapid variation of emphasis on the same tone properly distinguished from *tremolo*, where there is an alternation of tones

vi'bra-tor, 1 vai'brē-tər *or* -tor, 2 vi'brā-tor, *n* One who or that which vibrates Specif. (1) In harmonic telegraphy (*a*) A vibrating reed that opens and closes a circuit and so sends over it a vibratory current (*b*) A similar reed that responds to the intermittent attraction of an electromagnet acted on by such current (2) Any reciprocating piece caused to vibrate by magnetic attraction, as in an electric bell (3) A reed, as in a reed-organ (4) In printing, a distributing roller having lengthwise as well as rotary motion (5) A device serving to vibrate the pen of a siphon recorder (6) An oscillator (7) In weaving, any one of various devices for causing vibration, as one for slackening the warp as a shed opens (8) A device in a molding-machine that shakes the pattern loose (9) An apparatus with an oscillating rubber pad used in massaging the skin and usually operated by electric power



vi'bra-to-ry, 1 vai'brə-to-ri, 2 vi'bra-to-ry, *a* Of or pertaining to vibration or oscillation, having, consisting of, or causing vibration, as, *vibratory* motion

— **vibratory current** (*Elec*), a current in a circuit that is very rapidly made and broken, as by a vibrator

vib'ri-o, 1 vib'ri-ō, 2 vĭb'ri-ō, *n Biol* **1.** A form of bacterium in which the cells are but slightly sinuous and have a filament at each end, as, *vibrio* of Asiatic cholera See plate of BACTERIA **vib'ri-on†. 2.** [V-] A genus of such bacteria [< L *vibro*, vibrate] — **vib'ri-o-nin(e)s,** *a* Of, pertaining to, or resembling vibrios

vib'ri-oid, 1 vib'ri-oid, 2 vib'ri-oid, *n Bot* A minute organ of the cell of some fungi and algæ usually seen embedded in the peripheral layers of the protoplasm rod-like in shape and showing independent movements — **vib'ri-oid,** *a*

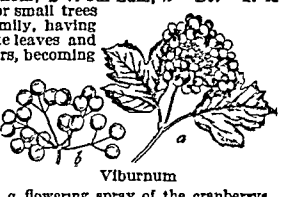
vi-bris'sa, 1 vai-bris'ə, 2 vi-bris'a, *n* [-SÆ, 1 -i, 2 -ē, *pl*] **1.** A stiff, coarse hair, as in the nostrils of man and about the mouth of mammals **2.** One of the vaneless hair-like rictal feathers of many birds, especially fly-catchers **3.** One of the lateral bristles about the mouth of certain flies [< L *vibrissæ*, hairs in a man's nostrils, < *vibro*, vibrate]

Vibrissa

Section of the lip (l) of a lion showing the root of one of the vibrissæ (v) and the large bundle of nerves (n) and blood-vessels supplying it

vib'ro-gen, 1 vib'ro-jen; 2 vĭb'ro-ğĕn, *n Bot* Active cellular tissue distributed in layers or bands in the cortex of certain tendrils to which their movements of circumnutation are more or less clearly due [< L *vibro*, vibrate, + -GEN]

vib'ro-graph, 1 vib'ro-graf, 2 vib'ro-ğrăf, *n* An instrument for recording vibrations, as of the ground, buildings, etc [< L *vibro* vibrate, + -GRAPH]



vi-brom'e-ter, 1 vai-brom'i-tər, 2 vi-brŏm'e-ter, *n* An instrument for breaking up adhesions by inducing vibrations of the tympanic membrane of the ear [< L *vibro*, vibrate, + -METER]

vi'bro-phone, 1 vai'bro-fōn, 2 vi'bro-fōn, *n* An instrument for inducing vibrations of the tympanic membrane of the ear by means of sound-waves [< L *vibro*, vibrate, + Gr *phōnē* sound]

vi'bro-scope, 1 vai'bro-skōp, 2 vi'bro-scōp, *n* A device for noting or registering vibrations [< L *vibro*, vibrate + -SCOPE] — **vi"bro-scop'ic,** *a*

vi"bro-ther"a-peu'tics, 1 vai bro-ther'ə-piū'tiks, 2 vi'bro-thĕr'a-pū'tics, *n Med* The use of vibratory massage as a healing agent [< L *vibro* vibrate + THERAPEUTICS]

Vi-bur'num, 1 vai-būr'nəm, 2 vi-bûr'nŭm, *n Bot* **1.** A large genus of shrubs or small trees of the honeysuckle family, having opposite entire or serrate leaves and clusters of small flowers, becoming a dry or fleshy ovoid drupe in fruit **2.** [v-] A plant of this genus [< L *viburnum*, wayfaring-tree] — **sweet viburnum,** a small tree (*Viburnum lentago*), with white flowers in broad cymes, followed by drupes called sheepberries See SHEEPBERRY

Viburnum

a flowering spray of the cranberry-tree or guelder-rose *b*, the fruit

vin'e-gar, *n.* **1.** An acid liquid obtained from an alcoholic liquid, usually cider or wine, by oxidation as by acetous fermentation used as a condiment and as a preservative as in pickling

The simplest method of manufacturing vinegar is by exposing the liquid, as cider, to the air in a warm place. As the fermenting bacterium (*Mycoderma aceti*) is always present in the air, the addition of mother is not absolutely necessary. In the **quick vinegar process** the oxidation is accelerated by allowing the spirit or malt solution to trickle through wood shavings, thus exposing a larger surface of the liquid to the air. Vinegars made from spirits, such as **spirit vinegar**, are often flavored with concentrated apple-juice and artificially colored. Imitation vinegars are sometimes made with pyroligneous acid.

The term *vinegar* in this country is by common consent and also by the statutes of several of the States and by the regulations of the United States Department of Agriculture applied to cider *vinegar* . . . *Vinegar* made from wine has a distinct wine odor on the other hand cider *vinegar* has the peculiar odor of the apple.

Violets

1 A stemless violet (*Viola odorata*) 2 A leafy-stemmed species (*Viola striata*) 3 Leaf of *V. lanceolata* 4 Leaf of *V. sagittata* 5 Leaf of *V. palmata* 6 Fruit of a pansy (*V. tricolor*)

Violets are found in most parts of the globe there being about 100 species in all, of which 60 are in north temperate regions 30 in South America, 2 in South or East Africa, and 8 in Australia and New Zealand The species in the United States and Great Britain are usually low herbs either stemless, as the common **blue violet** and the **bird's-foot v.** of the United States, and the **sweet v.** of England, or with short leafy stems, as the **Canada v.** and the **dog's.**

Many of the violets are blue, as the typical violet of literature, and many are fragrant, but others are of all shades from purple to yellow and white, and most of them are scentless

The violet is cultivated on a large scale in the United States and in France, especially on the French Riviera As a flower it ranks third in commercial importance in the United States From *Viola odorata*, a type indigenous to Europe and Asia, especially Japan, many varieties have been derived and cultivated Among the double-flower types are (1) the **Farquhar violet, Imperial v., King of Violets v., Madame Fichet-Nardy v., Marie Louise v.,** and the **New York v.,** all with dark-blue flowers (2) the **De Parme v., Lady Hume Campbell v., Neapolitan v.,** and **Wilson v.,** all with light-blue flowers (3) the **Belle de Chantenay v., Queen of Violets v.,** and **Swanley White v.,** all with white flowers (4) the **Double Red v., Madame Millet v., Odorata Rubra v.,** all red or pink

Among the single-flower types are (1) the **California violet, La France v., Luxonne v.,** and **Princesse de Galles v.,** all with purple flowers (2) **Rawson's White v.,** and the **White Czar v.,** with white and single red or pink flowers Among French varieties not included above are the **Czar v.,** with long blue flowers **Madame Schwartz,** with large violet flowers and the **Souvenir de Madame Josse v.,** with large reddish-purple flowers with white center See also below

The essential nature of virtue has been much discussed by writers on ethics from the beginning of reflective thinking Socrates taught that virtue is identical with a knowledge of the good, or wisdom Plato recognized the four *cardinal* virtues of wisdom, fortitude, temperance, and justice Aristotle regarded the virtues as those habits of an excellent manhood that *distinguish* and *choose* the mean or middle way between the excesses and defects in which the vicious forms of conduct consist The scholastic moralists followed him in dividing the virtues into the *practical* and the *intellectual* With the spread of Christianity, humility, chastity, and above all charity became prominent as forms of virtuous living Indeed, many followed Augustine in regarding charity as the source of all virtue With Bentham and the English and French Sensational school, virtue was made identical with conformity to civil law, or to custom, or to utility, while the New England theologians allied themselves with the Augustinian view by reducing all the virtues to benevolence Modern idealism is recognizing anew the essential truth foreshadowed by the earliest ethical usage of the word, and regards the virtues as various qualities or forms of character and conduct shaped after the ideal of a perfect personal life in social relations

In the thought of mankind the *virtues* are those habitual forms of conduct which realize the conception of the better and nobler Self G T LADD *Philosophy of Conduct* p 214 [s 02]

voice, *n* 1. The sound produced by the vocal organs of a person or animal, especially of human beings, also, the quality or character of such sound, as, the *voice* of a sluggard, I knew her *voice*, a loud *voice*

The voice is produced by the expulsion of a blast of air from the lungs through a slit-like opening, the glottis, formed in the larynx by the approximation of two membranes whose edges are termed *the vocal cords* (See illus under LARYNX) Vibrations of these edges conveyed to the air above in the resonant cavities of the throat and head, produce sound Variations in *loudness* arise by varying the intensity of the blast in *pitch*, by changing the *length, thickness elasticity, and tension of the cords*, thus affecting the number of vibrations per second, in *quality* or *timbre*, by the overtones caused by different shapes sizes and characters of the resonant cavities At puberty there occurs a change in the character of the voice, which with a *boy becomes fuller but drops an octave with a girl the* change improves the quality and imparts an increased sweetness and richness During the changes the voice sometimes cracks this occurs more frequently with boys than with girls Compare CRACK *n*, 7 The voice as used in speech varies but little in pitch but is affected by altering the shape of the resonant cavities and by various noises (consonantal sounds) produced by the contact of the breath with the lips, tongue, teeth palate, etc In singing the pitch is definitely regulated so as to produce notes correlated according to their rates of vibration into scales diatonic and chromatic The *compass* or variation of pitch of a single human voice is usually somewhat more than two octaves, but cases have been known in which a compass of three octaves or even more has been attained The extreme compass possible to all varieties of voice is a little over five octaves A series of tones of a particular quality belonging to a certain part of the compass of a voice or instrument

and made by a certain adjustment of the organs is called a *register* The *normal and natural one is the chest*-register or **chest-voice**; a middle and an upper register are also recognized, the latter being also termed a **head-v.** or *falsetto* Other names are used to distinguish the voice-registers from one another, as, **high, middle, and low**; **small, thin, and thick**; **thin, middle, and thick**, as well as subdivisions of both **thin** and **thick** into **upper** and **lower**. In this terminology the two latter words in each series designate the lower and upper ranges of the chest-register When the vocal organs are arranged for a particular register, the *different notes appear to be produced by a variation of* tension of the cords and an approximation of their edges, and when the highest note that can be readily produced by that adjustment is reached, a new adjustment is made and the register thus changed. In the upper register some portions of the cords are *usually approximated, thereby short-*

The materials ejected are chiefly vapor or water, lava, cinders rock-fragments and various gases There is no true smoke emitted, and very little perceptible flame. In most cases the light and so-called 'flames' are the glow of the molten lava and its reflection on the clouds of vapor The passage by which the eruptive matter rises to the surface is called the *chimney* or *vent* and the bowl-like enlargement of it, commonly at the summit of the mountain and often of great size is termed the *crater* There may, however, be a number of such craters on a single cone The principal types distinguished are the **free-flowing**, as the volcanoes of the Hawaiian Islands in which the flow is moderately constant and with a minimum amount of violence and the **explosive**, as Vesuvius and Etna characterized by periodic eruptions of great violence and explosive force Those of the latter class are usually *cone-shaped* Volcanoes are also classed or distinguished as **active, dormant,** or **extinct.**

Iceland with no less than twenty *active volcanoes* is still the *most* considerable centre of such operations in Europe

vol'owt, *tI* To baptize used derisively by the English Reformers, perhaps in allusion to the Latin *volo* (I will) used as a response in the service — **vol'ow-ert**, *n*

vol'plane", 1 vel'plēn', 2 vŏl'plān' *Aero* *I tI* [-PLANED', -PLAN'ING] To swoop toward the earth from a height at an angle considerably greater than the gliding angle **II** *n* A *flight downward at such angle, as, a volplane* from a height of 500 feet [< L *volo*, fly, + *-plane* (in AEROPLANE)]

Vol'sci, 1 vel'sai, 2 vŏl'sı, *n* *pl* A warlike people of ancient Italy subdued by the Romans about 350 B C

Vol'scian, 1 vel'shan, 2 vŏl'shan **I** *a* Of or pertaining to the Volsci or Volscians, or to their language **II** *n* **1.** One of the Volsci **2** The language of the Volsci, closely akin to Umbrian

vol-sel'la, *n* Same as VULSELLA [European Russia

Volsk, 1 vōlsk, 2 vŏlsk, *n* A town in E Saratof government,

Vol'stead, 1 vel'sted 2 vŏl'stĕd, **Andrew, J.** (1860–) An American lawyer statesman — **Volstead Act**, an act to enforce the Eighteenth (Prohibition) Amendment to the Constitution of the United States, introduced by Andrew J Volstead passed by Congress Oct 28, 1919, became effective Jan 16 1920

Vol'sungs, 1 vel'sunz, 2 vŏl'sungs, *n* *pl* *Norse Myth* The descendants of Volsung, the great-grandson of Odin and father of Sigmund

volt[1], 1 vōlt, 2 vŏlt, *n* *Elec* The practical unit of electromotive force, such an electromotive force as would carry one ampere of current against one ohm resistance, or as would charge a condenser of one farad capacity with one coulomb of quantity, being slightly less than that of a Daniell cell [< A *Volta*, Italian physicist] — **volt'am"me-ter**, *n* *Physics* An instrument for measuring the intensity in amperes, or the potential in volts of an alternating current consisting of a voltmeter combined with a transformer — **v.-ampere**, *n* *Elec* A watt so called because it is the rate of working in an electric circuit when the current is one ampere and the potential one volt — **v.-coulomb**, *n* *Elec* A joule so called because the expenditure of a joule of energy will raise the potential of one coulomb of electricity one volt **cou-lomb'-volt"‡**.

volt[2], *n* **1.** *Manege* (1) A gait by which a horse moving partially sidewise round a center, with the head turned outward, makes two concentric tracks, a circular tread (2) The space marked out for the volt or first turn **2.** *Fencing* A sudden movement or leap to avoid a thrust [< F *volte*, wheel, < It *rolta*, turn, < L *voluta*, pp of *volro*, turn about] **volte‡**.

— **demi-pirouette volt**, a half-turn of a horse on the inner hind leg as a pivot — **pirouette v.**, a turning about of a horse in a series of strides in which the inner hind foot treads upon one spot — **v. in renvers**, a movement of a horse in a circle on two paths, the head being directed toward the center

vol'ta[1], 1 vŏl'tə 2 vŏl'ta, *n* [-TE, 1 -tē 2 -tę *pl*] [It] **1.** *Mus* Turn, time in phrases **2.** An old dance **3** Same as VOLT, *n*, 1 — **prima volta**, first time — **seconda v.**, second time — **una v.**, once

Vol'ta[2], 1 vel'tə, 2 vŏl'ta, *n* **1. Alessandro** (2/15 1745–3/5 1827), an Italian physicist, followed Aloys Galvani in the experiments resulting in the production of electricity by chemical action on plates of dissimilar metals invented the voltaic pile **2.** A river in E Ashanti, Africa length, 670 m to the Gold Coast — **Volta effect** (*Elec*), difference of potential observed between two metals when joined upon an open circuit

vol'ta-, 1 vel'tə-, 2 vŏl'ta- From VOLTAIC, a combining form — **vol"ta-e-lec'tric**, *a* Of, pertaining to, producing, or produced by voltaic electricity — **vol"ta-e-lec-tric'I-ty**, *n* Voltaic electricity See ELECTRICITY — **vol"ta-e-lec-trom'e-ter**, *n* *Physics* An instrument for measuring the potential of electric currents — **vol"ta-e-lec"tro-met'ric**, *a* — **vol"ta-e-lec"tro-mo'tive**[es], *a* Of, pertaining to, or produced by voltaic electricity, as, *voltaelectromotive* force

volt'age[1], 1 vōlt'ıj, 2 vōlt'ag *n* *Elec* Electromotive force as measured or expressed in volts, as, the usual *voltage* of the motor was 500

Voltage is variously designated according to the terminal conditions or locations to the system of wiring employed, etc, as **anode** and **cathode voltage** (in an electrolytic cell, the difference of potential between the anode and the electrolyte and the cathode and the electrolyte respectively), **critical** or **decomposition v.** (in an electrolytic cell, the algebraic sum of the anode and the cathode voltages), **delta v.** (the voltage between two of the collector-rings in a three-phase machine), **electrode v.** (anode or cathode voltage), **floating v.** (the voltage of a storage-battery when neither discharging nor being charged) **impedance v.** (the loss of electromotive force caused by impedance in an alternating-current circuit), **open-circuit v.** (the voltage at the terminals of a generator when the exterior circuit is opened), **primary v** (the voltage impressed on a primary circuit), **receiver v.** (the voltage at the receiving end of a circuit over which alternating currents or signaling impulses are being transmitted), **secondary v.** (the voltage in a secondary circuit), **star v.** (the voltage between the neutral ring and any one of the collector-rings in a star-wound polyphase machine) — **voltage coil**, a potential coil or winding

volt'age[2], *n* The act of making a horse move in volts

vol-tag'ra-phy, 1 vel-tag'rə-fı, 2 vŏl-tăg'ra-fy, *n* [Rare] The art of copying patterns into metallic forms by the electrolysis of metals

vol-ta'ic, 1 vel-tē'ık, 2 vŏl-tā'ic, *a* **1.** Of, pertaining to, or produced by electricity developed through chemical action or contact, galvanic, as, *voltaic* induction See ELECTRICITY **2.** [V-] Of or pertaining to Alessandro Volta, of Pavia [< *Volta* see def 2] — **voltaic arc**, see ARC — **v. cell**, see CELL, *n*, 6 — **v. couple**, see COUPLE, *n*, 4 — **v. field**, the electric field surrounding the electrodes in electrolytic action — **v. pencil**, a metal point from which a current flows, used to produce etchings on a metal plate — **v. or Volta's pile**, see PILE[1] *n*, 2 (2) — **v. protection of metals**, a method of preventing corrosion of metals by associating them with other metals electropositive to them, as in the case of galvanized iron where the iron is protected at the expense of the more electropositive zinc

Vol"taire', 1 vōl tār', 2 vōl tār', **François Marie Arouet de** (real name, **François Marie Arouet**) (11/21 1694–5/21 1778) A witty and skeptical French dramatist poet, and reformer. — **Voltaire chair**, a low-seated armchair the high back of which serves as a head-rest

Vol-tair'I-an, 1 vel-tār'ı-an, 2 vŏl-târ'ı-an **I.** *a* Of, pertaining to, or in the style of Voltaire **II.** *n* An imitator of Voltaire in principles or style **Vol-tair'e-an‡.** — **Vol-tair'I-an-ism**, *n* The principles or practises of a Voltairian the spirit, philosophy or doctrines of Voltaire witty and scoffing skepticism **Vol-tair'ism‡.**

vol'ta-ism, 1 vel'tə-ızm, 2 vŏl'ta-ĭsm, *n* *Physics* The act of producing an electric current by the chemical action of a liquid on dissimilar metals, galvanism

vol'ta-ite, 1 vel'tə-ait, 2 vŏl'ta-it, *n* *Mineral* A resinous green, opaque, hydrous aluminum iron, potassium, and magnesium sulfate ($H_{20}(K_2,Fe,Mg)_5(Al,Fe)_4S_{20}O_{48}$) crystallizing in the isometric system [< Alessandro *Volta*]

vol"ta-I-za'tion, 1 vel'tə-ı-zē'shon, 2 vŏl'ta-ı-zā'shon, *n* Electrization with the voltaic current

volt-am'e-ter, 1 vōlt-am'ı-tər, 2 vōlt-ăm'e-ter, *n* *Physics* An instrument for measuring the strength of an electric current by the amount of electrolyte decomposed by it in the unit of time

Voltameters are named (1) from the metal deposited as **copper-voltameter, silver v., zinc-v.**; (2) from the method by which the products of electrolysis are determined, as **differential v., volume-v., weight-v.**, (3) from the substance decomposed as **water-v.** [< VOLTA- + -METER] — **differential voltameter**, a voltameter for measuring electric resistance by comparing the volume of decomposed gases from currents passing through the circuit to be measured with that from a current in a circuit of known resistance — **volt"a-met'ric**, *a* Of pertaining to, or involving the use of a voltameter, as a *voltametric* estimate — **vol'ta-plast**, *n* A battery specially arranged or adapted for electrotyping — **vol'ta-type**, *n* [Rare] An electrotype

vol'te, 1 vōl'tē, 2 vŏl'tę, *n* Plural of VOLTA

volte[2], *n* Same as VOLT[2]

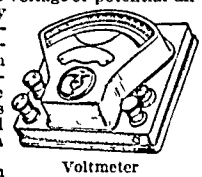
— **volte'-face"**, *n* An entire change of face or front

Here was a *volteface* worthy of a politician
W. BESANT *The Demoniac* p 329 [L CO]

Vol-ter'ra, 1 vol-ter'ra 2 vŏl-tĕr'ra, *n* **1 Daniele da** (1509–4/14 1566), an Italian painter **2** A walled town in Pisa province, Italy noted for its alabaster

vol'ti, 1 vōl'tI 2 vōl'tı, *imper* [It] *Mus* Turn a direction to turn the leaf

vol"ti-geur', 1 vel'tI zūr', 2 vŏl tI zhûr', *n* **1.** One who vaults or jumps, a tumbler **2.** Specif (1) Formerly, in the French army, one of a picked company of irregular riflemen attached to an infantry regiment (2) Under the Second Empire, a rifleman belonging to any one of several regiments of infantry [F, < *voltiger*, vault, < It *volteggiare*, < *volta*, see VOLT[1]] **vol"ti-ger'‡**.



Vol'ti-mand, 1 vel'tı-mand, 2 vŏl'tı-mănd *n* In Shakespeare's *Hamlet*, a courtier **Vol'te-mand‡**.

vol'tite, 1 vel'tait, 2 vŏl'tit, *n* An insulating material for electric wires, etc [< VOLT[1]] [force

vol-tiv'I-ty, 1 vel-tiv'ı-tı 2 vŏl-tiv'ı-ty, *n* Electric energy or

vol'tize, 1 vōl'taiz, 2 vŏl'tiz, *tI* [Rare] To dance the volta.

volt'me"ter, 1 vōlt'mi'tər, 2 vōlt'mē'tər, *n* *Elec* An instrument for determining the voltage or potential difference existing between any two points generally consisting of a calibrated galvanometer wound with a coil of high resistance It is placed in parallel with the circuit to be measured, and direct readings are given on a scale divided into volts and fractions of a volt

Voltmeter

Voltmeters are named (1) from the type of current to be measured as **alternating-current voltmeter, direct-current v.**, (2) from the method of effecting the measurement as **gravity v., hot-wire v., hydrostatic v., recording v., spring v., weight v.**, (3) from the position in which they are placed, as **switchboard v.**; (4) from the nature of the electrical phenomena employed as **electrostatic v.**, in which no flow of current takes place and which is equally adapted for measuring direct and alternating electric currents especially in the case of high voltages

vol'tot, *n* A vault, as of a roof

Vol'tri, 1 vōl'tri, 2 vōl'trī, *n* A town in Genoa province, Italy

voltz'ite, 1 vōlts'ait, 2 vōlts'it *n* *Mineral* A vitreous, pearly, rose-red or brownish, opaque zinc oxysulfid (Zn_4S_3O) found in implanted spherical globules [After P L *Voltz*, French mining engineer] **voltz'inet.**

vo-lu'bi-late, 1 vo-lū'bi-lĕt, 2 vo-lū'bi-lāt, *a* *Bot* Twining [< L *volubilis*, see VOLUBLE]

vol'u-bil(e^s, *a* *Bot* Same as VOLUBLE

vol"u-bil'i-ty, 1 vŏl'yu-bil'i-ti, 2 vōl'yu-bĭl'i-ty, *n* **1** The state or quality of being voluble, great readiness or fluency in speech, garrulousness **2†.** A tendency to roll, rotation **3†.** Mutability, change [< F *volubilité*, < L *volubilitas*, < *volubilis*, see VOLUBLE]

vol'u-bl(e^, 1 vŏl'yu-bl, 2 vōl'yu-bl, *a* **1.** Having a flow of words or great fluency in speaking, ready or rapid of speech, as, a *voluble* speaker **2** Turning readily, apt or formed to roll, rotating, revolving

> Three must the *voluble* and restless earth
> Spin round upon her axle
> COWPER *Task* bk III l 490

3 *Bot* Twisting spirally around a support, twining **4†.** Mutable [F, < L *volubilis*, < *volutus*, see VOLT²]

— **vol'u-bl(e-ness^,** *n* Volubility — **vol'u-bly,** *adv*

Vol'u-cres, 1 vŏl'yu-krĭz, 2 vōl'yu-crēz *n pl* *Ornith* **1.** A former tribe of birds including picarians and scutelliplantar passerines **2** A former order of birds including most picarians parrots and pigeons [< L *volucris*, bird, < *volucer* flying, < *volo* fly]

vol'u-crine, } 1 vŏl'yu-krĭn, 2 vōl'yu-crĭn, *a* Of or per-
vol'u-crin^s, } taining to birds

vol'ume, 1 vŏl'yum, 2 vōl'yum, *rt* & *ri* [VOL'UMED, VOL'UM-ING] **1** To roll or swell as in a great mass or body **2** To gather in a volume, collect

vol'ume, *n* **1.** A collection of written or printed sheets of paper bound together, book, tome, as, a work in three *volumes*, a handy *volume*

Strictly a *volume* has its own title, register and paging, and these characteristics distinguish it from other volumes and other books This is the bibliographic use of the word, sanctioned by the British Museum In bookbinders and booksellers use a *volume* may mean a number of pages bound together, which pages may be parts of one or more *volumes* in the strict sense of the word.

2. A roll or scroll of vellum, papyrus, or bark upon which the ancients wrote their works It was written on one side fastened to other sheets in a continuous roll, and wound round an umbilicus or stick so as to be placed in a scrinium or case

3. Something of a rounded, roll-like, or swelling form; a wreath, coil, fold or turn, as, the smoke rose in *volumes* **4** A large quantity, an amount, mass, as, a great *volume* of water **5** *Math* The solid contents or amount of space included by the bounding surface or surfaces of a solid **6.** *Mus* Fulness, roundness, or quantity of sound or tone **7.** *Physics* Aquantity of one substance in its relation to another, as determined by their bulk under equal pressures, as, water is composed of oxygen and hydrogen in the ratio of one *volume* of oxygen to two of hydrogen [F, < L *volumen*, < *volutus*, see VOLT²]

— **gravimetric volume,** the ratio of a certain volume of gas to the volume of an equivalent weight of water — **molecular v.,** the volume occupied by a molecule obtained by dividing the specific gravity by the molecular weight — **normal v. of a gas** (*Chem & Physics*), the volume occupied by a gas at 0°C and 760 mm barometric pressure — **specific v.,** the ratio of the volume of any substance to the volume of the same weight of another substance taken as a standard, in absolute measure, the volume of the unit of weight of any substance — **to speak or tell volumes,** to say or mean a great deal — **vol'ume-blow"er,** *n* A machine constructed to supply a large volume of air or gas under low pressure — **v. de luxe,** a single-volume edition de luxe See EDITION

vol'umed, 1 vŏl'yumd, 2 vōl'yumd, *a* **1.** Rounded or swelling in form, forming volumes or convolute masses, as, *volumed* mists **2.** Having bulk or quantity **3.** Being in one or more volumes, as, a *two-volumed* history

vol"u-me-nom'e-ter, 1 vŏl'yu-mi-nŏm'i-tər, 2 vōl'yu-me-nŏm'e-ter, *n* *Physics* An apparatus for measuring the volume of a solid body by determining the quantity of a fluid that is displaced by it [< L *volumen* (see VOLUME) + -METER] **vol"u-mom'e-tert.**

— **vol"u-me-nom'e-try,** *n* The art or process of determining volume, as by the volumenometer

vo-lu'me-scope, 1 vo-lū'mi-skōp, 2 vo-lū'me-scōp, *n* A graduated glass tube used for showing the difference in volume of various compounds, especially when decomposed by chemical action [< L *volumen* (see VOLUME) + -SCOPE]

vo-lu'me-ter, 1 vo-lū'mi-tər, 2 vo-lū'me-ter, *n* *Physics* **1.** An instrument for measuring the volume of a gas by the amount of liquid displaced by it in a graduated vessel, under known conditions of pressure and temperature **2.** A hydrometer **3.** Same as STEREOMETER [< *volu-* in L *volumen* (see VOLUME) + -METER]

vol"u-met'ric, 1 vŏl'yu-met'rik, 2 vōl'yu-mĕt'ric, *a* *Physics* Of or pertaining to measurement of substances by comparison of volumes [< *volu-* in L *volumen* (see VOLUME) + Gr *metron* measure] **vol"u-met'ri-cal:** — **volumetric analysis** (*Chem*), the analysis of a substance by determining the quantity of a standard solution required to satisfy a reaction in a known quantity of the compound — **vol"u-met'ri-cal-ly,** *adv*

vo-lu'mi-nal, 1 vo-lū'mi-nal, 2 vo-lū'mi-nal, *a* Of or pertaining to volume [< L *volumen* (*volumin-*), see VOLUME]

vo-lu'mi-nous, 1 vo-lū'mi-nus, 2 vo-lū'mi-nŭs, *a* **1.** Containing or consisting of many volumes, as, a *voluminous* edition, *voluminous* works **2** Producing many books, having written much, as, a *voluminous* writer **3** Of great volume bulk, or size, swelling, as, *voluminous* drapery **4** [Rare] Having coils, folds, or convolutions, as, a *voluminous* serpent [< F *volumineux*, < LL *voluminosus*, < L *volumen* (*volumin-*), see VOLUME] — **vo-lu"mi-nos'i-ty,** *n* The state or quality of being voluminous, especially copiousness or prolixity — **vo-lu'mi-nous-ly,** *adv* — **vo-lu'mi-nous-ness,** *n*

vol'u-mist, *n* One who writes a volume, an author

Vo-lum'ni-a, 1 vo-lum'ni-ə 2 vo-lūm'ni-a *n* **1** A Roman matron wife of Coriolanus **2.** In Shakespeare's *Coriolanus* mother of Coriolanus

Vō'lund, 1 vō'lund, 2 vŭ'lund, *n* In Teutonic legends a wonderful smith and king of the elves His adventures are told in the Elder Edda He corresponds to the Roman Vulcan and the English Wayland See WAYLAND

vol'un-ta-rism, 1 vol'un-tə-rizm, 2 vōl'ŭn-ta-rĭsm, *n* *Philos* The theory which holds that will is the ultimate principle, both in the experience and development of the individual, and in the constitution and evolution of the universe In the former, or psychological variety of the theory, as held by Wundt the volitional or active aspect of the human person is made the more fundamental and prominent, altho it is found necessary to conceive of this aspect as including ideating will — a concession to *intellectualism*, to which on the whole, *voluntarism* is opposed With Fichte the self-determining and self-relating activity of the ego both finite and absolute was understood as the ultimate principle of all reality With Schopenhauer this principle is conceived of as blind and irrational, but absolute, will

vol'un-ta-rist, 1 vol'un-tə-rist, 2 vōl'ŭn-ta-rĭst, *n* An adherent of voluntarism — **vol"un-ta-ris'tic,** *a*

vol'un-ta-ry, 1 vol'un-tē-ri; 2 vōl'ŭn-tā-ry, *a* **1.** Proceeding from or effected by the will, in any sense of the word Specif (1) Brought about by free choice, unconstrained by extraneous force or influence, freely or willingly done as the *voluntary* gift of a friend (2) Resulting from or done with deliberation and purpose intentional, volitional as murder in the first degree must be *voluntary* (3) Proceeding from the will as comprising the active or motive powers spontaneous volitional, as, 'no action is of a moral nature that is not *voluntary*"

The word *voluntary* as employed in the maxim under consideration includes more than volition it comprehends all the spontaneous exercises of the mind that is all its affections and emotions Formerly all these were included under the word will, and we still use language that requires this latitude in the construction of the term

ARCHIBALD ALEXANDER *Outlines of Moral Science* p 207 [s 1852]

(1) Proceeding from or done in accordance with will, the will, however being the subject of physical determinism, as, a criminal's actions may be *voluntary* and yet not free

2. Endowed with, possessing, or exercising will, having moral freedom, as, man is a *voluntary* agent **3** Effecting by will, or by choice or volition, acting without being constrained by extraneous force, as, the criminal is usually *voluntary* in his schemes and acts

Let it be remembered that by the *voluntary* faculty, or the will, we mean simply the capacity of the mind to perform acts of volition ALDEN *Elements Intell Philos* p 261 [s 1873]

4. *Physiol* Of, pertaining to, or directed or controlled by the will, subject to will distinguished from *automatic* and *sensorimotor*, as, a *voluntary* movement of the muscles **5** *Eccl* Of or relating to voluntaryism, pertaining to the doctrine of the voluntaryists, as, a *voluntary* church, in distinction from an established church **6** *Law* Specif (1) Unconstrained of will, without compulsion done with one's consent as, a *voluntary* assignment (2) Without valuable consideration, gratuitous as, a *voluntary* gift or grant, a *voluntary* conveyance of land [< F *volontaire* < L *voluntarius*, < *voluntas*, will, < *volent(t-)s*, ppr of *volo*, will] Syn., see SPONTANEOUS

— **voluntary affidavit** or **oath,** an oath taken or affidavit made, in a matter which is extrajudicial — **v agent,** same as FREE AGENT — **v association** 1 An unincorporated body of persons united for the promotion of a common purpose or for the prosecution of a public enterprise **2** A body of persons voluntarily organized under a charter to promote public welfare or social improvement in some special regard, as the Young Men's Christian Association — **v confession,** a free confession by a criminal, without promise of advantage or threat of disadvantage — **v. jurisdiction,** the jurisdiction of a tribunal in regard to matters not opposed or controverted — **v. muscle,** controlled by the will — **v. partition,** a partition of lands made by mutual agreement of heirs without suit — **v school,** a school supported by voluntary subscription, specif, an English primary school only partially supported by government grants — **v. waste,** damage actively done to real estate to the permanent injury of the inheritance, as cutting timber distinguished from mere neglect or permissive waste

— **vol'un-ta-ri-ly,** *adv* In a voluntary manner of one's own free will spontaneously **vol"un-ta'ri-ous-ly‡** — **vol'un-ta-ri-ness,** *n* The state or character of being voluntary spontaneousness, especially, the state of possessing or exercising free will — **vol'un-ta"tiv(e^s,** *a* Having power to act or effect at will voluntary **vol"un-ta'ri-ous†.**

vol'un-ta-ry, *n* [-RIES, 1 -riz, 2 -rĭs, *pl*] **1.** One who engages in an affair by his own will or choice, a volunteer **2.** Any work or performance not compelled or imposed by another **3.** *Eccl* One who holds the principles of voluntaryism **4** *Mus* An organ solo played before, during, or after service, sometimes, also, any musical performance, during service, at the pleasure of the organist — **at voluntary†,** at will or by an effort of will

vol'un-ta-ry-ism, 1 vol'un-tē-ri-izm, 2 vōl'ŭn-tā-ry-ĭsm, *n* The principle that religious or educational institutions should be supported by voluntary contributions rather than by the state

That is an argument not for Establishment but for *voluntaryism*. SIR GEORGE TREVELYAN in *Hansard's Parliamentary Debates Feb 20 1891* p 1310 [R P U 1891]

vol'un-ta-ry-ist, 1 vol'un-tē-ri-ist, 2 vōl'ŭn-tā-ry-ĭst, *n* One who advocates voluntaryism in religion

vol'un-tet, *n* Will wish, pleasure **vol'un-tyt.**

vol"un-teer', 1 vol'un-tir', 2 vōl'ŭn-tēr', *v* **I.** *t* To offer, bestow, or contribute voluntarily or without compulsion or constraint, as services, time, means, or the like **II.** *i* To enter into any service or undertaking of one's free will, specif, to become a military volunteer

vol"un-teer', *a* **1.** Of, pertaining to, or composed of volunteers, voluntary, as, a *volunteer* organization **2.** *Agric* Springing up naturally, as from fallen seed, as distinguished from that growing from sown seed

vol"un-teer', *n* **1** One who enters into or offers himself for any service of his own free will or intention; specif, one of a voluntary military organization, as distinguished from the regular army

In the United States volunteers consist (1) of the regular militia or (2) of troops raised by voluntary enlistment for any special emergency In Great Britain the volunteers were formerly a class of troops for home service, acting as a kind of subsidiary militia and, except during crises were allowed to resign at short notice Since 1907 such troops have formed a part of the Territorial Army See TERRITORIAL

2. *Law* (1) A voluntary agent or actor in a transaction. (2) One who takes title under a deed made without any consideration either good or valuable **3.** [Local, U S] A tree growing or springing up spontaneously, as a fruit-tree, hence, any thing intruding itself voluntarily [< F *volontaire*, see VOLUNTARY] — **Volunteers of America,** a religious and philanthropical organization founded in the United States in 1896 by Commander and Mrs Ballington Booth, who resigned from the Salvation Army for that purpose The aim of this society is to perform evangelistic, social and rescue work among those whose misfortunes or misdeeds have placed them beyond the pale of society — **Volunteer State,** Tennessee

vol"un-teerd', *pp* Volunteered S S

vol"un-teer'ly, 1 vol'un-tir'li, 2 vōl'ŭn-tēr'ly, *adv* In the manner of a volunteer, voluntarily

vol"un-to-mo'to-ry, 1 vol'un-to-mō'to-ri, 2 vōl'ŭn-to-mō'to-ry, *a* Subject to voluntary motor influence, as the somatopleure of the embryo [< *volunt-* in VOLUNTARY + MOTORY]

vol'u-peret, *n* A cap, kerchief, or nightcap worn by women during the 14th century.

vo-lup'tu-a-ry, 1 vo-lup'chu-[*or* -tiu-]ē-ri, 2 vo-lŭp'chu-[*or* -tū-]ā-ry, *a* Of, pertaining to, or promoting sensual desire or indulgence, luxurious, voluptuous [< L. *voluptuarius*, < *volupta(t-)s*, pleasure]

vo-lup'tu-a-ry, *n* [-RIES, 1 -riz, 2 -rĭs, *pl*] One addicted to luxury or sensual pleasures, sensualist, sybarite

vo-lup'tu-atet, *rt* To make luxurious or voluptuous

vo-lup'tu-ous, 1 vo-lup'chu-[*or* -tiu-]us, 2 vo-lŭp'chu-[*or* -tū-]ŭs, *a* **1.** Producing, causing, exciting, or yielding sensuous or sensual gratification, as, a *voluptuous* song, a *voluptuous* climate, a *voluptuous* look or attitude **2.** Of or pertaining to the enjoyment of or indulgence in pleasures or luxuries, especially sensuous ones, as, a *voluptuous* life **3.** Having fulness of beautiful form, as a woman, with or without sensuous or sensual quality or feature, as, a *voluptuous* figure or lip [< F *voluptueux*, < L *voluptuosus*, < *voluptas*, pleasure]

— **vo-lup'tu-ous-ly,** *adv* — **vo-lup'tu-ous-ness,** *n* The state or quality of being voluptuous **vo-lup'tief, vo-lup"tu-os'i-ty‡; vo-lup'ty†.**

Vol"u-se'nus, 1 vŏl'yu-sē'nus 2 vōl'u-sē'nŭs **Florentius** (?1504–1546) A Scottish humanist and scholar

vor'tex, 1 vōr'teks, 2 vôr'tĕks, *n* [VOR'TI-CES, 1 vōr'ti-sīz, 2 vôr'ti-çēş, or VOR'TEX-ES, *pl*] **1.** A mass of rotating or whirling fluid, especially when sucked spirally toward the center, a whirlpool **2.** *Physics* A portion of fluid whose particles have rotatory motion, a whirl in a fluid The fluid does not rotate in mass as a solid body, but has unequal angular velocities at different points In vortices seen in nature, the axis of the vortex is usually a closed curve, as in the smoke-rings puffed from a locomotive, a cannon-mouth, or a smoker's lips These circular vortices or vortex-rings move forward parallel to the same plane, the parts rotating about the circular core but the ring not rotating about its axis If two circular vortices approach each other, one expands, rotates more slowly and the other contracts, rotates more rapidly, and passes through the center of the larger ring without touching it In a perfect fluid a vortex could not be formed by mechanical means, but if it existed it would be indestructible whatever changes of shape it passed through See VORTEX-ATOM **vortex theory‡.**

A new epoch in the progress of hydrodynamics was created in 1856 by Helmholtz who worked out remarkable properties of *rotational motion in a homogeneous incompressible fluid* devoid of viscosity He showed that the *vortex* filaments in such a medium may possess any number of knottings and twistings but are either endless or the ends are in the free surface of the medium they are indivisible These results suggested to Sir William Thomson the possibility of founding on them a new form of the atomic theory, according to which every atom is a *vortex* ring in a non-frictional ether and as such must be absolutely permanent in substance and duration

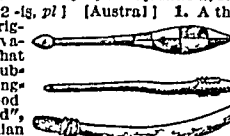
W, w, 1 dub'l-yū, 2 dŭb'l-yu, *n* [w's, W's, or *Ws*, 1 dub'l-yūz, 2 dŭb'l-yus, *pl*] **1.** A letter the twenty-third in the English alphabet

In uttering its sound, as in *wit*, the vocal cords are set in vibration with the lips in position for the *oo* of *pool*, but without the formation of the resonance-chamber necessary for a distinct, full-fledged vowel The sound is thus really a 'half ū,' instead of a "double yū", whence the name "labial semivowel", cf Fr *ouest*, Eng *west*. W stands in the same relation to ū as y to i

If the lip-movement of *w* is made without vibration of the vocal cords, the result is a voiceless or "whispered" *w* This is the sound usually substituted by Englishmen for the initial wh of *white when* etc, which in the United States is generally pronounced *hw* The voiceless *w* occurs also in other words after voiceless consonants as in *quart sweet, twin*

The modern English *w* is almost all come from Anglo-Saxon, the sound occurs also with the *u* of some words from Latin and French, and the *o* of French words in *oi quart, suarity, reservoir* See under Q

The *w* sound has appeared freely and passed away strikingly in the Indo-European tongues No record of the Greek *ϝ* or digamma, so well known to philologists is found in the manuscripts of literature The *w* of Latin was written with the same letter as the vowel *u*, *v* In the second century A D it changed into the spirant *v*, and so continues through the Romanic tongues Anglo-Saxon preserves the original sound, but many words have now lost it (1) initial before *r*, as in *write, wrong*, before *l*, as in *wlisp*, > *lisp*, (2) medial sometimes in *thiw, tw, sw*, as in *thong*, < AS *thwang, two*, = tū, *answer, sword* (3) final *w* has changed to its vowel or dropped in sound entirely, *few* = fiū, *spearwa* > *sparrow, treow* > *tree* The French could not pronounce German *w* easily, but substituted *gu, v, u, ou guerre* (*war*), *guarder* (*ward*) There was confusion about *h* and *w*, the AS *hw* was inverted as *hwæt* > *what*, and silent *w* was written by blunder as *whole* for *hole* *W* easily changing to *u*, and, combining freely with other letters, is concerned in many phonetic changes, especially in classic Latin, such as *v*, > *u* in *solre, solution*, and *wa, aw*, > we, ē, in English *was, saw*



The *w* is average 2 31 per cent of the sounds on the pages of English literature, according to Professor Whitney's examination W D WHITNEY *Oriental and Linguistic Studies* second series p 274 [s 1874]

W is a ligature of VV For earlier history of V, see its vocabulary place V, then the sign of the vowel *u*, came into use, single and double, in English for consonant *u* = w, through Anglo-Norman influence, 1150–1280 The v's are at first written separate or sometimes ligatured, W. The earliest Anglo-Saxon, like Old High German, makes the same use of u, v, uu, vv, vu) But from the ninth century to 1280 a special Anglo-Saxon character was used, Ƿ, < runic ᚹ, *wēn*, hope, and *wyn*, joy, the eighth letter of the futhorc, < early Greek Ϝ

The two *u*'s or *v*'s were naturally spoken of as "double *u*" and *u* as "single *u*," and altho *wit, we*, and *wau* were early proposed as names for the new ligature, no phonetic name has gained currency The French call it *double v*, the Germans *we* For further details, see F, U, V, Y

walk, *n* **1.** The primitive method of locomotion used by the terrestrial vertebrates on their development, effected by a uniform system of limb-movements common alike to quadrupeds and bipeds, the law governing the motion being that in regular and consecutive action the superior limb precedes its lateral inferior limb it is the usual gait of nearly all animals

If, in the quadrupedal walk, the notation begins with the landing of a right hind foot, the consecutive foot-fallings will be the right fore foot, the left hind foot, the left fore foot, followed by its diagonal hind, with which the record began The time-intervals of foot-fallings vary with different species of animals, but their sequence is invariably the same except with the ape family, in which the sequence is reversed unless under exceptional circumstances, a fore foot preceding the landing of its lateral hind foot During a single stride of a quadruped in an ordinary walk it is supported in eight different ways twice on the laterals, twice on the diagonals, twice on two hind feet and one fore foot, and twice on two fore feet and one hind foot See plate of MOVEMENTS OF THE HORSE, at MOVEMENT

It is thus seen that when a horse during a *walk* is on two feet, and the other two feet are suspended between the supporting legs the suspended feet are laterals On the other hand, when the suspended feet are severally in advance of and behind the supporting legs, they are diagonals These invariable rules seem to be neglected or entirely ignored by many of the most eminent animal-painters of modern times EADWEARD MUYBRIDGE *On the Science of Animal Locomotion* p 8 [H I OT BRIT]

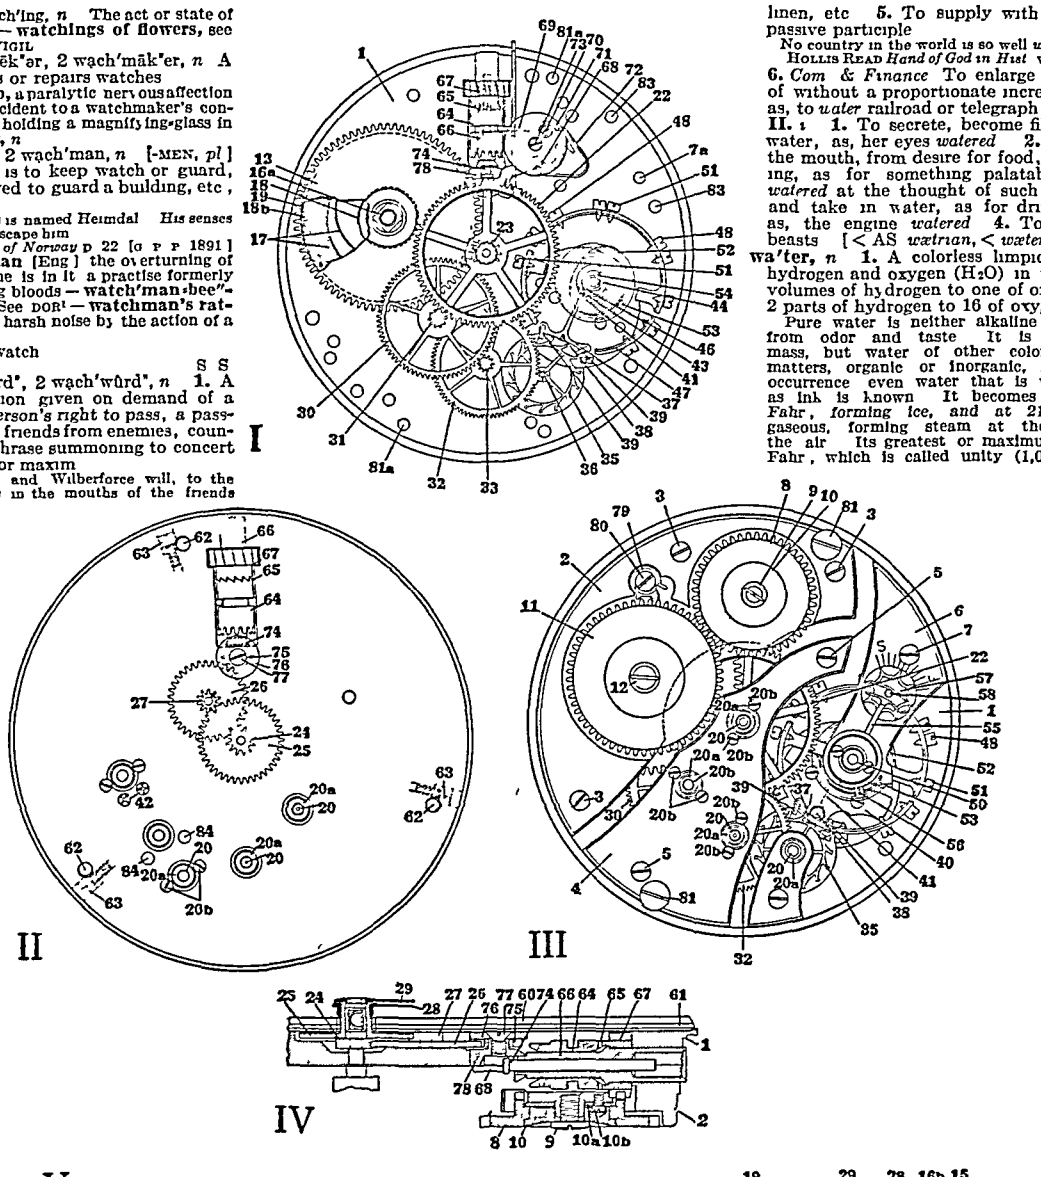
Wa"teau', *n* Same as WATTEAU

Wate"let', 1 wōt'lē', 2 vät'ig' *n* **1. Claude Henri** (1718–1/12 1786), a French artist, writer, and academician **2. Louis Étienne** (8/21 1780–6/21 1866), a French landscape-painter

wa'ter, 1 wē'tər, 2 wa'ter, *v* **I.** *t* **1.** To pour water upon, moisten or sprinkle with water, irrigate

The Fellah opens or closes the rivulets with his foot as the Scripture says, 'Where thou *wateredst* the land with thy foot' S C BARTLETT *From Egypt to Palestine* p 45 [H 1879]

2. To provide with water for drinking, give water to, as, to *water* cattle **3.** To increase the amount or bulk of by adding water, mix or dilute with water, weaken by dilution with water, as, *watered* milk **4.** To give an undulating sheen to the surface of by subjecting to uneven pressure after moistening and heating, as silk, linen, etc **5.** To supply with streams used in the passive participle



No country in the world is so well *watered* [as South America] HOLLIS READ *Hand of God in Hist* vol II p 320 [H R 1860]

6. *Com & Finance* To enlarge the number of shares of without a proportionate increase of paid-in capital, as, to *water* railroad or telegraph stock

II. *i* **1.** To secrete, become filled with, or discharge water, as, her eyes *watered* **2.** To fill with saliva, as the mouth, from desire for food, hence, to have a longing, as for something palatable, as, their mouths *watered* at the thought of such dainties **3.** To get and take in water, as for drinking or for a boiler, as, the engine *watered* **4.** To drink water said of beasts [< AS *wætrian*, < *wæter*, water]

wa'ter, *n* **1.** A colorless limpid liquid compound of hydrogen and oxygen (H_2O) in the proportion of two volumes of hydrogen to one of oxygen, or by weight of 2 parts of hydrogen to 16 of oxygen

Pure water is neither alkaline nor acid, and is free from odor and taste It is blue when viewed in mass, but water of other colors caused by foreign matters, organic or inorganic, is not of uncommon occurrence even water that is white as milk or black as ink is known It becomes solid — freezes — at 32° Fahr, *forming ice, and at 212° Fahr it* becomes gaseous, forming steam at the normal pressure of the air Its greatest or maximum density is at 39 2° Fahr, which is called unity (1,000) and is the standard for the comparison of the densities of other solids and liquids A cubic centimeter of water at 39 2° Fahr weighs 1 gram and is the standard unit of the metric system It is an imperfect conductor of *electricity and is* slightly compressible The solvent powers of water are very great, and it is seldom found pure Among geological agencies it is first both as regards its mechanical and chemical action It is the chief agency in **rock-making,** in shaping mountains, excavating valleys, and in recording the progress of the earth in its features and life Its mechanical action manifests itself by softening rocks and earthy beds by penetrating and causing disintegration through alternate freezing and melting, while its chemical action manifests itself by its solvent power, *yielding* new minerals while altering others Water forms more than two-thirds of the earth's surface, and it has been estimated that if all the water of the globe could be collected it would form a sphere 900 miles in diameter According to its source, it is known as **river-water, sea-w, spring-w,** etc When precipitated from the clouds it is **rain-w.** Rain-water is nearly pure an average analysis of sea-water would show about 3 5 *per cent* salts of various kinds, 2 7 per cent being common salt Water is also an essential

Parts of an American Open-face Watch

I *View of pillar-plate with top-plate removed, main-wheel broken away to show mainspring* balance-wheel with arms broken out to show hair-spring also winding- and setting-mechanism II View of back side of pillar-plate showing winding-pinion and clutch, intermediate hand setting-wheel, etc III View showing barrel-bridge train-bridge, and escape-wheel bridge (which together constitute the top-plate) winding-wheel, balance-cock micrometric regulator etc IV View showing a section through a portion of the pillar-plate and barrel section of top-plate which carry the winding-bar, crown-wheel etc V View showing section through top-plate, pillar-plate, and balance-cock showing the watch-train stretched out in a straight line in its relative order of movement beginning on the left with the main-wheel which revolves once in six and one-half hours and drives the center-wheel one revolution each hour and through the cannon-pinion the minute-wheel, the minute-pinion and the hour-wheel drives the latter one revolution in twelve hours the center-wheel drives the third wheel and pinion and they in turn drive the fourth wheel and pinion one revolution each minute, and through the action of the escape-wheel and the pallet and fork the balance is given 18 000 vibrations per hour

In operating turn winding-arbor (66) by means of a male square on winding-bar in stem of case entering square hole in outer end of winding-arbor (66) impinging end of push-pin (74), forcing it inward against shipper-lever (68), which acting against shipper (69) engages ratchet-teeth of shifting-clutch (65) with corresponding teeth on winding-pinion whose spiral teeth engage corresponding teeth of the crown-wheel (8), whose peripheral teeth are in engagement with corresponding teeth of winding-wheel (11) which is attached to the upper end of the barrel-arbor (16) the lower end of which arbor is attached to mainspring-barrel (19), to which the outer end of mainspring is attached Turning this barrel, consequently winds mainspring closely around the main-wheel hub (14) The recoil-click (79) prevents the mainspring being too tightly wound The force of the mainspring causes the main-wheel (13) to turn and it being connected with teeth of center-pinion (23), carries that and its attached center-wheel (22), and in similar manner the succeeding 3d 4th and escape-wheels and pinions When the watch is at rest one of the pallet-jewels (39) should rest on the inclined face of one of the teeth of the escape-wheel (35) The turning of this wheel causes pallet (37) to swing on its arbor (38) The extended arm of the pallet terminates in a fork (41) which in moving carries enclosed roller-jewel (45) and roller (44) which being fast on balance-staff (49), carries balance (47) giving it a slight impetus and in so doing deflects hair-spring (52) until its resistance exactly equals the impetus of the balance (47) The spring then reacts carrying balance in opposite direction until roller-jewel reenters the fork and moves it sufficiently to unlock the escape-wheel The swinging of the pallet brings one of the pallet-jewels directly in front of one of the escape-wheel teeth, thereby arresting its further progress The return movement of balance swings the fork in the other direction and thereby unlocks the escape-wheel tooth whose inclined top again forces the pallet and fork in contrary direction until the opposite pallet-jewel has engaged another tooth, these reverse movements of the balance serving to disengage successively one or the other of the teeth of the escape-wheel The weight of the balance and the elastic force *of the hair-spring must be so adapted the one to the other, as to produce eighteen thousand vibrations of the balance per hour On the center staff is located a cannon-pinion (24) so-called* which engages with the minute-wheel (26) which is made fast to minute-pinion (27) which engages the hour-wheel (25) the relation of the wheels and pinions being such that while the cannon-pinion makes one revolution per hour the hour-wheel makes one revolution in twelve hours For setting the hands it is needful to disengage the shifting-clutch sleeve (64) from the winding-pinion (67) and bring the teeth of the opposite end of sleeve into engagement with the corresponding teeth of the intermediate setting-wheel which are constantly engaged with the teeth of the minute-wheel. To effect this shifting of the sleeve it is simply needful to pull outward the crown of the watch case thus withdrawing the winding-bar from contact with the push-pin, when the action of shipper-spring (72) acting upon the shipper and shipper-lever (68–69) will throw the shifting-clutch into engagement with the intermediate setting-wheel

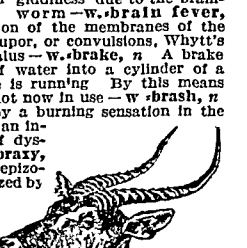
constituent of all animal and vegetable life, and of most minerals and rocks, forming the so-called *water of crystallization* (See phrase) It frequently imparts crystalline form and color to salts, as in the case of cobalt, copper, iron, and other sulfates

Water forms a large proportion of all animal organisms and in this 'river of life' the molecules constantly dissolve and constantly develop chemical electrical, mechanical, and heat energy WILLIAM L SHERWOOD *Nature of Life* Lecture before N Y University, Jan 20, '05

2. Any particular body of water, as a lake, a river, or a sea sometimes used in the plural, as, the *waters* of Lake Superior, to go by *water*, in Scotland, a small river **3** Any one of the aqueous or liquid secretions of animals, as, *water* on the brain, also, perspiration, tears, urine, etc **4** Any preparation of water holding a gaseous or volatile substance in solution, as, ammonia *water*, orange-flower *water*, also, a product of distillation or alcoholic solution, as, strong *water*, Cologne *water*

They include the preparations formerly specially designated as 'Distilled *Waters*' having been made by distilling water from plants or parts of plants containing volatile oil *U S Dispensatory* p 216 [t 1800]



5. The transparency or luster of a precious stone or pearl, hence, the aggregate of qualities that make it valuable, also, figuratively, excellence, purity, degree, etc **6.** An undulating sheen given to certain textile fabrics, or to metal See DAMASK, 2, DAMASKEENING, 2 (6) **7.** *Finance* Stock issued without increase of paid-in capital to represent it **8.** [Prov Brit] The banks of a river or other body of water, also (*pl*), a seaside resort **9.** [Prov Eng] Dew [< AS *wæter*, water]

—above water, out of danger, secure **—alkaline w**, a natural mineral water in which alkaline salts, especially sodium bicarbonate and sodium chlorid, predominate, as the Congress water of Saratoga Springs and the Vichy water of France **—benediction of the waters** (*Gr Ch*), a processional Epiphany ceremony of blessing streams, seas, and certain holy waters **—between wind and w. 1.** At that strip of a vessel's hull which in rolling is alternately submerged and above water **2** In any particularly vulnerable part **—bitter w.**, a natural mineral water containing in solution certain magnesium salts as magnesium sulfate **—bot'tom-wa'ter,** *n* Same as GROUND-WATER **—bromin w**, a solution of bromin in water used as a laboratory reagent **—burning w †**, alcohol **—carbonated w.**, originally, any natural mineral water containing carbon-dioxid gas now, any water naturally or artificially impregnated with carbon dioxid, soda-water **—chalybeate w**, a natural saline mineral water containing ferrous salts, as the waters of Spa, Belgium, and Wiesbaden, Germany **—deep w. or waters,** a state or time of great tribulation, grievous peril **—entrained w**, water trapped in a steam-pipe **—false waters** (*Obstet*), a *fluid found sometimes between the amnion and* the chorion **—Florida w**, a proprietary preparation used as a toilet-water **—frightened w.** [Naut Slang], weak tea or coffee served to a crew **—ground-w.,** *n* The water which permeates the outer portion of the earth's crust, filling pores, fissures, and cavities, and saturating the soil and rocks below an irregular, indefinite surface known as the **water-table** See UNDERGROUND WATER **—hard w**, see HARD 12 **—hepatic w.**, water charged with hydrogen sulfid or impregnated with sulfur **—holy w**, water regarded as sacred especially in Christian churches, that consecrated by a priest and used for lustral and ritual purposes **—house of w.†** [Local Eng], an abandoned mine-pit containing water **—Hungary w**, a preparation distilled from rosemary and similar flowers said to have been used by some former queen of Hungary as a lotion **—inch of w.,** same as WATER-INCH **—lithia w**, a natural mineral water containing lithium salts, valued for use in certain diseases as lithemia **—low w 1.** Low tide **2** The lowest point on a river-bank exposed in any recorded stage of the water **3** [Slang, U S] The condition of being out of money **—marmala w.,** a perfume obtained from the flowers of the Bengal quince (*Ægle marmelos*) **—mineral w**, a natural water coming from a spring and containing some characteristic mineral ingredient, as carbon dioxid or a lithium salt Mineral waters are extensively used in medicine, and are described according to their ingredients The phrase has also been largely applied to artificial waters made by dissolving the salts in pure water **—of the first w.,** of the purest variety or finest quality said of certain precious stones, especially the diamond **—on the w-wagon** [Slang], abstaining from liquor **—public waters,** any waters, either still or flowing, in which the public have right of navigation **—pulverized w**, water diffused into fine spray **—quicksilver w**, same as QUICK WATER **—saline w.,** a natural mineral water in which saline salts, chiefly sodium chlorid and calcium or magnesium sulfates, predominate, as the Saratoga waters of New York or the Seidlitz water of Bohemia **—soft w**, see SOFT, 12 **—territorial waters** (*International Law*), the belt of sea under a state's territorial jurisdiction **—the waters,** the amniotic fluid **—to cast oil on troubled waters,** figuratively, to calm, appease *from the* well-known effect of a film of oil on turbulent water **—to hang its w.** (*Mining*), to fail to work said of a pump **—to keep one's head above w**, figuratively, to keep from succumbing to trouble or misfortune **—to take w 1** To fall in the wake of another boat, as in a race **2.** To dip an oar in water for a stroke, begin to row **3.** [Slang] To back down weaken **—troubled waters,** disturbed affairs, discord **—underground w.** (*Geol*), the water which permeates in an unbroken sheet, the rock-masses of the earth, filling their pores and fissures, quarry-water The upper soil-covered rock-surface is the boundary between this and the "ground-water," which is properly limited to the soil It is called "underground water" when reference is made to it as a source of water-supply through the rock-fissures or "quarry-water" when reference is had to the effect which its presence or its absence, after drying, has on quarried stone **—wa'ter-ad"der,** *n* **1** The water-moccasin **2** The common water-snake (*Tropidonotus sipedon*) **—w-agate,** *n* See AGATE **—w.-agrimony,** *n* A British burmarigold (*Bidens tripartita*) growing in watery places **—w.-aloe,** *n* Same as WATER-SOLDIER **—w.-analysis,** *n* The chemical analysis of a water, usually to determine its potability or value for drinking purposes, its medicinal value, as in the case of mineral water, or its adaptability for industrial purposes as in the case of a water suitable for steam-boilers **—w.-anchor,** *n* A sea-anchor See ANCHOR[1] **—w.-antelope,** *n* A water-buck **—w.-apple,** *n* The custard-apple **—w.-arch,** *n* *A cluster of pipes or a chamber filled* with water constituting the arch of a furnace and used as a substitute for the fire-brick arch **—w.-arum,** *n* A low perennial herb (*Calla palustris*) growing in cold bogs in the northern United States and Canada It has a creeping root-stock, cordate leaves, and an open white spathe about two inches long See CALLA, 3 **—w.-avens,** *n* A simple-stemmed herb (*Geum rivale*) of swamps in temperate regions with lyrate and interruptedly pinnate root-leaves, those of the stem 3-folíolate or 3-lobed, and purplish-orange flowers

Compare AVENS **—w-back,** *n* **1** A coil or chamber back of the fire-pot in a range or other stove, for heating water, and usually a part of a circulating system **2.** A brewery water-supply cistern **—w-ballaget,** *n* A small toll, levied by the Corporation of London, on corn brought by vessels into the port **—w.-bailiff,** *n* [Eng] **1.** (1) An officer in port towns, appointed for the search of ships, examination of the fish brought in, and to see that the laws of the port are duly observed (2) [Eng] An official of the court of admiralty in the Isle of Man He is sometimes styled admiral, and is said to have jurisdiction in salvage and over other maritime matters occurring within three leagues from the shore **2.** An officer who protects a river or other water from poachers or illegal uses **—w.-balance,** *n* An *obsolete water-raising apparatus consisting of a swinging* frame carrying a double series of troughs ascending in zigzag lines, and so adjusted to each other that, as the frame rocks in either direction, water may be passed to a higher level **—w-bar,** *n* **1** A ridge thrown across a steep country road, to turn surface-water Compare THANK-YOU-MA'AM **2.** [Eng] A strip inserted in a joint to prevent the entrance of water, as between the wood and stone sills of a window **—w.-barrow,** *n* A wheelbarrow arranged with a small tank, for watering gardens, etc **—w-bath,** *n* An apparatus used variously, as in chemistry or cooking, for heating substances at constant temperature It consists essentially of an inner receptacle separated from an outer one by a chamber filled with water, heated constantly so that the temperature never exceeds that of boiling water Sometimes salts are added to raise the temperature **—w.-battery,** *n* **1.** *Elec* A voltaic battery in which the electrolyte is water **2.** *Fort* A battery erected or stationed nearly on a level with the water **—w.-beadlet,** *n* A water-bailiff **—w.-bean,** *n* Any plant of the genus *Nelumbo, a nelumbo—wa'ter-bear",* *tr* *To transport by* water **—w.-bear,** *n* A bear-animalcule or tardigrade arachnid **—w.-bearer,** *n* **1.** One who carries water, specif, one who supplies or sells water in places where there is no system of water-works **2.** [W-] *Astron* Same as AQUARIUS **—w-bearing,** *n* *Mach* A journal-bearing in which water under pressure does the work of a lubricant, a paller-glissant **—w.-beech,** *n* **1.** The American hornbeam See HORNBEAM **2.** The American plane-tree or sycamore (*Platanus occidentalis*) **—w-beetle,** *n* **1.** A hydradephagous beetle, having legs flattened and fringed with hairs for swimming, as a dytiscid or diving beetle or a whirligig or gyrinid See illus at DYTISCIDÆ **2** Some other aquatic beetle, as the European black water-beetle, a hydrophilid (*Hydrophilus piceus*) **—w.-belcher,** *n* [Local, U S] The bittern **—w.-bellows,** *n* A vessel having valves opening in opposite directions, and placed mouth downward in water As it is raised, air is drawn in at one valve, and as it is lowered, air is forced out through the other valve sometimes used in pairs to produce a continuous air-current **—w-betony,** *n* A British species of figwort See BETONY, 2 **—w bewitched** [Slang], a weak or washy mixture, as weak tea or grog **w damaged†.—w.-bird,** *n* A bird of aquatic habits **—w.-biscuit,** *n* A cracker or hard biscuit made of flour and water **—w-bitternut,** *n* Same as WATER-HICKORY **—w blackbird,** *n* [Local, Brit] The water-ouzel **—w.-blast,** *n* *Min* A form of blower resembling the trompe **—w-blebs,** *n* A disease *characterized by serous vesicles scattered over the body,* attended by fever, vesicular fever, bladdery fever **—w-blink,** *n* In the arctic regions, a cloud or spot on the horizon arising from and indicating the presence of open water a sign of the breaking up of winter **—w.-blinks,** *n* Same as WATER-CHICKWEED **—w-blister,** *n* A slight elevation of the cuticle enclosing serous fluid, also, an analogous blister on the tobacco-plant caused by hot sunshine on a wet leaf **—w.-block,** *n* *Metal* A hollow metal block kept cool by water circulating inside it **—w-blue,** *n* Soluble blue See BLUE **—w.-boa,** *n* The anaconda **—w.-board,** *n* A board set up to windward in a boat, to keep off waves and spray **—w.-boat,** *n* A boat used to convey fresh-water supplies to ships **—w-boatman,** *n* **1.** A notonectid bug having a boat-shaped body and swimming upon its back with oar-like movements of the long ciliated hind legs, as *Notonecta undulata*, common in the United States boat-fly, back-swimmer **2** A corisid bug, as the common American *Corisa interrupta* **—w.-bok,** *n* A water-buck **—w.-borne,** *a* **1.** Carried upon the water borne by water, floated **2** Transmitted by drinking water said of certain infectious diseases **II** *n* *Naval Arch* The portion of a ship's body sustained by the water, as opposed to the *overhang* **—w.-bosh,** *n* *Metal* A cooling trough for tools **—w-bottle,** *n* **1** A bottle of glass, skin rubber etc, made to contain water **2** A device for collecting samples of water at specified depths **—w.-bottom,** *n* **1** A water case used to protect a floor, etc from the heat under the ash-pit of a furnace, etc **2** A ship arranged to carry water as ballast **—w-bouget,** *n* Same as BOUGET 1 **—w.-bound,** *a* Brought to a standstill by water, as in the form of a storm freshet, etc **—w.-box,** *n* A water-case attached to the outside of a furnace, to protect the iron from the effects of fire **—w-brain,** *n* A disease of sheep characterized by staggering, as from giddiness due to the brain-worm **—w.-brain fever,** acute tubercular inflammation of the membranes of the brain, tending to effusion, stupor, or convulsions, Whytt's disease, internal hydrocephalus **—w.-brake,** *n* A brake formed by injecting a jet of water into a cylinder of a locomotive when the engine is running By this means the engine acts as a brake not now in use **—w-brash,** *n* An affection characterized by a burning sensation in the stomach with eructations of an insipid acid liquid a form of dyspepsia **w-quaimt.—w.-braxy,** *n* *Vet Med* A malignant epizootic disease of sheep characterized by inflammation of the gastro-intestinal tract and hemorrhages into the peritoneal cavity **—w.-break,** *n* **1** [Rare] A little wave ripple **2** Same as WATER-BAR, 1 **—w.-breather,** *n* An animal that breathes water by means of gills **—w.-bridge,** *n* A hollow bridge in a boiler, containing water, and connected with water-space, but admitting the passage of flame above and below Compare FIRE-BRIDGE, MIDFEATHER **—wa'ter-broo",** *n* [Scot] Water-gruel **—w.-brose,** *n* [Scot] Brose or pottage made of water and meal **—w.-buck,** *n* *A large African* antelope of the genus *Kobus*, frequenting the neighborhood of water, especially the *K singsing* or kob of West Africa, the very handsome *K defassa* and *K maria* of the Nile and Equatorial Africa, and the *K lechwe* or lechwe and *K ellipsiprymnus* of South Central Africa These antelopes have coarse, uneatable flesh, but are very handsome, with *long lyrate horns* See illus in preceding column **—w-buckler,** *n* Same as WATER-SHIELD **—w.-budget,** *n* A water-bouget **—w-buffalo,** *n* The Indian buffalo **—w.-bug,** *n* **1.** The croton-bug **2.** An aquatic bug, as a large rapacious belostomid living below the surface of the water, or a gerrid that runs over the surface of pools **—w.-bush,** *n* An Australian timber-tree (*Myoporum viscosum*) **—w.-butt,** *n* **1.** A large open-headed cask or hogshead set up on end, for holding water **2** A dytiscid beetle **3.** *Arch* A receptacle for water, as a lavatory, fountain, or the like **—w-buttercup,** *n* **1.** The marsh-marigold (*Caltha palustris*) **2** Any aquatic plant of the genus *Ranunculus* **—w-calamint,** *n* The corn-mint **—w.-caltrop,** *n* **1.** Same as WATER-CHESTNUT **2.** A pondweed (1) The Water-carrier in the Philippine Islands, showing the bamboo tubes containing the water.

cets, refrigerators, water-coolers, etc — **w.-drop**, *n* A drop of water, poetically, a tear — **w.-dropper**, *n* An electrical apparatus devised by Sir William Thomson, for measuring the atmospheric potential It consists of an insulated tank from which a nozle projects, out of which water drops, each drop carrying off an electrostatic charge till the orifice assumes the potential of the air, which is then measured by an electrometer — **w.-drum**, *n* A boiler-tank which can be filled while the boiler (of the waterfall type) continues working — **w.-dust**, *n* Minute drops of condensed atmospheric vapor, of which the clouds fogs, etc., are composed — **w.-eagle**, *n* The osprey — **w.-elder**, *n* The cranberry-tree — **w.-elephant**, *n* The hippopotamus — **w.-elevator**, *n* 1. Any mechanism for raising water, especially to a considerable height above ground, as a windmill operating a pump 2. An elevator or lift operated by hydraulic power — **w.-elm**, *n* 1. The white elm so called because within certain portions of its limits it is found only in river-bottoms 2. The planer-tree 3. The *Zelkova acuminata* a Japanese tree — **w.-engine**, *n* 1. An engine for lifting water 2. A water-motor — **w.-equivalent**, *n* *Physics* The mass of water whose thermal capacity is equivalent to that of a given mass of another substance — **w.-ermine**, *n* [Eng] A variegated tiger-moth (*Spilosoma urticæ*) — **w.-eryngo**, *n* A button-snakeroot (*Eryngium aquaticum*) — **w.-extractor**, *n* Same as HYDRO-EXTRACTOR — **w.-farming**, *n* Culture of aquatic plants for market — **w.-fennel**, *n* 1. A water-dropwort (*Œnanthe phellandrium*) 2. The vernal water-starwort (*Callitriche palustris*) — **w.-fern**, *n.* 1. The common royal fern (*Osmunda regalis*) with sterile fronds twice pinnate 2. A fern of some other species of the genus *Osmunda* 3. Any plant of the order *Salviniales* — **w.-fight**, *n* [Rare] A naval battle — **w.-figwort**, *n* Water-betony — **w.-finder**, *n* One who finds water by means of a divining-rod a pietonist — **w.-finished**, *a* Denoting a highly glazed paper which is supercalendered while moist — **w.-fire**, *n* A small East-Indian weed (*Bergia ammannioides*) with an acrid juice, growing in wet grounds — **w.-flannel**, *n* A flannel-like mass of the entangled filaments of certain algæ, especially of the genus *Cladophora*, floating on the surface of water — **w.-flaxseed**, *n* The greater duckweed, whose fronds, floating on the water, resemble flaxseed — **w.-flea**, *n* 1. A minute fresh-water cladocerous crustacean that swims with springs or jerks Some, as the common *Daphnia pulex*, become red in summer and impart a red tinge to ponds, etc 2 Some similar small entomostracan, as a cyclops — **w.-float**, *n* A float used to operate a valve in a boiler, tank or the like, by rising and falling with the water in it — **w.-flood**, *n* [Archaic] A flood of water, deluge — **w.-flounder**, *n* [Local, U S] The sand-flounder — **w.-flowing**, *a* [Rare] Flowing, as a stream of water — **w.-fly**, *n* A perlid; stone-fly — **w.-foot**, *n* *Echin* A tube-foot or ambulacral sucker — **w.-fowl**, *n* A bird that lives on or about fresh or salt water used also collectively — **w.-fox**, *n* 1. A carp 2. The yapok — **w.-frame**, *n* A primitive spinning-jenny, first driven by water, an Arkwright jenny — **w.-fright**, *n* Morbid dread of water, hydrophobia — **w.-fringe**, *n* The marsh-flower — **w.-front**, *n* 1. The part of a town fronting on the water, real property abutting on or overlooking a natural body of water 2. That part of a water heating system in front of the fire-box — **w.-fungus**, *n* *Bot* 1. Any fungus of the order *Saprolegniales* 2. Any one of the algal fungi (*Phycomycetes*) — **w.-furrow**, *vt* To drain water from by furrows make drainage-furrows in — **w.-furrow**, *n* A furrow made to lead surface-water away — **w.-gage**, *n* A gage indicating the level of water in a boiler, tank, or reservoir for a boiler, usually an upright glass tube connected with the boiler at both ends so that the water-level in the tube is always the same as that in the boiler **w.-gauget**.— **w.-gall**, *n* 1. A hollow in the earth made by a waterspout or flood, washout **w.-gullt**. 2. A partial rainbow **weath'er-gall"‡**; **wind'-dog"‡**; **wind'-gall"‡** — **w.-gang**, *n* [Scot or Obs] A mill-race — **w.-gap**, *n* See GAP, *n*, 2 — **w.-gas**, *n* See GAS, 2 — **w.-gate**, *n* 1. A gate by which water may be confined or released 2. A gate giving access to a river, fountain, well, etc, as, the *water-gate* of the Tower of London 3. A gate-valve in a water-main 4. [Scot & Prov Eng] A natural way or course for a stream, especially one that dries in summer — **w.-gavel**, *n* Rent paid for fishing, or any river privilege — **w.-germander**, *n* A creeping European marsh-plant See GERMANDER — **w.-gilder**, *n* — **w.-gilding**, *n* Same as WASH-GILDING — **w.-gillyflower**, *n* Same as WATER-FEATHER — **w.-gladiole**, *n* The flowering rush See RUSH — **w.-gland**, *n* *Bot* A gland composed of a small number of cells, destitute of chlorophyl, situated beneath a water-pore and serving to facilitate or regulate the transpiration of water — **w.-glass**, *n* 1. A water-clock, clepsydra 2 A submarine telescope See TELESCOPE 3. Soluble glass See GLASS 4. A water-gage on a steam-boiler, etc — **w.-glass painting**, fresco water-coloring on a surface treated with solutions of potassium water-glass and ferrous silicic acid — **w.-gluet**, *n* Water-proof glue — **w.-god**, *n* *Myth* A deity residing in or presiding over a spring or fountain, or any body of water — **w. gram-degree** (*Physics*), the quantity of heat required to raise one gram of water through one degree between 0° and 4° C — **w.-grampus**, *n* [Local, U S] The heligrammite — **w.-grass**, *n* 1. Any one of various species of *Paspalum*, especially, *P dilatatum*, the large water-grass and *P lentiferum* the smooth water-grass 2. The panic-grass (*Panicum prolitferum*), a tall, rankly-growing plant occurring in wet lands in the southern U S 3. The watercress (*Roripa nasturtium*) 4 The many-flowered marsh-pennywort (*Hydrocotyle umbellata*) 5. [Tasmania] Manna-grass (*Glyceria fluitans*) — **w. grate**, *n* A grate in which tubes connecting with the water in the boiler take the place of solid grate-bars — **w.-gruel**, *n* A gruel made with water instead of milk — **w.-guard**, *n* A policeman or custom-house officer appointed to guard a harbor or water-front — **w.-gum**, *n* A small Australian tree, or, as cultivated for ornament in greenhouses, a tall slender shrub (*Tristania neritifolia*) with opposite leaves, and yellow flowers in a terminal corymb **w.-gum tree**‡ — **w.-gut**, *n* A green-spored alga found in both salt and fresh water, with a bulate tubular frond — **w. hair-grass**, a smooth perennial grass (*Catabrosa aquatica*) with long narrow flat leaves and open panicles, common in wet places in north temperate regions water whorl-grass — **w.-hardened**, *a* In fish-culture, made firm by absorbing water said of eggs — **w.-haul**, *n* In fishing, an empty haul of the net hence, a fruitless attempt — **w.-haze**, *n* A haze of water-dust — **w.-heater**, *n* A heating-apparatus consisting of pipes of circulating hot water — **w.-hemp**, *n* Any one of three different plants, hemp-agrimony, water hemp-agrimony, and Virginian hemp See HEMP — **w.-hen**, *n* 1. A gallinule, especially the European *Gallinula chloropus*, common about ponds and streams 2. The American coot 3 [Austral] Any one of certain species of *Tribonyx* — **w.-hoarhound**, *n* A British herb (*Lycopus europæus*) of the mint family, with white flowers, growing by riversides also, by extension, other species of the genus. **w.-horehound**‡.— **w.-hog**, *n* 1. A capybara 2. A wart-hog — **w.-horse**. [Local, U S] I. *vt* To heap up (salted fish) to drain **II.** *n* A horse-pile — **w. horse-power** [India], the unit of measurement of the power developed by falling water in practise usually considered as 6 of the actual power of the water — **w.-horsetail**, *n* Any plant of the genus *Chara*, a stonewort — **w.-houset**, *n* A ship — **w.-ice**, *n* 1. An ice made with water, sugar, and fruit-juice only, as distinguished from *ice-cream* 2. Ice made from water as distinguished from snow ice — **w.-inch**, *n* *Hydraul* As much water as will flow out during twenty-four hours through a round opening one inch in diamater just below the surface of the water in a reservoir about 500 cubic feet The *water-inch*, commonly known as **miners' inch**, used to measure the rate of flow of a stream and yields 90 cubic feet or 673 2 gallons in one hour's time through a square-inch aperture the upper edge of which is 6 inches below the surface of the water — **w.-indicator**, *n* A water-gage for giving the level of water in a tank or boiler, and automatically sounding an alarm if it falls too low — **w.-injector**, *n* See INJECTOR — **w.-jet** 1. A hydraulic propelling device for vessels 2. A stream of water under pressure, used for removing surface soil or for boring — **w.-joint**, *n* 1. A water-tight joint 2. A drip-joint — **w.-jump**, *n* A waterfall — **w.-junket**, *n* [Prov Eng] The common European sandpiper — **w.-kelpie**, *n* Same as KELPIE — **w.-kibble**, *n* A large iron bucket with a valve in the bottom for self-filling sometimes used in hoisting the water from a mine — **w.-ladet**, *n* A channel for water, drain, gutter — **w.-laid**, *a* 1. Laid back-handed or left-handed said of rope 2. Same as CABLE-LAID said of rope, because that form resists the entrance of water 3. *Geol* Water-deposited — **w.-language**, *n* [Rare] Bantering talk raillery chaff — **w.-laverock**, *n* [Scot] 1. The common European sandpiper 2. The ring-plover — **w.-leadert**, *n* A water-carrier — **w.-leecht**, *n* A horse-leech — **w.-leg**, *n* The leg of a steam-boiler. See LEG, 10 — **w.-lens**, *n* *Physics* A magnifying lens in which water is the refracting medium — **w.-lentil**, *n* The lesser duckweed (*Lemna minor*) — **w.-lizard**, *n* 1. [U S] A lizard-like amphibian, as a newt 2. An aquatic lizard, as a varanid — **w.-lock**, *n* A lock for confining water and raising or lowering its level, as a canal-lock or weir-lock See LOCK‡, *n*, 3 — **w.-locust**, *n* The swamp-locust (*Gleditschia aquatica*) of the southern United States, a smaller species of the honey-locust, with usually simple and slender thorns — **w.-lord**, *n* An owner of river or pond rights — **w.-lot**, *n* 1. A town or city lot contiguous to water, as on a river or harbor 2. A similar lot under water or in a swamp or morass, but mapped out for redemption — **w.-lotus**, *n* The sacred *lotus* — **w.-lung**, *n* A respiratory tree of a holothurian — **w.-lute**, *n* A diaphragm or valve, as in a drain, to permit the flow of water while obstructing the return of air or noxious gas — **w.-main**, *n* A principal pipe for conveying water having lateral service-pipes connected with it — **w.-maize**, *n* The seeds of the Victoria water-lily (*Victoria regia*) used as food in South America — **w.-mantle**, *n* In culture of germs, the water that is kept at a given temperature in the jacket about the incubator, in order to keep the germs at that temperature — **w.-maple**, *n* The red maple, silver maple — **w.-marigold**, *n* An aquatic plant (*Bidens beckii*) with terminal heads of yellow flowers, the immersed leaves crowded, capillary dissected, and the emersed ones lanceolate, slightly connate, and toothed — **w.-meadow**, *n* A meadow periodically overflowed by a stream — **w.-measuret**, *n* A measure formerly used for goods carried in British ships, as coal, oysters, etc, and equal to about 11 imperial gallons — **w.-measurer**, *n* A hydrometrid bug, skater — **w.-meter**, *n* A device for measuring the quantity of water flowing through it as from a main to the pipe of a consumer See PISTON-METER — **w.-milfoil**, *n* Any plant of the genus *Myriophyllum* — **w.-mill**, *n* A mill, as a flour-mill, whose machinery is operated by water-power — **w.-mint**, *n* An Old World mint (*Mentha aquatica*) naturalized in the eastern United States, growing in wet places, resembling peppermint — **w.-mite**, *n* An aquatic hydrachnid mite, having the legs ciliated for swimming, and parasitic when young on aquatic insects and molluscs — **w.-mold**, *n* *Bot* Any plant of the order *Saprolegniales* — **w.-mole**, *n* 1. A desman 2. The duckbill or platypus — **w.-monitor**, *n* A large aquatic varanoid lizard, as *Varanus salvator* of India — **w.-monkey**, *n* Same as MONKEY-JAR — **w.-moth**, *n* 1. A caddis-fly 2. A moth of the genus *Nymphula*, *Hydrocampa*, or *Acentropus*, whose larvæ live in or under water — **w.-motor**, *n* An engine driven by water, as by the action of water in the buckets of a wheel, or under pressure on a piston-head, etc — **w.-mouse**, *n* A beaver-rat — **w.-murrain**, *n* A disease affecting the urine of cattle — **w.-newt**, *n* A triton — **w.-nixy**, *n* A water-sprite kelpie, horse-nymph **w.-nixiet**.— **w.-nymph**, *n* 1. A Naiad 2 *Bot* A naiad, any plant of the genus *Naias*, also, a water-lily 3. A dragon-fly — **w.-oats**, *n pl* Indian rice See RICE — **w. of Ayr**, Ayr stone **w.-of-Ayr stonet**.— **w. of crystallization**, the water that combines with salts when they crystallize It is a definite quantity, and may be accepted as a molecular constituent of the crystalline compound Alums contain 24 molecules of water of crystallization — **w. of life**. 1. In Scripture, that which confers immortality or spiritual invigoration 2. Same as ELIXIR 2 (2) 3. Brandy also whisky — **w. of saturation** (*Geol*), water filling the interstices in rocks — **w. on the brain**, hydrocephalus — **w. on the chest**, hydrothorax.— **w. on the knee** (*Pathol*), an excessive accumulation of serous fluid within the capsule of the knee-joint: from any cause — **w.-opal**, *n* Same as HYALITE — **w.-opossum**, *n* The yapok — **w.-ordeal**, *n* Ordeal by throwing an accused person into the water, to see if he sinks, or by making him plunge his hand into boiling water See ORDEAL — **w.-organ**, *n* A hydraulic organ See ORGAN — **w.-oven**, *n* A drying-oven — **w.-ox**, *n* Same as WATER-BUFFALO — **w.-padda**, *n* A South-African engystomoid toad (*Breviceps gibbosus*) — **w.-pan**, *n* A slough — **w.-pang**, *n* Water-brash, pyrosis — **w.-parsnip**, *n* Any species of *Sium*, a genus of aquatic herbs of the parsley family — **w.-parting**, *n* A watershed — **w.-partridge**, *n* [Local, U S] The ruddy duck — **w.-passage**, *n* A passage for water, as the urethra — **w.-pennywort**, *n* The marsh-pennywort. See MARSH, HYDROCOTYLE — **w.-pepper**, *n* 1. The common smartweed (*Polygonum hydropiper*) 2. An allied species (*P hydropiperoides*) resembling the water-smartweed, but without acrid leaves hence called **mild water-pepper**. 3. A minute British aquatic (*Elatine hydropiper*) waterwort — **w.-pewit**, *n* A bird, the pewit or phœbe — **w.-pheasant**, *n* 1. The pintail duck 2 The European merganser. 3. The hooded merganser 4. The Chinese jacana — **w.-piet**, *n* The dipper or water-ouzel — **w.-pig**, *n* 1. A porpoise 2 The capybara 3. The gourami — **w.-pillar**, *n* 1. An upright pillar or pipe with a revolving or swinging spout, to supply locomotive tanks with water 2‡. A waterspout — **w.-pipit**, *n* A titlark (*Anthus aquaticus*) — **w.-piston**, *n* 1. In a steam-driven water-pump, the piston that acts directly upon the water 2. An air- or gas-pumping system in which a column of water in a cylinder or chamber is alternately raised and lowered to serve as a piston — **w.-pit**‡, *n* A pit containing water — **w.-plane**, *n* 1. *Ship-building* The plane in which a water-line lies, the plane passing through the body of a vessel at the surface of the water 2 *Geol* (1) The upper surface of a bed of water as of ground-water

But a pause in this process would bring the *water-plane* again to a stand W D JOHNSON *Twenty-first Annual Rep U S Geol Survey* pt IV, p 644 ['01]

(2) The level indicating the heights of an ancient expanse of water and generally marked by beaches 3. A hydroaeroplane — **w.-plant**, *n* An aquatic plant — **w.-plate**, *n* A plate with a double bottom for holding hot water used to keep food warm — **w.-platter**, *n* The Victoria water-lily (*Victoria regia*) — **w.-plow**, *n* A machine for excavating mud from river-bottoms, etc — **w.-plug**, *n* A hydrant connected with a water-main from which water is drawn as for flushing the streets Compare FIRE-PLUG — **w.-poa**, *n* The reed meadow-grass (*Glyceria grandis*) now a misnomer, the name having been applied when the grass was included in the genus *Poa* — **w.-pocket**, *n* 1 A depression in a watercourse, or on a mesa or plain, which holds water for a longer or shorter period after a rain 2. [Local, U S] A bowl in rock-structure that has been formed by the action of falling water, especially such a bowl existing behind the waterfall when, in time of flood, the water shoots over it — **Water Poet, the**, pseudonym of John Taylor — **w.-poise**, *n* A hydrometer — **w.-poppy**, *n* Same as HYDROCLEYS — **w.-pore**, *n* 1. *Bot* An aperture in the epidermis of the leaves of certain plants directly over the extremity of a vein, devoted at certain times to the transpiration of water Such pores resemble ordinary stomata except that they have no guardian-cells 2. *Zool* The orifice of the water-tubes in certain invertebrates — **w.-port**, *n* An opening for the passage of water, as in a water-motor — **w.-post**, *n* A post to which is attached a pressure-gage, for convenient observation of the pressure in the main below, with which it is connected — **w.-pouch**, *n* *Zool* The water-reservoir in the stomach of a camel — **w.-pouket**, *n* A pimple — **w.-pox**, *n* Same as VARICELLA — **w.-prairies**, *n pl* The playas of New Mexico, vast inland plains covered with a nitrous incrustation or efflorescence, known as *tesquite*, which gives them the appearance of large motionless lakes — **w.-press**, *n* A hydrostatic press — **w.-prick**, *n* In tanning, a blemish on the grain surface of skins caused by excessive water-soaking — **w.-prism**, *n* The body of a canal or river considered as a prism and measured from a cross-section — **w.-privilege**, *n* 1. The right to the use of the water of a certain stream 2. The right to the possession and use of a fall of water for mechanical purposes — **w.-propeller**, *n* A rotary pump — **w.-pump**, *n* A pump for water applied humorously to the eyes — **w.-puppy**, *n* A large salamander mud-puppy — **w.-purple**, *n* [Scot] The beccabunga — **w. pyet**, *n* Same as WATER-PIET — **w.-quake**‡, *n* A violent agitation of water the correlative of *earthquake* — **w.-quale**, *n* Pyrosis See WATER-BRASH — **w.-quenched**, *a* Cooled with water as steel in tempering — **w.-quintain**, *n* A tilt at the quintain by a person in a boat — **w. rabbit**, *n* A water-hare — **w.-radish**, *n* A European herb (*Nasturtium amphibium*), with pinnatifid leaves and yellow flowers, growing in wet places — **w.-rail**, *n* 1. A rail of the genus *Rallus*, especially the Old World *R aquaticus*, frequenting swamps and the neighborhood of water 2. [Local, Eng] The water-hen — **w.-ram**, *n* A hydraulic ram — **w.-ranny**, *n* [Eng] 1. A water-shrew 2 The water-vole — **w.-rat**, *n* 1. An aquatic muroid rodent Specif (1) The European water-vole (2) The American muskrat (3) [Austral] A beaver-rat 2 The beaver 3. [Cant or Slang] A water-front thief or tough — **w.-rate**, *n* A rate or tax for a water-privilege **w.-rentt**.— **w.-rattler**, *n* [Local, U S] The diamond rattlesnake usually found near water **w.-rattlet** — **w.-reed**, *n* Any grass of either of the genera *Arundo* and *Phragmites* — **water-reg**, *n* [S Afr D] The right to direct a fixed quantity of water from the main supply to irrigate adjoining private lands.— **w.-ret**, *vt* Same as WATER-ROT — **w.-retriever**, *n* A dog bred and trained to retrieve game-birds from the water — **w.-rice**, *n* A perennial grass (*Zizania aquatica*), of Asia and North America, whose seeds furnished food for the Indians Indian rice — **w.-right**, *n* *Law* The right to the use of water either from a certain source or in specified quantity, especially, such right contracted for the sake of irrigation uses Compare RIPARIAN RIGHTS — **w.-robin**, *n* A flycatcher (*Xanthopygia fulginosa*) of the Himalayas and eastward — **w.-rocket**, *n* 1. An Old World plant (*Stsymbrium sylvestre*) allied to the hedge-mustard 2. wa'ter-speed"well, 1 wō'tər-spid'wel, 2 wa'ter-spēd'wĕl, *n* A fleshy speedwell (*Veronica anagallis*)

wa'ter-spi"der, 1 wō'tər-spai'dər, 2 wa'ter-spī'der, *n* **1.** A spider that lives or seeks its prey about or in the water (1) A drassid, the diving spider (*Argyroneta aquatica*), that lives under water in a web shaped like a diving-bell with the mouth downward It fills this structure with air carried down in the form of bubbles attached one at a time on the legs and spinnerets (2) One of various lycosids, especially of the genus *Dolomedes*, as the large American raft-spider (*D lanceolatus*) **2.** A water-mite

wa'ter-spout", 1 wō'tər-spaut', 2 wa'ter-spout', *n* **1.** A moving column of spray and mist, with considerable masses of water in the lower parts, due to a whirlwind over the water at sea See illus in next col
The whirl that makes a *water-spout* must have sufficient velocity to form a vacuum at its center
J D STEELE *Physics* p 219 [CHAUT]

A whirling funnel-shaped cloud, first observed as a pendant from the mass of storm-cloud above, seems to grow downwards, tapering towards the water-surface which is violently agitated, and finally (when the spout is fully developed) appears to be drawn up to meet the cloud from above This appearance is deceptive, as the bulk of the water carried along by the whirling spout is condensed from the atmosphere, and, even when the spout is formed over a salt-water surface, is found to be fresh *Waterspouts* occur most frequently over the warm seas of the tropics, but they are not confined to the warmer tropical seasons, or even to low latitudes *Encyc Brit* 11th ed , vol XXVIII, p 396

ELIZABETH W BELLAMY in *Atlantic Monthly* Mar, 1893, p 316

3. To bind together or finish with wattles, as, a *wattled* palisade **4.** [Prov Eng] To beat, flog

wat'tle, *a* Formed of wattles or by wattling

wat'tle, *n* **1.** A frame of rods or twigs woven together, a hurdle, or other wickerwork, as, a *wattle* of bamboos **2.** A twig, especially as used for interweaving with others, rod, also, collectively, material for fences, etc **3.** *Ornith* A naked, fleshy process depending from the head or neck of a bird See illus under FOWL **4.** A barbel of a fish **5.** A pendent fold of skin on the throat or neck of some domestic swine **6.** *Bot* Any one of various acacias of Australia, Tasmania, and South Africa valued for their bark, wood, or gum so called by the colonists **The black, feathery, or green wattle** (*Acacia decurrens*) of southeastern Australia is perhaps the most important, its wood being valuable for turners' work and for fuel, its bark very rich in tannin, and its gum very much like gum arabic Other wattles are the **African w.,** a South-African tree (*Acacia natalitia*), the **golden or broad-leaved w.** (*Acacia pycnantha*) of Victoria, next in importance to the black wattle, the **prickly w.** (*Acacia sentis*), the prickly mimosa, and the **silver w.,** any of several acacia-trees having gray or silvery foliage, especially *A dealbata* and *A podalyrafolia*

7. *pl* Rods for supporting thatch on a roof [< AS. *watel*, hurdle]

— **wat'tle-and-daub',** *n* Wicker work daubed with mud or mortar — **wat'tle-bark",** *n* The bark of any wattle used in tanning — **w.-bird,** *n* **1.** A honey-eater of *Anthochæra* or a related genus, having conspicuous wattles about the head and face, as the Australian *Anthochæra carunculata*

Wattle-crow

warty-faced honey-eater†; wattled bee-eater, starling, or **crow†. 2** A wattle-crow **3.** A wattle-turkey — **w.-crow,** *n* An Australian glaucopine tree-crow, especially, *Glaucopis cinereus*, of the South Island of New Zealand, gray, with a black face and orange wattles depending from the commissures **cinereous wattle-bird†** — **w.-faced†,** *a* Having a long, thin face — **w. gum,** *n* Gum from any one of several Australian wattles, especially the black wattle — **w.-jaws†,** *n pl* Long, lanky jaws — **w.-tree,** *n* Same as WATTLE, 6 — **w.-turkey,** *n* The brush-turkey — **wat'tle-work",** *n* Wickerwork

wat'tled, 1 wot'ld, 2 wąt'ld, *a* **1.** Made with wattles **2.** Having a wattle, as a bird **3** *Her* Having wattles, comb, or gills, of a tincture different from the body

Still bore the family arms, and had for his crest a cock argent, Combed and *wattled* gules and all the rest of the blazon
LONGFELLOW *Miles Standish* div III, st 7

— **wattled bird of paradise,** an iridescent black paradise-bird (*Paradigalla carunculata*) having two pendent richly colored wattles on each side of the face — **w. crow,** a wattle-crow — **w. plover,** a spur-winged plover of the genus *Lobivanellus* especially, *L lobatus*, of eastern Australia **w lapwing†**

watt'less, 1 wet'les, 2 wąt'lĕs, *a* *Elec* Denoting a non-power-producing alternating current See REACTIVE CURRENT — **wattless component,** the non-power-producing component of an electromotive force, distinguished from *energy component* — **w volt-amperes,** the product of the wattless component of current or voltage, by the voltage or current respectively **wattless watts†**

wat'tling, 1 wot'lıng, 2 wąt'ling, *n* The act or practise of interweaving twigs, a framework thus made **wat'ling†.**

watt'me"ter, 1 wet'mī'ter, 2 wąt'mē'ter, *n* *Elec* **1.** An instrument for measuring the rate of doing electrical work in watts usually a galvanometer that measures both difference of potential and quantity of current, composed of a suspended and a fixed coil of insulated wire, one fine and the other coarse, disposed at right angles and acting on each other **integrating watt-meter†. 2** A watt-hour meter erroneous use

Wat"tre-los', 1 vä tr-lô', 2 va'tr-lô', *n* A town in Nord department, France

Watts, 1 wets, 2 wats, *n* **1. Alaric Alexander** (2/12 1797–1/8 1864), an English poet and journalist **2 George Frederick** (2/24 1817–7/1 1904), an English painter and sculptor **3 Henry** (1/24 1815–6/29 1884), an English chemist, *Dictionary of Chemistry* **4 Isaac** (7/12 1674–11/24 1748), an English divine and hymn-writer

wau-been', 1 wô-bin', 2 wą-bēn' *n* [Trinidad] A characinoid fish (*Erythrinus unitæniatus*)

wau'ble, *v & n* [Scot] Same as WABBLE¹ **wauch'le†**

wauch, 1 wôh, 2 wąh, *a* [Prov Eng] **1.** Tasteless, nauseous, clammy **2** Faint, languid **waught†.**

wauch'ot, 1 wôh'ot, 2 wąh'ot, *n* The rock-hopper (*Eudyptes chrysocome*) of the Falkland Islands

waucht, 1 wôht, 2 wąht [Prov Eng] **I** *vt & ı* To drink, quaff **II** *n* A draft **waught†.**

wauff, 1 wôf, 2 wąf, *a* Waff, worthless

waugh, 1 wûf, 2 waf, *ı* Same as WAFF²

Waugh, 1 wô, 2 wa, **Edwin** (1/12 1817–4/30 1890) An English printer, poet, and miscellaneous writer, *Lancashire Sketches*

wauk, 1 wôk, 2 wąk, *v* [Scot] To full cloth

wau'ke, 1 wau'kĕ, 2 wou'kę, *n* [Hawaii] The paper-mulberry See TAPA¹ **ka-wau'ke†**

Wau-ke'gan, 1 wô-kî'gon, 2 wą-kē'gan, *n* A city, county-seat of Lake county, Ill **[II.** *a* Awake

wauk'en, 1 wôk'en, 2 wąk'ĕn [Scot] **I.** *v* To awake

Wau'ke-sha, 1 wô'ki-shô, 2 wą'ke-shą, *n* **1.** A county in S E Wisconsin 562 sq m **2** Its county-seat, seat of Carroll College (Presbyterian), founded in 1846

wauk'ing, 1 wôk'ın, 2 wąk'ing, *v* [Scot] Waking, watching,

wauk'it, 1 wôk'it, 2 wąk'it, *a* [Scot] Hardened, horny

Wau-kon', 1 wô-kon', 2 wą-kŏn', *n* A town, county-seat of Allamakee county, Ia

wauk'rife, 1 wôk'roif, 2 wąk'rif, *a* Same as WAKERIFE

waul, 1 wôl, 2 wąl, *vt* To give a prolonged plaintive cry

wawl, *ı* like that of a cat [Freq of WAW¹, *v*]

waul, *n* A plaintive howl

Wau-pa'ca, 1 wô-pâ'kə, 2 wą-pa'ca, *n* **1** A county in E central Wisconsin, 749 sq m **2** Its county-seat

Wau-pun', 1 wô-pun', 2 wą-pŭn', *n* A city in Dodge and Fond du Lac counties, Wis

waur, 1 wôr, 2 wąr, *vt* [Scot] To overcome in contest, worst

waur, *a* [Scot] Worse

Wau'sau, 1 wô'sô, 2 wą'są, *n* A city, county-seat of Marathon county, Wis [seat of Fulton county, O

Wau'se-on, 1 wô'si-on, 2 wą'se-ŏn, *n* A village county-

Wau-sha'ra, 1 wô-shâ'rə, 2 wą-shà'ra, *n* A county in E central Wisconsin, 639 sq m, county-seat, Waukoma

Wau'ters, 1 wou'tərs, 2 wou'ters, **Emil** (1/12 1846–) A Belgian painter, *Cairo and the Banks of the Nile*

Wau"wa-to'sa, 1 wô"wə-tô'sə, 2 wą"wa-tô'sa, *n* A city in Milwaukee county, Wis

wau'-wau", *n* Same as WOW-WOW

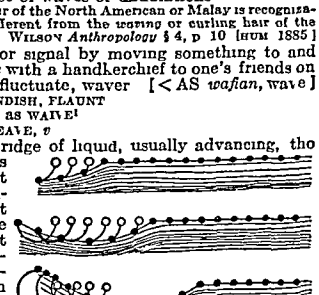
wave¹, 1 wêv, 2 wāv, *v* [WAVED, WAV'ING] **I** *t* **1.** To cause to move to and fro in the air, especially with a sinuous motion, as something flexible, brandish or flourish with a sweeping motion, also, to cause to rock or sway, as, the trees *wave* their branches

Nay, lady, sit, if I but *wave* this wand,
Your nerves are all chain'd up in alabaster
MILTON *Comus* l 659

2. To form with an undulating surface, edge, or outline, hence, to embellish with a wave-like pattern, as, a dagger with a *waved* blade, a picture with a *waved* border. **3.** To signal or signify by a movement of the hand, flag, or any other object, to and fro, also, to give a signal or command to with a sweeping gesture or motion of a flag, etc, as, to *wave* a farewell **4** To form with an undulating surface-pattern, water, as silk **5.** To offer as a wave-offering See WAVE-OFFERING, under WAVE, *n* **6†.** To waft

II. *ı* **1.** To sway to and fro with a sweeping motion, move in waves or undulations, as a flag **2.** To have a form or direction varied with continuous alternating curves like those of waves or undulations

The straight hair of the North American or Malay is recognizable at once as different from the *waving* or curling hair of the European D WILSON *Anthropology* § 4, p 10 [HUM 1885]



3. To beckon or signal by moving something to and fro, as, to *wave* with a handkerchief to one's friends on shore **4†.** To fluctuate, waver [< AS *wafian*, wave]

Syn.: see BRANDISH, FLAUNT

wave²†, *vt* Same as WAIVE¹

wave³†, *imp* of WEAVE, *v*

wave, *n* **1.** A ridge of liquid, usually advancing, the particles that compose it either do not advance with it at all or not at the same rate, but have a movement of oscillation, usually in a closed curve, especially, a large ridge of this kind where the oscillatory force is gravity, as opposed to a *ripple*, where it is surface-tension Ocean-waves are caused chiefly by the wind On reaching shallow water the lower part is retarded by friction, and the crest curls over and breaks into foam Waves thus breaking on coasts have been potent agents in erosion through geologic history

A Wave in Water, showing motion of particles

The figures show the wave in four successive stages of its motion from left to right The black dots show actual positions of particles the light dots the positions of rest from which they started Each particle on the surface describes a circle clockwise, as the wave progresses, as shown in the diagram, but the particles do not progress with the wave

When *waves* start in deep sea they are often thirty or forty feet in height and have a width of a thousand feet or more
N S SHALER in *The Chautauquan* Feb, 1890, p 548

2. *Physics* A disturbance of the equilibrium of a body or medium, which is propagated from point to point with a continuous motion, each particle only vibrating on each side of its position of equilibrium, while each phase of vibration moves onward, by extension, a stationary vibration (see STATIONARY) applied also to disturbances of electrical equilibrium, etc, similarly propagated

The most important waves are (1) those on the free surface of a liquid (see def 1), where the force of oscillation is either gravity or surface-tension the particles generally moving in curves whose plane contains the direction of propagation of the wave, and the resulting form being a series of alternate ridges and troughs, and (2) those that travel through the body of an elastic medium, where the force is that of elasticity, including (*a*) waves where the particles oscillate in the same direction as the motion of the wave, the resulting form being a series of condensations and rarefactions as in the case of sound (see SOUND-WAVE), and (*b*) waves where the particles oscillate at right angles to the direction of propagation, the resulting form being a more or less complex distortion in the substance of the me-

dium, as in the case of electric waves or light-waves in the ether The character of a wave is completely determined by its length, amplitude, and form, upon which depend respectively, in the case of sound, the pitch of the sound, its intensity, and its quality (timbre) These three characteristics refer respectively to the frequency, the amplitude, and the complexity of the vibration of the body emitting the wave The velocity of a wave in the body of a medium depends on the elasticity and density of the medium

3. One of the rising curves on an undulatory edge or surface, one of the curves in any series of curves, as, the *wares* upon a furrowed field **4.** Something that comes, like a wave, with a great volume or power; a flood, a period of marked activity or excitement, as, a *wave* of enthusiasm a *wave* of energy, a *wave* of troops in assault.

Armies of Tatar race, Huns and Turks poured into Europe in their turn, subduing the Aryan peoples, so that now the Hungarian and Turkish languages remain records of these last *waves* of invasion from Central Asia.
E B. TYLOR *Anthropology* p 162 [A. 1889]

5. A wave-like stripe or streak of luster, as on calendered silk, etc **6.** [Poet] A body of water, the sea, also, water in general **7.** The act of waving, a sweeping motion, as with a flag or with the hand, to and fro or up and down done as a signal or as a gesture **8.** *Meteor* A progressive change in temperature or in barometrical condition passing over a large extent of country or of the earth's surface applied when the change is rather gradual than violent **9.** One of various small light-colored geometrid moths of *Acidalia* or a related genus **10.** A defect in glass consisting of a small ridge, due to irregular cooling **11.** *Math* Any one of a number of similar possible divisions of a summation *Syn.*: billow, breaker, ripple, surge, swell, undulation, vibration

—cold wave (*Meteor*), a moving area of low temperature, usually following a barometric depression, and in the United States regarded as caused chiefly by cold air drawn in toward a receding cyclonic vortex from northern regions — **compressional w.** (*Physics*), a wave produced in water by an explosion beneath its surface, because of the resistance offered by water to compression — **gravitational w.** (*Physics*), a wave on the free surface of water caused by the gravitation of the disturbed mass to its level — **hot or warm w.** (*Meteor*), a great rise of temperature extending over a large area — **Marconi or Hertzian waves,** electric waves — **type of a w,** the relation between the position of a set of particles as disturbed and that which they have at any given point of wave-motion — **wave'ac"tion,** *n Gun* The action of a very heavy charge in producing pressure on a gun — **w.-breast,** *n* The breast of an animal presented as a wave-offering — **w.-chute,** *n Wireless Teleg* An extensive wire netting, connected to the earth-plate at the base of the aerial and spread over any buildings which may be in its neighborhood, to facilitate the passage of Hertzian waves — **w.-cloud,** *n Meteor* A cloud consisting of parallel bands or ridges, separated by strips of clear sky, due to air-waves occurring at the bounding plane between two strata of the atmosphere — **w.-crest,** *n* The highest point of a water-wave, by extension, a point in any wave where the particles have reached the extremity of an excursion — **w.-front,** *n* A line or surface containing all the points in a wave where the particles are in the same phase of vibration at a definite instant — **w.-goose,** *n* [Local, Eng] The brant-goose — **w.-indicator,** *n Elec* An apparatus for determining the form of wave in alternating currents See OSCILLOGRAPH **w.-meter‡.— w.-length,** *n* The distance between corresponding points in two adjacent waves, as between two adjacent wave-crests depending on the frequency of oscillation of the particles and the velocity of the wave — **w.-line,** *n* **1.** *Geol* The faint outline left by a wave or wavelet where it dies out on a beach **2.** *Ship-building* The hull-line of a vessel shaped in accordance with the **w.-line system,** in which the hull-line is modeled upon the shape of a wave — **w.-loaf,** *n* A loaf presented as a wave-offering — **w.-molding,** *n Arch* A molding of wavy form or outline See CYMA — **w.-moth,** *n* Same as WAVE, 9 — **w.-motion,** *n* A combination of motions of the kind resulting in a wave — **w.-motor,** *n* A mechanism designed to generate mechanical power by means of waves of water — **w. of contraction,** muscular contraction visibly passing on along the length of a muscle — **w.-offering,** *n* Any one of certain offerings of the Jewish service which were presented with a horizontal waving movement of the hands — **w. of translation,** a wave which causes a greater or less lateral change of position in the particles of the liquid moved a wave in which a mass of water is moved bodily onward called also **solitary wave,** because it does not propagate other waves but subsides or breaks — **w.-path,** *n* The line along which wave-motion is propagated — **w.-sheaf,** *n* A sheaf presented as a wave-offering — **w.-shell,** *n* Part of a spherical wave included between two concentric wave-fronts said especially of an earthquake-wave propagated in all directions from a subterranean center — **w.-surface,** *n* A surface that coincides with an advancing wave-front, as a spherical surface in a wave propagated outward from a center in an isotropic medium, especially, such a surface in the interior of a crystal, as an ellipsoid in a uniaxial crystal (**Huygens's w.-surface**), and, in a biaxial crystal, a mathematical surface of the fourth order (**Fresnel's w.-surface**) — **w. theory of light,** see UNDULATORY THEORY under LIGHT *n*, 1 (2) — **w.-train,** *n Physics* A number of waves sent out at regular intervals from a vibrating body — **w.-trap,** *n* An inward widening of spaces between wharves or piers to allow incoming waves to spread and subside — **w.-trough,** *n* The space or hollow between two wave-crests — **w.-wheel,** *n* Same as WAVED WHEEL See WHEEL — **w.-worn,** *a* Worn by the waves, as, *wave-worn* rocks

waved, 1 wēvd, 2 wāvd, *a* **1.** Having waves, wavy in form, direction, or coloration, undulated, sinuous, as, *waved* silk, the *waved* or flamboyant blade of the Malay creese **2.** *Her* Wavy, undé **3.** *Bot* Same as UNDULATE — **waved sword** (*Her*), a flamboyant sword

wave'less, 1 wēv'les, 2 wāv'lĕs, *a* Having no waves, undisturbed by waves, tranquil, still

wave'let, 1 wēv'let, 2 wāv'lĕt, *n* A little wave, a ripple [wave

wave'-like", 1 wēv'-laik", 2 wāv'-lik", *a* Resembling a

wa'vel-lite, 1 wē'vel-ait, 2 wā'vĕl-īt, *n Mineral* A vitreous, white, green, yellow, or brown, translucent, hydrous aluminum phosphate ($H_{12}Al_6P_4O_{21}$), crystallizing in the orthorhombic system [< Dr Wm *Wavell*, of England, its discoverer]

wa'ver, 1 wē'vər, 2 wā'vĕr, *v* **I.** *t* [Archaic] **1.** To delay or defer from lack of decision, treat irresolutely **2.** To move back and forth in the air, as a flag, wave, cause any form of wavy motion in

II. *i* **1.** To move one way and the other, play or move to and fro or here and there, hence, to be in an uncertain or undecided state, show irresolution, fluctuate, vacillate **2.** To show signs of falling back, failing, or giving way, reel, falter

And the foeman surged, and *waver'd* and reel'd
TENNYSON *Charge of the Heavy Brigade* st 4

3. To move with wavy motion; flicker, gleam, quiver **4.** [Archaic] To sway to and fro, float about, flutter [Freq of WAVE¹, *v*, cp AS *wæfre*, wavering] *Syn:* see *FLUCTUATE, QUAKE* Compare *FICKLE* — **wa'ver-er,** *n* One who wavers, especially, a vacillating person — **wa'ver-ing-ly,** *adv* **1.** In a manner showing indecision **2.** In a fluttering or swaying manner — **wa'ver-ing-ness,** *n*

wav'er¹, 1 wēv'ər, 2 wāv'er, *n* One who or that which waves [wood **2.** A gentle wind.

wav'er², *n* [Prov Eng] **1.** A sapling standing in a felled

wa'verd, *pp* Wavered S S

wa'ver-drag"on, *n Her* Same as WIVERN

Wa'ver-ley, 1 wē'vər-li, 2 wā'vər-ly, **Edward.** The hero of Scott's novel *Waverley*, who resigns his commission in the English army to attach himself to the Young Pretender, receives the royal pardon, and, after marrying Rose Bradwardine, settles down in Waverley Honour

Wa'ver-ley Nov'els. A series of historical novels by Sir Walter Scott from the first book of the series, published in 1814

Wa'ver-ly, *n* **1.** A township and city in Morgan county, Ill **2.** A township and city of identical area county-seat of Bremer county, Ia **3** A village in Tioga county, N Y. **4.** A village county-seat of Pike county O

wax¹, 1 waks, 2 wăks, *v* **I.** *t* To coat with wax, treat with wax or apply wax to for any purpose, as, to *wax* a floor

Old furniture was *waxed* till it shone like a mirror
MARGARET J PRESTON *Aunt Dorothy* p 72 [BAN & S]

II. *i* [Prov Eng] To plaster with clay

wax², *vi* **1.** To become larger gradually, increase in size or numbers, grow

God bade us for to *wax* and multiply
CHAUCER *C T Wife of Bath's Prologue* l 28

2. To assume by degrees a specified state or condition, become, as, to *wax* angry, to *wax* old [< AS *weaxan*, wax] **wext; wexe‡.**

wax³, *vi* [Colloq] To beat thoroughly gain a decisive victory over, as, *we will wax them*

wax, *n* **1.** A yellow fatty solid of animal origin, excreted by bees from the abdominal rings beeswax. It has a honey-like odor and a balsamic taste, becomes plastic with the heat of the hand, has a specific gravity of 0 951 to 0 960 at 25° C, and a melting-point of 62° to 64° C is insoluble in water, but is almost completely dissolved by boiling alcohol Its principal components are cerotic acid ($C_{27}H_{54}O_2$) and myricil palmitate ($C_{30}H_{61}C_{16}H_{31}O_2$) In its crude or honey comb form it is known as **yellow wax. White wax** is prepared from yellow wax by rolling the latter into strips of thin buff, moistening, and leaving it to the action of air and light The principal uses of beeswax are for modeling, making candles, pharmaceuticals, and surgical dressings

2 Any of several substances of wax-like appearance and consistency Specif (1) *Chem* Any wax-forming ester

The *waxes* are distinguished from the fats in that they consist of esters of monohydric alcohols with high molecular weight, whereas the fats are the esters of the trihydric alcohol glycerol. Spermaceti belongs to the wax variety
RICHTER *Organic Chemistry* vol 1, p 257 [P B & CO '08]

For I can *weather* the roughest gale That ever wind did blow
LONGFELLOW *The Wreck of the Hesperus* st 8

2. To expose to the action of the weather, leave in the open air to dry, season, as, the corn is *weathered* in the field 3 *Geol* Specif, to discolor, crumble, or otherwise change by means of atmospheric action

Look at our feet the naked rock lies cracked and *weathered* by the frosts WINCHELL *Walks and Talks* p 108 [CHAUT 1886]

4. *Naut* To go to the windward of, pass by or through, notwithstanding weather conditions, as, to *weather* the cape 5. To slope (an exposed surface) so that water may not collect on (it), as, to *weather* a roof

II. ı 1. To undergo changes attendant on exposure in the atmosphere, as, the gneiss *weathered* into ridges 2. To resist the effects of weather, as, cedar boards *weather* better than pine [< AS *wederian*, < *weder*, weather] — **to weather a point,** to gain an advantage in a contest — **to w. hawks,** to tether hawks unhooded in the *open air* — **to w. out,** *to overcome (a difficulty or a danger)*

weath'er, *a* *Naut* Facing the wind, windward, as, the *weather* bow, *weather* leech opposed to *lee* — **weather tide,** a tide setting to windward — **w. wheel,** see LEE WHEEL, under LEE

weath'er, *n* 1. The general condition of the atmosphere of a place at a given time, as regards its temperature, moisture, winds, clouds, etc, especially, the state of the sky as regards clouds and rain, See plate at SIGNAL 2. Atmospheric conditions or changes in general, figuratively, *vicissitudes of fortune* usually plural

Their work in the open air, under all *weathers*, is calculated to make them [husbandmen] hardy
BROUGHAM *British Constitution* p 380 [o n & co 1861]

3 Any or all of the common phenomena of wind, rain, dampness, cold, heat, or storm, as, to keep out the *weather* 4. The inclination of a windmill's sails to the plane of revolution [< AS *weder*, weather]

— **angle of weather,** the inclination at which the sails of a windmill are set — **clerk of the w.** 1. [Humorous] The chief of the Weather Bureau, or one of its forecasters 2. The conditions collectively that determine the weather a personification — **foul w.,** wet, windy, or unfavorable weather — **merry w,** a time of mirth or jollity — **stress of w,** the force of storm or wind as compelling an action or inaction, or as endured — **to make bad w** (*Naut*), to roll or pitch violently in a storm said of a vessel — **to make fair w.,** to conciliate flatter or cajole — **to make good w.** (*Naut*), to act well in a gale said of a vessel — **under the w,** depressed by unpleasant weather, hence, indisposed from any cause, somewhat ill — **weath'er-an"chor,** *n* The anchor by which a vessel rides when moored, as distinguished from the *lee-anchor* — **w.-back,** *n* Any protective sheathing or covering applied to the back or inner face of a wall to keep out dampness and wind — **w.-beaten,** *a* Bearing the effects of exposure to weather, seasoned, as, a *weather-beaten* seaman — **w.-bit** or **-bitten,** *a* Worn or marred by frost or other inclement weather — **w.-bitt,** *vt* To take a double turn of (a cable) around the bitt-head, double-bitt — **w.-bitt,** *n* A second turn of a cable around the bitt-head — **w.-bleak,** *n* [Prov Eng] The bittern, twire-snipe **w.-bleater†** — **w.-blown,** *a* Beaten or stained by weather — **w.-bound,** *a* Detained *by unfavorable weather* — **w.-bow,** *n* *The windward side* of a vessel's bow — **w.-box,** *n* A toy hygroscope operated by a string easily affected by dampness or dryness When the weather is dry the figure of a woman is drawn out of one side of a toy house, and when it is damp the figure of a man is drawn from the other side — **w.-break,** *n* [So U S] A windbreak — **w.-breeder,** *n* A bright day such as frequently precedes a storm — **W. Bureau,** a bureau of the Department of Agriculture in Washington, established under act of Congress of Oct 1, 1890, for meteorological observation the diffusion of meteorological information, the display of storm- and flood-signals, etc — **w.-card,** *n* A combination of observations from different sides of a large number of storms, in order to show the general conditions of rainfall, wind etc — **w.-case,** *n* A meteorologists case of instruments properly, a frame containing an aneroid and a psychrometer — **w.-cast,** *n* A weather-forecast — **w.-caster,** *n* One who predicts weather-changes — **w.-chart,** *n* Any chart of the earth or of a portion of the earth containing lines or figures showing the distribution of pressure, temperature, moisture, wind, rain, clouds, or other elements of the weather — **w.-cloth,** *n* *Naut* A tarpaulin used to protect boats, hammocks etc, or to shelter persons from the weather — **w.-contact,** *n* *Teleg* A leakage of electricity due to dampness of the weather — **w.-cross,** *n* *Teleg* An electrical leak from one wire to another, due to wet weather and defective insulation — **w.-deck,** *n* *Naut* A deck *open to the weather, as the boat-deck of most ships* — **w.-dog,** *n* [Prov Eng] A broken rainbow, or a fragment of a rainbow popularly regarded as a sign of rain — **w.-door,** *n* A door for regulating ventilation in a mine, trap-door — **w.-driven,** *a* Driven by storm — **w.-eye,** *n* Observation of the weather chiefly in the phrase **to keep one's weather-eye open** (to keep one s wits about one, be alert and cautious) — **w.-fast,** *a* Weather-bound — **w.-fend,** *vt* To shelter from the weather — **w.-fish,** *n* The misgurn loach (*Misgurnus fossilis*) — **w.-flag,** *n* A flag displayed as a weather-signal — **w.-forecast,** *n* A forecast of the probable weather for a few days now made chiefly by a study of the meteorological conditions and their changes over a large area Attempts have been made in India to forecast the probability of rainfalls and drought for a longer period, as several months, but in the United States forecasts are officially made for periods of 24, 36, or 48 hours — **w.-gage,** *n* *Naut* The advantage of receiving the wind first, a position to the windward, hence, figuratively, any advantage gained, the upper hand — **w.-gleam,** *n* [Prov Eng] A bright aspect of the sky at the horizon — **w.-hardened,** *a* Made hard or hardy by exposure to sun and air — **w.-head,** *n* [Prov Eng] *Meteor* A secondary bow See RAINBOW, *n*, 1 — **w.-house,** *n* A weather-box — **w.-indicator,** *n* A barometer or other similar instrument that renders assistance in predicting the weather See WEATHER-CASE — **w.-lights,** *n pl* Silent displays of atmospheric electricity mentioned by Tyndall as visible in the Alps when distant thunder-storms occur on the plains below, auroral lights — **w.-map,** *n* Same as WEATHER-CHART — **w.-molding,** *n* *Arch* A projection or hood over a door, window, or other wall-opening, devised to turn water, as a dripstone — **w.-notation,** *n* A system of abbreviations used in meteorological charts and tables — **w.-parting,** *n* A valley, range of hills, watercourse, or other topographic feature, assumed to deflect the course of local storms or other meteorological phenomena analogous, on a small scale, to the CLIMATIC DIVIDE (which see) — **w.-period,** *n* Any period or cycle occurring in the weather of a locality — **w.-plant,** *n* A plant supposed to indicate approaching changes in the weather, as the pimpernel (see under WEATHER-GLASS) and the Indian licorice — **w.-proof,** *a* Capable of withstanding rough weather — **w.-report,** *n* A report which a weather bureau publishes daily about the weather and its probable changes — **w.-roll,** *n* The lurch of a vessel to windward when in the trough of the sea — **w.-rope,** *n* Rope made impervious to water, as by tarring — **w.-service,** *n* A branch of government *that performs the duties of a weather bureau* — **w.-sharp,** *n* [Colloq] A person who is weather-wise, an expert forecaster of weather — **w.-shooting,** *n* Bombardment of the clouds for the purpose of preventing hail, producing rain, etc — **w.-sign,** *n* Whatever presages or is supposed to presage a change of weather hence any sign — **w.-spy,** *n* [Rare] A weather-prophet — **w.-stain,** *n* Discoloration from exposure to the atmosphere — **w.-stained,** *a* — **w.-station,** *n* A place or office where meteorological observations are taken and recorded for publication or for transmission to a central bureau Such stations are of **first order** when observations are made hourly, or when supplied with self-registering instruments, of **second order,** when all the more important observations *are taken of third order, when average rainfall and mean* temperature only are recorded — **w.-stone,** *n* A stone the color of which changes prior to rain — **w.-strip,** *n* A narrow strip, as of wood edged with rubber, prepared to be placed over crevices as at doors and windows, to exclude wind, rain, etc — **w.-strip,** *vt* — **w.-table,** *n* Same as WATER-TABLE, 1 — **w.-telegraph,** *n* A combination of barometer and polymeter, widely used in Germany a trade name — **w.-telegraphy,** *n* The application of telegraphy to meteorological purposes a distinct branch of telegraphy embracing special codes systems, etc — **w.-tile,** *n* A tile used instead of weather-boarding — **w.-tint,** *n* A coloration caused by weathering — **w.-type,** *n* *Meteor* Any one of several typical arrangements of the areas of high and low pressure over a region, with the attendant weather, as seen on a weather-map and used in weather-forecasting — **w.-vane,** *n* See VANE, 1 — **w.-waft,** *a* [Rare] Borne along by the wind — **w.-wind†,** *n* The greater bindweed — **w.-wise,** *a* Experienced in making predictions as to coming weather — **w.-wisdom,** *n* — **w.-work,** *n* [Rare] Provision against sea, wind, rain, etc — **w.-worn,** *a* Worn by exposure to weather — **w.-wrack†,** *n* Injury or damage caused by storms **w.-wreck†.**

weath'er-board", 1 weth'ər-bōrd", 2 wĕth'er-bōrd", *n* 1. A board prepared for the *outside covering of wooden* buildings, usually feather-edged and nailed on so as to overlap and shed the rain sometimes distinguished from a *clapboard* as being of greater width 2. A board running under the gable or eaves of a building and forming a finish at the junction of the wall and the roof 3. *Naut* (1) The windward side of a vessel (2) A board for turning the water from an open port-hole

— **weath'er-board",** *vt* To fasten weather-boards upon — **w.-boarding,** *n* 1. Weather-boards collectively, or material for making them 2 The outer wooden covering of the walls and roof of a building

weath'er-cock", 1 weth'ər-kok", 2 wĕth'er-cŏk", *vt* To *furnish with, or to perform the office of,* a weathercock

weath'er-cock", *n* 1. A weather-vane, properly one in the semblance of a cock 2. A fickle person or variable thing, one easily influenced and inconstant

we'go-tism, 1 wī'go-tizm, 2 wē'go-tism *n* [Slang, Eng] Excessive use of *we* a humorous imitation of *egotism* **we'ism‡.**

we'heet, *n* Same as WIGHIE

wehr'geld, wehr'gelt, *n* [G] Same as WERGILD

wehr'lite, 1 vār'lait, 2 vēr'lit, *n* *Mineral* A metallic tin-white to steel-gray silver-bismuth tellurid ($AgBi_2Te_3$) found in foliated masses [< Aloys *Wehrle* (1791–1835), Austrian mineralogist]

wehr'wolf", *n* *Folk-lore* Same as WERWOLF

welb'ye-lite, 1 welb'yē-ait, 2 vlb'ye-lit, *n* *Mineral* A colorless fluocarbonate of the cerium earths that crystallizes in the orthorhombic system [< P C *Welbye*, Norwegian mineralogist]

welch'sel-wood", 1 walk'sel-wud', 2 wlc'sel-wo͝od', *n* *Bot* The mahaleb-tree or its wood [Cp G *weichselholz*]

weld, 1 wld, 2 wĕd, *n* [Scot] Same as WEED²

Wel'er-strass, 1 vel'ər-shtrās, 2 vl'er-shtras **Karl** (10/11 1815–5/12 1897) A German mathematician — **Wel"er-stras'si-an,** *a* — **Weierstrassian coordinates,** coordinates devised by Weierstrass for the purpose of investigating planes in non-Euclidean space

wel-ge'll-a, } 1 wal-ji'li-ə, wal'gi-lə, 2 wl-gē'li-a, wl'ġe-la

wel'ge-la, } (XIII), *n* A species of bush-honeysuckle (see HONEYSUCKLE, 2), a hardy ornamental shrub (*Diervilla rosea*) from China and Japan (see DIERVILLA), very widely cultivated for its pink flowers so called from its former botanical name (*Weigela* or *Weigelia rosea*). [< C E *Weigel*, German naturalist]

Wel'gert, 1 val'gert, 2 vl'gert, **Karl** (5/16 1845–3/12 1904) A German pathologist; inventor of a process, known as **Welgert's method,** of hardening and staining nervous tissues by the use of a solution variously compounded, called **Welgert's stain.**

welgh, 1 wē, 2 wg, *v* **I.** *t* **1.** To find the weight of by comparing with an authorized unit of weight, as by means of the balance, as, to *weigh* grain, iron, etc **2.** To ponder with a view to forming a judgment, estimate the worth or advantages of, make account of, as, *weigh* well the proposal **3.** To cause to sink by reason of weight, press upon heavily, burden, depress often figuratively, and usually with *down*, as, to *weigh down* the bow of a boat, his sins will *weigh* him *down* **4.** To raise so as to suspend, lift up, as, to *weigh* anchor

II. *i* **1.** To have a specified weight, as, the man *weighs* eleven stone, it *weighs* but little **2.** Figuratively, to be estimated, judged, or held in opinion **3.** To be grievous or oppressive, as, what *weighs* upon your mind? **4.** *Naut* To raise anchor, begin to sail **5†.** To consider [< AS *wegan*, lift, cp OHG *wegan*, D *wegen*, Ice *vega*, L *vehō*, Gr *echō*] **welf.**

Syn.: see BALANCE, CONSIDER DELIBERATE, EXAMINE — **to weigh down,** to sink by gravity — **to w. in,** in certain sports, to determine one's weight qualification for competing therein In horse-racing terminology, the jockey is said *to weigh in* at the end of the race, and *to w out* before the start — **weigh'-bar",** *n* [Eng] A railway-car brake-shaft — **w.-bar shaft** (*Mach*), a rock-shaft in a radial valve-gear — **w.-bauk,** *n* [Scot] A scale-beam in the plural, a pair of scales **weigh'balk"‡** [Prov Eng] — **w.-beam,** *n* A large portable steelyard suspended in a frame **w.-master's beam‡.— w.-board,** *n* Same as WAY-BOARD — **w.-box,** *n* A coal-chute which weighs off and delivers coal to tenders, coal-cars, etc — **w.-bridge,** *n* A platform scales — **w.-can,** *n* A can or receptacle attached to a weighing-scale and having a faucet to permit drawing off any desired portion of its contents — **w.-house,** *n* A building, usually of public character, in which the weight of commodities is ascertained — **w.-lock,** *n* A lock, as in a canal, in which the weight and tonnage of boats are determined — **w.-master,** *n* A weigher, especially one licensed as a public weigher **weigh'man‡.— w.-shaft,** *n* The reversing-shaft of a valve-gear in disuse — **weigh'a-bl(e",** *a* Having weight, capable of being weighed — **weigh'age,** *n* A toll paid for weighing merchandise — **weighed†,** *a* Experienced

weigh¹, *n* **1.** The act of weighing **2.** [Eng] An estimated weight of any commodity, a definite quantity in terms avoirdupois **wey†; weyet.**

weigh², *n* Motion of a ship, in the phrase *under weigh* now regarded as a variant spelling of *way* (probably due to the influence of the phrase *to weigh anchor*), but still preferred by many of the best English and American writers, some of whom use it as if it were identical with WEIGH¹ and referred properly and originally to weighing anchor See WAY, *n*, 13

— **under weigh,** in motion, as a ship, often spelled *under way* See WEIGH², *n*, above

> On the morning of September 13th 1782 the floating batteries got *under weigh* with a fair wind to proceed to Gibraltar
> JOHN BARROW *Richard, Earl Howe* p 133 [J M 1838]

weighd, *pp* Weighed S S

weigh'er, 1 wē'er, 2 wę'er, *n* **1.** One who or that which weighs, especially, an official who weighs goods or verifies scales and standards **2†.** The equator a too narrow rendering of the Latin word *æquator* into English — **weigher and sacker,** an automatic device for filling sacks as of flour at the mill with a given weight — **weigh'er-ship,** *n* The office of a weigher

weigh'ing, 1 wē'ing, 2 wę'ing, *n* **1.** The act of determining weight **2.** The quantity of a commodity weighed at one time, as, a *weighing* of lard

— **weigh'ing-cage",** *n* A cage for weighing living animals — **w.-head,** *n* The fixed head of a hydraulic testing-machine containing a water-chamber to which the pressure is applied — **w.-house,** *n* Same as WEIGH-HOUSE — **w.-machine,** *n* Any apparatus for ascertaining weight, especially, an apparatus for weighing very heavy bodies, as loaded wagons cars, bales, etc — **w.-scale,** *n* A scale for finding the weight of any object — **w.-scoop,** *n* A scoop having a spring-balance in the handle, so that when the spring is released the weight of the contents of the scoop is indicated on its graduated handle

weight, 1 wēt, 2 węt, *tl* **1.** To add weight to, put a load upon, figuratively, to burden, as, the horse is *sufficiently weighted*, *he weights himself with care* **2.** *To* adulterate or load (fabrics or other merchandise) with cheap foreign substances, as, if the importer *weights* his teas, the dyer also *weights* his fabrics **3.** In founding, to place weights upon (the upper box of a flask), to prevent the parts from separating by pressure of molten metal **4.** In scientific observations, to assign to (an observation) a number that is supposed to express its relative value **5.** [Prov Eng or Scot] To estimate the weight of (anything) by lifting, heft

weight, *n* **1.** The measure of the force with which bodies tend toward the earth's center, or the quality thus measured, downward pressure due to gravity diminished by the centrifugal force due to the earth's rotation, ponderosity

Weight varies directly as the mass of a body and as the force of gravity As the mass of a given body is invariable, that body always weighs the same at the same place under uniform conditions, but as the force of gravity is different for different places (see STANDARD GRAVITY, under GRAVITY), change of position involves change of weight tho the change is too small to be taken into account in commercial transactions The weight of any body is increased about 1/189 by removal from the equator to the poles The apparent weight depends also upon the surrounding medium, the supporting influence of this being greater the greater its density, so that a body weighs less in water than in air In stating weights, scientific accuracy requires a statement of the exact latitude, altitude, barometric pressure, temperature, and other conditions Compare note under MASS 5

2. A definite mass of brass, iron, or other metal used in weighing-machines of various sorts as a standard, as a pound, ounce, etc. **3.** Any quantity of heaviness, whether expressed indefinitely or in terms of standard units, also, mass, relative quantity of matter.

Weight is used in compounds by sporting men See **bantam-weight; catch-w; featherweight; heavyweight; light-w.; middleweight; welter-w.**

4. Any mass used as a counterpoise or to exert pressure or force by gravity, as, a paper-*weight*, clock-*weight*

5. A scale or graduated system of standard units of weight, as, *avoirdupois weight*, *troy weight*

Three systems are in common use — **avoirdupois, apothecaries',** and **troy** weights — having the *grain* common to them The ounce and pound are alike in apothecaries' and troy weights, and in avoirdupois the ounce is less but the pound is a little more than one-fifth greater, or as 7,000 to 5,760 The lower denominations are in avoirdupois, the *dram*, in apothecaries, the *scruple* and *dram*, in troy, the *carat* and *pennyweight* For specific values of weights in each class, see table and the characteristic word See also METRIC SYSTEM

6. The relative tendency of any mass toward a center of superior force, as, the *weight* of a planet or satellite

7. Figuratively, the quality of possessing due efficacy, impressiveness, importance, especially, superior efficacy or preponderance, as of proof in establishing a conclusion, as, a man of *weight*, the *weight* of evidence is against him **8.** A feeling of oppressiveness, mental or otherwise, as, the *weight* of care, a feeling of *weight* in one's head **9.** *Mining* (1) The sinking of the roof due to removal of its natural support (2) [Austral] A pennyweight generally in plural

10. *Math* A hypothetical degree assigned to an algebraical expression, often by estimating according to some definite rule the degrees of the terms of which it is composed See phrases **11.** *Archery* The pull necessary for the full distention of the bow, measured in pounds

12. [Archaic] The resistance to be overcome by a machine in working, or its load, with simple mechanical powers, the mass to be moved or suspended [< AS *gewiht*, < *wegan*, lift] **walght†; wight‡.**

Syn.: burden efficacy, gravity, heaviness import, load, moment ponderosity, ponderousness, power, pressure See INFLUENCE, LOAD — **ad-he'sion-weight",** *n* A weight which causes friction, specif, the weight supported by the driving-wheels of a locomotive — **car-load minimum w.** (*Railroad*), the smallest weight that can be billed by the car-load — **gram-molecular w.,** same as GRAM-MOLECULE — **gross w,** the full weight of goods, no allowance being made for tare, tret, or waste opposed to *net weight* See NET², *a*, 2 — **lazy w.,** scant weight — **molecular w.,** the weight of a molecule, referred to hydrogen as a standard — **weight'-car"ri-er,** *n* One who or that which bears or carries weight, specif, a race-horse or hunter having both speed and exceptional capability of carrying weight — **w.-cloths,** *n pl.* *Horse-racing* Saddle-cloths that are weighted — **w. for age** (*Horse-racing*), the weight of a horse as determined by its age and unaffected by allowances — **w.-nail,** *n* In ship-building, a nail heavier than a deck-nail and with a flat head — **w. of a comitant** (*Math*), the exponent of the modulus of transformation in its equation — **w. of an observation,** in scientific observations, a number expressing the relative value or importance of an observation, and inversely proportional to the square of its probable error — **w. of a reciprocant** (*Math*), the sum of the orders, each diminished by two, of the factors of the term having the greatest weight — **w. of a resultant** (*Math*), the continued product of the degrees of the equations from which it is derived — **w. of metal,** the weight of projectiles that can be thrown in a single discharge of all the guns of a vessel — **w of wind,** the pressure of air supplied to an organ-stop, or group of stops, by the bellows — **w.-rest,** *n* A lathe-rest held on the ways by a weight suspended beneath

The following table and notes exhibit current weights in use throughout the world, and historic weights useful for reference, together with some disused modern weights and some of medieval times The superior figures used in the table indicate that further information is given in the notes appended Comparatively unfamiliar variant names will be found only in the notes at the number corresponding with that appended to the tabulated name In the column of national equivalents, exact fractions have often been replaced by simpler ones that are nearly equivalent, but the figures in the fifth and sixth columns and in the notes are exact, according to the best available authorities, except that metrical equivalents have usually been given to only two places of decimals Authorities differ as to exact values in metrical equivalents beyond the decimal point Some variations will therefore be found, but not often exceeding three-hundredths

2. The plant that produces this grain, a tall slender annual or biennial, bearing at its summit a somewhat four-cornered imbricated spike of usually 4-flowered spikelets called the ear or head

The matured fruit of each productive flower, called a *caryopsis* or *grain*, is hard, seed-like, and longitudinally grooved like the corresponding fruits of rye and barley The origin of the plant is lost in antiquity Wheat is known as **bearded, beardless,** or **bald,** according to the presence or absence of the awns or beard as **white, red,** or **amber,** according to color and as **spring, summer, fall,** or **winter,** according to the time of planting, the last two terms signifying that the grain is sown the year before that in which it matures, and the first that it is sown in the same year Among cultivated varieties of wheat the following are the more important **(1) Dwarf** or **hedgehog wheat** (*T sativum compactum*), with spikes 3 to 4 times longer than broad, and rigidly upright culms **(2) English w.** (*T sativum turgidum*), with tall, stiff, and upright culms and thick, four-sided spikes cultivated in the Mediterranean countries, more rarely in England and Germany **(3) Hard, durum, flint,** or **macaroni w.** (*T sativum durum*), with pithy or frequently solid culms and long bristling awns cultivated in Mediterranean countries **(4) Polish w.** (*T polonicum*), with large compressed, mostly bluish-green spikes **(5) Emmer w.** or **starch w.** (same as EMMER¹) **(6) Arras w.** (a variety of emmer grown in Abyssinia) Other varieties of wheat imported into or grown in the United States or Canada are **Arnautka w.** (a Russian hard wheat grown near the Sea of Azov), **Belotourk w.** (a Russian hard wheat now grown in the United States), **Fife w** (a hard, red, beardless wheat grown especially in Canada) **Fulcaster w.** (a red bearded wheat of moderate hardness grown in Pennsylvania and Oklahoma), **Fultz w.** (a beardless red wheat of moderate hardness, introduced in 1862 by Abraham Fultz of Pennsylvania, cultivated extensively in the United States), **Gehun w.** (a Himalayan wheat containing much gluten, cultivated in Canada), **Gharnovka w.** (a Russian hard wheat now cultivated in the United States), **Huron w.** (a cross between Fife wheat and Ladoga wheat), **Kubanka w.** (a Russian hard wheat grown along the Volga river and on the Siberian border), **Ladoga w** (a common wheat of the region of Lake Ladoga, grown in Canada), **Nicaragua w.** (a hard wheat introduced into Texas from Nicaragua), **Odessa w.** (a hard Russian wheat grown largely and successfully in the middle states of the United States)

whee'dle, 1 hwi'dl, 2 hwē'dl, *v* [WHEE'DLED, WHEE'DLING] **I** *t* **1.** To entice or persuade with flattering words, coax, cajole, hence, to play a trick upon, deceive

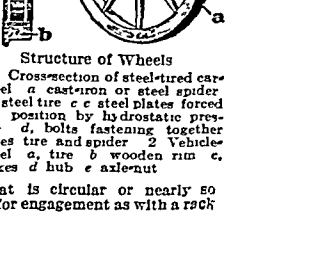
Worthless men and women to the very bottom of whose hearts he [Charles II] saw could easily *wheedle* him out of titles MACAULAY *England* vol I p 132 [P S & CO 1849]

2. To obtain by flattering or coaxing generally with *out* **II.** *i* To flatter coaxingly, as, she could *wheedle* and flatter to any extent [< G *wedeln*, wag the tail, < *wedel*, fan, < *wehen*, blow] **whea'dle†.**

— **whee'dle,** *n* **1.** A wheedler **2** That which wheedles, cajoling or coaxing speech — **whee'dler,** *n* — **whee'dle-some,** *a* [Rare] Artfully enticing, cajoling

wheel, 1 hwil, 2 hwēl, *v* **I.** *t* **1.** To carry on wheels, move or roll, as a wheeled vehicle, as, to *wheel* a person in a carriage, to *wheel* a Bath chair **2.** To cause to perform a circular movement, cause to turn in another direction, as, to *wheel* a regiment

And gray old trees of hugest limb
Shall wheel their circling shadows round
HOLMES *Under the Violets* st 3



3. To furnish with a wheel or wheels **4.** To form upon a potters' wheel, throw **5.** *Tanning* To roll in a pin-wheel See PINWHEEL, 3 **6.** To break upon the wheel See WHEEL¹, *n*, 4 **7†.** To turn on a wheel

II. *i* **1.** To turn on or as on an axis or pivot, rotate or revolve about a center, as, the sun was *wheeling* upward **2.** To move in a circuitous direction, gyrate, as, the *wheeling* falcon, hence, to deviate or go round, fetch a compass **3.** To take a new direction, adopt a new or reverse a former position or course of action often with *about*, as, he *wheels about* in opinion

July The whirlwind whistles and *wheels*
CHRISTINA G ROSSETTI *The Months*

4 To travel on wheels, specif, to ride on a cycle, as, we *wheeled* to Boston **5.** To roll onward or forward

wheel¹, *n* **1.** A circular rim and hub connected by spokes or rays in one structure, or a disk, solid or perforated, made to rotate on an axis and employed to reduce friction and facilitate movement or transportation, as in vehicles, to perform rotary motion, as in machines, to modify speeds, as in the form of pulleys, etc

Structure of Wheels

1 Cross-section of steel-tired carwheel *a* cast-iron or steel spider *b b*, steel tire *c c* steel plates forced into position by hydrostatic pressure *d*, bolts fastening together plates tire and spider 2 Vehicle-wheel *a*, tire *b* wooden rim *c*, spokes *d* hub *e* axle-nut

The uses of wheels are as various as the modifications in form made to meet such requirements the only features universally characteristic being rotation (partial or entire), motion (continuous oscillatory, or intermittent), and a contour that is circular or nearly so When the edges are toothed, for engagement as with a *rack*

the wheel is called a *gear*, if of elliptical shape, a *cam* Compare WHEEL AND AXLE, below, and WATER-WHEEL

Vehicle-wheels are commonly made (1) of wood, with a hub strengthened by bands, and a metallic box or bushing for the axle-skein, the spokes being mortised into the hub and tenoned into the rim or felly, the whole being strengthened by a metal tire (2) of iron or steel, either cast in one piece or having a metal hub connected by plates with a rim, (3) with a light rim connected with the hub by wire spokes, as in modern cycles and other vehicles a form in which the weight of the vehicle is supported by the tension of the spokes

2. Figuratively, that which imparts or directs motion or controls activity, motive power, as, the *wheels* of fate, the *wheels* of God grind slowly

There are moments when the wheels of life run slow, and when mistrust and doubt overshadow even the most intrepid disposition LANG *Letters to Dead Authors* p 110 [s]

3 An instrument, device, or formation resembling a wheel or having a wheel as its distinctive characteristic Specif (1) Any disk (2) *Naut* (*a*) Same as STEERING-WHEEL also, the corresponding mechanism of a steam steering-gear, as, to take a turn at the *wheel* (*b*) A paddle-wheel (3) Same as FIFTH WHEEL, 1 (4) *Pyrotechnics* A spirally coiled firework that when ignited rotates on a pin (5) A spinning-wheel (6) A potters wheel (7) A cycle (8) A gear-wheel See GEAR (9) A pulley-wheel or belt-pulley See PULLEY, 2 (10) In embroidery and fancy-work an opening filled with threads radiating like the spokes of a wheel (11) *Zool* (*a*) The trochal disk of a rotifer (*b*) A wheel-shaped spicule

4. The method of putting to death by torture on a wheel, or of torturing by breaking the limbs on a wheel, *also, the apparatus used in such torture A victim put* to death in this manner is said to have been **broken on the wheel.** He was usually tied to a wheel and struck with an iron bar, so as to break the legs and arms In this condition he was left to a lingering death, or given the *coups-de-grace* (finishing blows) across the vital parts

5. The act of wheeling, a turning, revolution, as, the airy *wheel* of birds 6. The ward of a lock, when circular and of sheet metal 7. *Naval & Mil* A turning of a body of troops or a swinging of a line of ships, as if pivoting on an axis, in which change of direction is accomplished while the different units keep in alinement not now used in the United States navy 8. [Prov Eng] A factory for grinding cutlery [C] 9. [Thieves' Slang] A dollar **10†.** A refrain in a song [< AS *hweōl*, contr of *hweowol*, wheel]

—aerohydrodynamic wheel, a wheel with curved buckets like a water-wheel, but designed to be turned by a current of air rising from a body of water, into which it is led by pipes **—antifriction w**, one of a pair or set of revoluble wheels which support the journal of another wheel, thus reducing friction **—Archibald w.,** a strong, resilient wheel with metal hub, used for gun-carriages **—artillery w**, a dished wheel having a long axle-box and heavy radial spokes, usually 14 in number, also a wheel made in imitation of this as for automobiles **—Backus w**, a Pelton wheel See below **Backus motor†.—Barlow's w** (*Elec*), a copper disk rotating on a horizontal axis in a magnetic field An electric current passing through the wheel from axis to periphery, or vice versa, will cause it to rotate **—change"-wheel',** *n* One of a series of gear-wheels of the same pitch, but differing in diameter and the number of teeth, by various combinations of which different velocities can be produced used in a lathe to vary the speed of a lead-screw, and in other machines for analogous purposes **change"-gear†.—elliptical w.,** a gear-wheel of elliptical contour See illus under GEAR **—Ferris w.,** a large vertical wheel comprising two sections between which observation-cars are suspended As the wheel revolves it carries the cars with it from the loading platform at the bottom to a considerable elevation at the top, where a view of the surrounding country may be obtained so called from the inventor, G W G Ferris **—grip w.,** *n Mach* One of two wheels furnished with jaws to grip cables as they pass over it **—Marlborough w**, a gear-wheel, usually as an idler, of sufficient width to engage with two or more wheels running in parallel planes **—masked w.,** a ratchet-wheel in which long and short teeth alternate used in numbering machines to permit a number being repeated **—Millot's w**, a water-wheel invented by Millot a French engineer, in which the water enters the buckets from inside the rim and is retained without a breasting until they reach the lowest point in their travel **—mutilated w.,** a gear-wheel having some of its teeth omitted for some special purpose **—Pelton w**, a turbine, consisting of a wheel, which carries on it a succession of cup-shaped buckets and is made to rotate by the impingement of high-pressure jets of water on the buckets, the form of the buckets being such as to prevent accumulation of dead water See illus under WATER-WHEEL **—Persian w**, same as NORIA **—pitch-back w**, a form of breast-wheel into which the water is turned at an angle in passing from the flume to the buckets **—potters' w.,** a horizontal disk mounted on a spindle and rotated by foot or power, used by potters for holding the prepared clay and whirling it so that by manipulation the workman may mold the clay into almost any rounded form It is also used in applying colors after molding **—radial w**, a wheel with spokes that are radially disposed instead of being tangent to the hub, also, a radial water-wheel **—Savart's w** (*Physics*), a rotating toothed wheel whose teeth strike a vibrating tongue which gives a tone corresponding to the number of teeth that pass it in a given time The rate of rotation of the wheel being known, the vibration-number of any tone may be found **—tangent w**, a gear-wheel meshing a worm tangentially disposed thereto **—thumb-w**, *n* Either of a pair of wheels which control the spark and fuel-supply in some automobiles, mounted on the steering-post so that they can be actuated by the thumb without removing the hand from the steering-wheel **—waved w.** 1 A cam-wheel having a waved surface to impart a to-and-fro motion 2. A rope-pulley with an undulated groove to intensify the grip on the rope **—w. and axle,** a wheel attached to an axle which has a rope wound over its circumference one of the so-called mechanical powers A small power applied at the circumference of the wheel balances a larger resistance on a rope wound on the axle, the gain in power being proportionate to the diameters of the wheel and the axle **—wheel'an'i-mal'cule,** *n* A rotifer named from the ciliated anterior trochal disk **w.-animal‡, w.-bearer‡.—w.-band,** *n* A wheel-tire **—w.-bar,** *n* *Car-building* An iron wheel-piece **—w barometer,** *n* A siphon barometer having over the mercury in the open tube a float that is connected by a thread with a pulley or wheel, the turning of which as the mercury rises or falls, moves a hand on a dial See illus under BAROMETER **—w.-base,** *n* The distance from the center of the back axle to the center of the front axle, as in a bicycle **—w.-bearer,** *n* A wheel-animalcule **—w.-bird,** *n* [Scot] The European goatsucker **—w.-blank,** *n* A disk or casting for a gear-wheel before the teeth are cut **—w -boat,** *n* A boat having wheels so that it may be transported on land, as from one body of water to another **—w -box,** *n* A box wholly or partially enclosing a wheel, as the shield over a street-car wheel where it projects through the car-floor **—w.-bug,** *n* A large reduviid bug (*Prionidus cristatus*) of the southern United States, having a semicircular elevation on the thorax like a toothed wheel, and preying upon other insects **—w.-cam,** *n* Same as CAM-WHEEL, 1 **—w.-carriage,** *n* A vehicle running on wheels **—w.-case,** *n* In pyrotechnics, the paper case, containing a combustible mixture, that is wound on a rotating circular firework **—w -center,** *n* That portion of a car-wheel within the rim or between the hub and rim **—w.-chain,** *n* *Naut* A chain for transmitting *the motion of a steering-wheel to a tiller or rudder-post* **—w.-chair,** *n* A chair, or a vehicle resembling a chair, moving on wheels, Bath chair **—w.-colter,** *n* A rotating disk-colter **—w.-cross,** *n* A cross made of two concentric rings radially joined by four equidistant arms **—w -cross-bow,** *n* An arbalest having a moulinet **—w.-cultivator,** *n* A *cultivator mounted on wheels having blades fitted to* their periphery **—w.-cut,** *a* Cut, or ground and polished, on a wheel said of glass **—w -cutter,** *n* A machine for cutting the teeth on watch- and clock-wheels **—w.-cutting,** *n* **—w -draft,** *n* An unbroken draft circulating continuously in one direction, as in a steam-boiler **—w.-engraving,** *n* Glass-engraving done with a wheel **—w.-fit,** *n* A wheel-seat on an axle See FIT², *n*, 4 **—w.-fixing,** *n* A fixing adapted to the support of the bearings of a pulley-wheel **—w.-guard,** *n* 1. A guard on the hub or nave of a wheel to keep dirt from the bearings 2. An iron plate on a wheeled vehicle to receive the chafing of the wheel when the pole or shaft is turned 3. A shield about a gear-wheel or the wheel of a vehicle 4. A rounded guard on a piercing weapon, as a sword Called also **wheel-guard plate.—w.-hoe,** *n* A cultivator mounted on wheels and operated by hand **—w.-horse,** *n* A horse harnessed to the pole or shafts when there is a leader or leaders in front, figuratively one who does the heaviest work or is most indefatigable **—w.-house,** *n* 1. *Naut* (1) A pilot-house (2) A paddle-box 2. The protective structure round a water-wheel or around the works of a system of water-works 3. That part of a carriage-body that is recessed to let the front wheels cut under the carriage when turning **—w.-jack,** *n* 1. A lifting-jack having a gear-and-rack mechanism 2 A lifting-jack having a low toe by which to catch the wheel-tire in raising a wheel **—w.-lathe,** *n* A lathe for turning large metal wheels, as for locomotives etc **—double w.-lathe,** a lathe for turning a pair of metal wheels while in place on their axle **—w.-lock,** *n* 1. An old form of lock for small arms, in which a small steel wheel actuated by a spring and released by a trigger struck sparks from a flint by whirling around 2. A lock or catch for stopping a vehicle-wheel **—w. of life,** a zoetrope **—w -ore,** *n* *Mineral* A variety of bournonite **—w.-organ,** *n* *Helminth* The trochal disk of a rotifer **—w.-out,** *n* *Card-playing* Same as LAP¹, *n*, 6 **—w.-piece,** *n* A side-member in a car-truck, supporting the pedestals **—w.-pit,** *n* 1. A pit for containing the lower part of a fly-wheel or other large wheel 2 [Prov. Eng] A whirlpool **—w.-plate,** *n* *Car-building* 1. That portion of a webbed wheel between the hub and the rim 2 Same as WHEEL FACE-PLATE 5 **—w.-press,** *n* 1 A press for forcing a wheel, as of a car or locomotive on or off its axle 2. A press used in molding car-wheels **—w -race,** *n* The part of a mill-race occupied by the water-wheel **—w.-rib,** *n* A stiffening rib in a metal wheel **—w.-rod,** *n* *Naut* A metal rod connecting a wheel and a tiller, used in steering by machinery **—w.-rope,** *n* *Naut* A rope for connecting a steering-wheel with the tiller **—w.-seat,** *n* That portion of an axle carrying a fixed wheel in car-wheels slightly larger than the hole in the wheel the two being forced together by heavy pressure See illus under JOURNAL-BOX **—w.-shaped,** *a* Having the form of a wheel, specif, in botany, said of a gamopetalous corolla with a very short tube and a flat, spreading border, *as in the potato-flower* **—w.-spicule,** *n* *Echin* A wheel-shaped calcareous dermal concretion **—w -stitch,** *n* An embroidery-stitch used in making figures resembling wheels **—w -swart,** *n* Same as SWART² **—wheels within wheels,** a highly involved or intricate condition **—w.-tax,** *n* [Colloq] A tax on carriages **—w -tire,** *n* Same as TIRE¹ **—w.-tooth,** *n* A cog **—w.-tread,** *n* That portion of a wheel-rim or -tire which bears on the rail or road **—w.-tree,** *n* The paddlewood of Guiana so called from the resemblance of a cross-section of its fluted trunk to a coarsely made wheel See PADDLE-WOOD **—w.-urchin,** *n* A flat sea-urchin, as a sand-dollar **—w. window** (*Arch*), a window having circular outline and radiating tracery **—w.-worn,** *a* Worn by wheels **—wire w.,** a rotary brush having wire in place of bristles, for cleaning metal surfaces

whis'ky¹, 1 hwis'kı, 2 hwĭs'ky, *n* [-KIES, 1 -kız, 2 -kĭz, **whis'key**, *pl*] An alcoholic liquor obtained by distillation of a fermented starchy compound, usually a grain
It is prepared by first making a mash of various grains to be used and then converting the starch of this into sugar by means of malt, if malt has not been used entirely in the making of the mash Subsequently the sugar of the mash is fermented by means of yeast The beer arising from this fermentation contains from 3 to 4 per cent of alcohol, and is distilled by simple distillation (or by other means), which retains in the distillate the volatile matters which are volatile at the temperature of distillation at the strength of the alcoholic liquor distilled This product is usually redistilled in a similar manner and the final product of the distillation has strength of from 50 to 65 per cent of alcohol by volume This liquor is stored in casks which are usually charred before using for the purpose of ripening and mellowing In the United States whisky is made under the supervision of the officers of the Bureau of Internal Revenue, Department of the Treasury, and is stored in bonded warehouses until it is tax-paid and delivered for consumption According to the *Pharmacopœia of the United States*, whisky is 'an alcoholic liquid obtained by the distillation of the fermented mash of grain — such as Indian corn, rye, wheat, and barley, or their mixtures, ' and is described as an amber-colored liquid having a distinctive odor and taste, and a slightly acid reaction " Congress ordered its manufacture to be suspended from Sept 8, 1917
As defined by the Food Standards Committee of the Association of Official Agricultural Chemists and State and National Food and Dairy Departments **new whisky** is the properly distilled spirit from the properly prepared and properly fermented mash of malted grain, or of grain the starch of which has been hydrolyzed by malt it has an alcoholic strength corresponding to the excise laws of the various countries in which it is produced, and contains in one hundred (100) liters of proof-spirit not less than one hundred (100) grams of the various substances other than ethyl alcohol derived from the grain from which it is made, and of those produced during fermentation, the principal part of which consists of higher alcohols estimated as amylic
Potable w. is new whisky which has been stored in wood not less than four years without any artificial heat save that which may be imparted by warming the storehouse to the usual temperature and contains in one hundred (100) liters of proof-spirit not less than two hundred (200) grams of the substances found in new whisky save as they are changed or eliminated by storage and of those produced as secondary bodies during aging, and, in addition thereto, the substances extracted from the casks in which it has been stored It contains, when prepared for consumption as permitted by the regulations of the Bureau of Internal Revenue, not less than forty-five (45) per cent by volume of ethyl alcohol, and, if no statement is made concerning its alcoholic strength it contains not less than fifty (50) per cent of ethyl alcohol by volume, as prescribed by law
Bottled in bond w. is whisky not less than four years old, which has been diluted with water to proof, and bottled under the supervision of the officers of the Bureau of Internal Revenue Its strength must not be less than 50 per cent by volume of alcohol, and its quantity not less than that indicated upon the package — a fraction of a gallon **Rectified w.** is whisky diluted with a quantity of alcohol, and colored and flavored, or of alcohol which has been colored and flavored
Whisky is often named (sometimes improperly) from (1) the substance from which it is made, as, **corn whisky, molasses w., potato w., rye w, wheat w.**; or (2) the country or place of production, as **Bourbon w.** (Kentucky), **Irish w., Monongahela w.** (Pennsylvania), **Scotch w**, etc [< Gael *uisgebeatha*, 'water of life,' < *uisge*, water, + *beatha*, life] — **barleymalt whisky**, a malt whisky with a peat-smoke flavor due to the method of drying the characteristic whisky of Scotland and Ireland — **blended w.**, whisky which, either for adulteration or the production of a certain bouquet, has been blended with different qualities or brands, also, a cheap, compounded whisky, made of ethyl alcohol, flavoring, coloring-matter, etc — **crooked w.** [Slang, U S], whisky distilled without government license or payment of excise **moonshine w ‡.** — **sour-mash w., sweet-mash w** (*Brewing*), see under MASH, *n* — **W. whist¹, *n* [Colloq] Peace, silence

whist², *n* A game of cards played by four persons with a full pack of 52 cards, opposite players being partners
All the cards are used and played in each hand and there are thus 13 tricks each of which is taken by the highest card played it being obligatory to follow suit if possible Every trick above the sixth counts one point, and when honors (the four highest trumps) are scored each one of these held by one side in excess of the other scores a point In **American or standard whist** honors are not scored and the game is seven points In **short whist** the game is five points in **long whist** (the old form, now unusual) ten points Whist is generally regarded as the most scientific game of cards and the rules and principles of play have been exhaustively treated of by many writers
The first known mention of *Whist* in print was in a book called 'The Motto ' published in 1621, where it is spelled *Whisk* The earliest known use of the present spelling is in Butler's 'Hudibras' (1663) For about fifty years after this it was spelled indifferently either way The game was much studied by a party of gentlemen who frequented the Crown Coffee House in London in 1730, and then it began to be played in its modern form

I. *t* [Archaic] To wish or desire, be willing to have happen now most frequently in the preterit with a present signification that sprang from a subjunctive use, as, what *wilt* thou? what *wouldest* thou? whatsoever ye *would* that men should do to you, etc, I *would* that all the family were here The object is commonly a clause beginning with *that* Sometimes a subject in the first person is not expressed, and sometimes *would* is followed by an indirect object preceded by *to* expressed or understood, as, *would to* Heaven I had taken your counsel

If we have not all we *would* we should praise God for all we have SPURGEON *Treasury of David, Psalm XLI* in vol II, p 288 [r & w 1892]

II *i* To be desirous, have a wish mostly in the form *would*, as, they had to come whether they *would* or not [< AS *willan*, will]

will³, *v auxiliary* [The preceding verb weakened by the fading of its specific senses to a sign of futurity, with the retention, however, in various connections, of much of its original independent force of willingness, wishing, determination, etc · followed by an infinitive without the sign *to*] **1.** To be going to, be about to a common sign of the future tense, noting the future or the conditional character of an action as dependent on the volition of the subject, or (in the second and third persons) on the natural operation of the subject or his circumstances, as, I suppose he *will* come to-morrow at ten, if you take poison, it *will* kill you, when the dog was annoyed he *would* snap See note under SHALL **2.** *To be willing to, have a mind to · corresponding* more nearly to the original meaning of the word, wish, want, as, why *will* you not tell the truth? surely you *would* not cheat a blind man When *will* and *would* are emphasized, persistence, wilfulness, or determination is expressed, as, if you *will* go, then go, they *would* come **3.** To be probable or certain as a natural consequence of the case, be about to, necessarily or naturally, must often in general statements, as, accidents *will* happen, a burnt child *will* avoid the fire

In colloquial Scotch or provincial use *will* with a verb is often employed, in a sense allied to this in place of the simple verb, tho with the implication that the fact stated is an inference as, I'm thinking this *will* be Main street

4. Sometimes, to cause or effect customarily or frequently, usually do or be commonly in the preterit, as, she *would* always have family worship, he *will* sit for hours by the fire **5** [Rare & Archaic] To be about to, begin to, be on the point of, be inclined to, as, when the deer saw the dog he *would* run, but was shot connected with the original meaning of *will*

will³, *v* [*imp* and *pp* WILLED, *ppr* WILL'ING, *3d per sing pres ind* WILLS] [In many senses, this verb has long been confused with WILL¹] **I.** *t* **1.** To cause as a deed of will, to effect by volition, to be the author of one's own action, inaction, or effort to change or influence another thing or person, as, the soldier *willed* to pull the trigger, I *will* to die, he *wills* to cease work **2.** To make an object of choice or purpose, resolve upon as an action or course, determine to do, also, to form definitely as a choice, resolution, or purpose, as, the converted man *wills* to serve God, the drunkard *wills* many vain resolves **3.** To give, devise, or bequeath *by a last will and testament, as, the father willed his* estate to his son **4.** [Archaic] To cherish a motive, feeling, or tendency toward, wish or desire consciously and intelligently said especially when the object is regarded as attainable, as, the king *wills* peace **5.** To control, as a hypnotized person, by the exercise of will, rule and direct simply by determined thought and wish, as, he *willed* her to sleep **6†.** To bid, order, direct

II. *i* **1.** To determine and cause one's own actions or states by an act of will, exercise that natural imperative which man has over himself, as, rational living is immediately caused by rational *willing*, I *will* and action follows **2.** To exercise the faculty of volition or will, make a choice, form a resolution or purpose, or *direct in effort or action, as, man knows, feels, and wills*

You must still submit to the power that rules in your heart and look for assistance to God who works in you to *will* and to do
JACOB ABBOTT *Young Christian* p 131 [H 1882]

3 To have a determinate desire or preference, wish, as, the matter shall be arranged just as you *will* **4** To issue a command or decree, determine, direct, as, the army moves as the general *wills* [< AS *willian*, < *willan*, will] — **will I, will I, or will he, will he, or will ye, will ye,** willingly or unwillingly, without choice same as the corrupt form WILLY-NILLY

will†, *vi* To be lost or bewildered, go astray

will, *a & adv* [Prov Eng, Scot, or Obs] Bewildered astray

will, *n* **1.** The power of controlling one's own movements and *internal states, feelings, and thoughts*, by conscious, and especially by deliberate, choice, the faculty of self-determination distinguished (1) from all those activities of mind and body which are initiated or directed wholly by external stimuli and which are therefore *constrained or impulsive*, and (2) *from all that play of the* intellectual and emotional life which falls under the control of instinct, association, and habit, purely It must always be recognized, however, that the element of choice or volition is a matter of indefinite degrees, and that the control of *attention is the primary and most distinctive evidence of the* presence in the mental life of so-called will

Desire wish, *will* are states of mind which every one knows, and which no definition can make plainer If with the desire there goes a sense that attainment is not possible we simply *wish* but if we believe that the end is in our power we *will* that the desired feeling having, or doing shall be real WM JAMES *The Principles of Psychol* vol II, p 486 [H H & co 1890]

This self-determining side of man's mental life and development, as the basis of civil and moral responsibility, has always been recognized by reflective thinking and in the popular mind, altho in different ways and with differences in the extent of its application In the conception of will, the two elements of desire or willing intention, and of power or efficiency to realize desire, have both quite uniformly been united With Aristotle free will was rational desire, implicating a sort of force comparable to that of a rushing wind (*thymos*) The combination of these two elements of emotion and self-determining force toward the gratification of emotion controlled the ancient twofold division of the faculties into *understanding* and *will* The modern threefold division into *intellect, feeling*, and *will* arose from a more searching and thorough analysis of the so-called faculties The still more recent and more nearly complete analysis of students of psychology would seem to favor the use of the word *will* as a term to cover, not any one faculty, but the *entire active side or aspect of mental life so far as it is* consciously voluntary and culminates in deliberate choice

Force becomes known to us partly through the sense of effort and resistance overcome which attends our muscular activity, and partly through the exercise of *will* as perceived in exerting our voluntary mental activity — force of mind being a term of familiar use as well as force of arm
MIVART *Essays and Criticisms* vol II p 227 [o & co 1892]

2. An act of willing, a choice or a volition, a voluntary determination or purpose or an executive decision, directive effort **3.** Strong determination, practical enthusiasm, energy of character, as, he works with a *will* **4.** That which has been resolved or determined upon, a purpose, especially if it be authoritative or decisive, as, let them work their *will*; God's *will* be done **5** A right to act according to one's own judgment or pleasure, power to dispose of a matter arbitrarily, sufferance, discretion, as, we are subject to his *will*, a tenant at *will* **6.** *Metaph* A metaphysical entity conceived of after some of the features of will as a human experience, but deprived of the characteristics of conscious deliberation, adaptation of action to a consciously desired end, and conscious choice (1) In psychology, merely instinctive and impulsive or subconscious striving, as used by Paulson (2) In philosophy the fundamental principle of the universe, conceived of as blind force unconsciously realizing itself in both inorganic and organic nature, especially as in the system of Schopenhauer, a pantheistic conception **7.** [Archaic] A conscious inclination or desire toward any end or course, a wish, as, his *will* at that time was to marry, cherish good *will* for all **8.** *Law* An instrument by which a person makes a disposition of his property to take effect after his death, the legal declaration of a man's intentions that he wills to be performed after his death

Formerly the word *testament* was specifically applied to the disposition of personal property while *will* was applied to the devise of real property but it is now usual to refer to the instrument generally as a *last will and testament* If a person has made more than one will, the one last made operates to revoke all others and stands as the testator's only will The formalities essential to the lawful execution of a will vary in different jurisdictions, but generally the instrument must be signed, and in some instances sealed, by the testator, and declared by him to be his last will in the *presence of at least* two (and in some cases three) witnesses, who must subscribe the instrument in his presence and in the presence of each other In international law three main courses are taken (1) the property of the testator may be subjected to the law of his domicil (2) it may be subjected to the law of the place where it *happens to be at the time of* the testator's death (3) the movable property may be subjected to the law of the domicil, and the immovable to the law of the place where it is situated The rule in the United States and England is to follow the last course.

Its efficacy depends on its declaring the testator's intention, whence . it is emphatically styled his *will*
BLACKSTONE *Commentaries* bk ii, p 500

9. *Scots Law* The part of a signet letter which expresses its command, beginning "Our *will* is" **10** [Archaic] A request or command, an expressed wish, as, send me your *will* by letter, and it shall be done [< AS *willa*, < *willan* will] Syn choice, decision, desire, determination, disposition inclination, resolution, volition, wish *Will* is a word of wide range of meaning, and both as faculty and act has been the subject of many and various theories, in popular language *will* is often equivalent to *desire* or *inclination*, as when we speak of doing something against our *will* *Volition* is a word of scientific precision, denoting the determinative element of *will*

close-hauled — **too near the w,** same as NEAR, *a* 7 — **to recover the w. of,** to drive in the direction the wind takes, as game, so as to deprive it of scent of the danger that awaits it in that direction — **to shake a vessel in the w,** to luff a vessel until her sails shake — **to slip one's w** [Slang], to lose one's breath, die — **to sow the w. and reap the whirlwind,** to do or say that which is sure to receive a severe recompense — **to take the w out of one's sails,** to sail to the windward so as to cut off the wind of another vessel, hence to check one's career, render one's words or deeds ineffective — **wind'ar"row,** *n* *Meteor* The symbol used on a weather-map to show the direction of the wind, and sometimes its force, at a station The arrow flies with the wind See illus under CYCLONE — **w.-band,** *n* **1.** The wind-instruments of an orchestra, collectively also, an organized company of performers, chiefly on portable wind-instruments, as a brass band **2** [Prov Eng] A band of cloud portending a storm — **w.-barometer table** (*Meteor*), a table showing the various weather indications derived from the state of the barometer and the direction and shift of the wind — **w.-beam,** *n* Same as COLLAR-BEAM — **w.-bill,** *n* *Scots Law* Same as ACCOMMODATION PAPER — **w.-bore,** *n* Same as SNORE-PIECE — **w -bound,** *a* *Naut* Delayed by contrary winds — **w -box,** *n* A distributing box for supplying air to the tuyeres of a blast-furnace or cupola — **w -brace,** *n* Same as BRACE, *n*, 4 (2) — **w.-catcher,** *n* A scoop-like device projected from some interior to catch and carry the wind into the inside as on vessels **w.-scoop†.** — **w.-changing,** *a* Fickle like the wind — **w -chart,** *n* A chart showing the directions of the wind in a given region at a certain time or period, as in the official pilot-charts of the United States or the wind-and-current charts of the British government — **w.-chest,** *n* The box or reservoir that supplies compressed air to the pipes or reeds of an organ See illus under ORGAN — **w -colic,** *n* Pain in the abdomen due to flatulence — **w.-contusion,** *n* See WINDAGE, 5 — **w -cutter,** *n* **1** The sharp upper lip of the mouth of an organ-pipe, by striking against which the air-current is caused to vibrate **2** *Engin* A prow for a swiftly moving vehicle shaped to cleave the air and thus reduce head resistance — **w.-dial,** *n* A dial fitted with a weather-vane — **w -dog,** *n* A fragment of a rainbow seen on detached clouds, generally regarded by sailors as betokening high winds — **w.-dropsy,** *n* Same as TYMPANITES — **w -egg,** *n* [Prov Eng] An imperfect egg, as one covered with a membrane or very thin shell, also, an egg in which decomposition has charged the shell with gases — **w -equator,** *n* The boundary-line between the wind systems of the northern and southern hemispheres, the position of which shifts with the seasons — **w -fertilized,** *a* *Bot* Fertilized by wind-borne pollen, as pines and grasses anemophilous — **w -fertilization,** *n* — **w.-firm,** *a* Able to withstand heavy wind — **w.-gage,** *n* **1.** An anemometer **2.** A gage to measure air-pressure in the wind-chest of an organ **3** A contrivance affixed to a gun to ascertain the force of the wind, so that allowance can be made for it in sighting **w -gauge†.** — **w.-gall¹,** *n* A soft swelling near the pastern-joint of a horse formerly supposed to be a distention by air — **w -galled,** *a* Affected with wind-galls — **w.-gall²,** *n* Same as WIND-DOG — **w -gap,** *n* Same as GAP, *n*, 2 — **w -guard,** *n* **1.** Any arrangement for breaking the force of the wind against an object **2.** A covering for a chimney — **w -gun†,** *n* Same as AIR-GUN — **w -gust,** *n* A strong but brief increase of wind-velocity — **w -house,** *n* A sheltered excavation used as a retreat from tornadoes — **w -instrument,** *n* A musical instrument whose sounds are produced by the vibration of an air-column excited either by the breath or by bellows See list under INSTRUMENT — **w.-jammer,** *n* **1.** [Colloq] A merchant sailing-vessel as distinguished from a steamship, also, a member of its crew a sailors term, formerly used in contempt **2** [Slang] *Mil* A bugler or trumpeter — **w.-mantle,** *n* Same as SHELTER-BELT — **w.-marker,** *n* A mark, especially a movable arrow, to note the direction of the wind, as on a chart — **w.-plant,** *n* An anemone See WINDFLOWER — **w -pollinated,** *a* *Bot* Same as ANEMOPHILOUS — **w.-pollination,** *n* — **w -pox,** *n* Chicken-pox — **w -pressure,** *n* **1.** Pressure of the wind upon any object on which it blows **2.** The pressure of air compressed in the wind-chest or bellows of an organ — **w.-puff,** *n* *Vet* Effusion of fluid about the tendons just above the fetlock-joint of the horse — **w.-record,** *n* The record of velocities made by automatically registering anemometers anemogram — **w.-rode,** *a* *Naut* Riding at anchor with head to the wind Compare TIDE-RODE — **w -rose,** *n* **1** A graphic representation of the relative frequency of winds from different directions drawn with reference to a center and sometimes rudely resembling a flower with curved petals, also such a representation of the relation of the wind to other meteorological phenomena, as temperature etc, called, specif, **baric or barometric w -rose, humidity w.-rose, hyetal or rain w -rose, temperature w.-rose,** etc On each of eight lines radiating at equal angles from a central point is marked off a length corresponding to the number of times the wind blew in the corresponding direction, and the extreme points are connected by a line The **dynamic w.-rose** is a wind-rose that shows the mean force of the wind from the different directions **2** A poppy (*Papaver argemone*) of Europe — **w.-sail,** *n* **1** *Naut* A canvas tube or funnel with a spreading opening at one side of the top that may be stayed to face the wind used on ships to force fresh air into the hold **2.** A sail on or forming the arm of a windmill — **w.-scale,** *n* A meteorologists scale in the terms of which

Wind-rose

the force of the wind is recorded, when based on personal estimate instead of the readings of an anemometer The best known are the **Beaufort scale**, having 12 degrees, from 1 ('light air') to 12 ('hurricane') the **half-Beaufort**, of 6 degrees and the **International**, of 10 degrees The United States Weather Bureau has adopted a scale of 6 degrees in which the gale is reckoned between 40 and 60 miles per hour, and the hurricane above 60

—w.-scoop, *n* A horizontal funnel for forcing air into a car or cabin, or to exhaust it therefrom **—w.-shadow,** *n* The screening effect of a mountain range in respect to the prevailing winds, especially as affecting the rainfall to the leeward **—w.-shaft,** *n* The vertical shaft from which the vanes of a windmill radiate **—w.-shake,** *n* Same as SHAKE, *n*, 10 Compare ANEMOSIS **w.-shock‡.—w.-shaken,** *a* **1.** Tossed or shaken by the wind **2.** Injured by wind specif, having anemosis said of timber. **w.-shake‡.—w.-shield,** *n* Same as WIND-GUARD, 1 **—w. side,** the windward side **—w.-signal,** *n* A signal giving notice of changes in the direction and velocity of winds, especially such changes as may be dangerous to shipping, etc See plate of SIGNAL-FLAGS **—w.-spout,** *n* A tornado-funnel, waterspout, sandspout, or any other manifestation of violent vortical wind **—w.-stack,** *n* A stack of straw piled up by means of a wind-stacker **—w.-stacker,** *n* A device operating a fan which produces a current of air used for stacking straw from a threshing-machine **—w.-star,** *n.* Same as WIND-ROSE **—w.-stop,** *n* A bead or strip on a window-frame helping to form the groove in which a sash plays **—w.-storm,** *n* A violent wind either without rain, snow, or hail, or with very little **—w.-stroke,** *n Vet* Spinal paralysis in the horse **—w.-sucking,** *n* The act of noisily swallowing air by a crib-biting horse **—w.-swept,** *a* Swept by the wind or winds **—w.-swift,** *a.* Swift as the wind **—w.-taut,** *a Naut* Heeling to the force of the wind said of a vessel at anchor **—w.-tight,** *a* Impervious to wind air-tight **—w.-trunk,** *n* The passage connecting the bellows with the wind-chest of an organ See illus under ORGAN **—w.-vane,** *n* Same as VANE, 1 **—w.-wheel,** *n* A motor-wheel to be turned by the wind **—Wisper w**, a wind blowing by night out of the valley of the Wisper, an affluent of the Rhine, Germany

wind[2], 1 waind, 2 wind, *n* **1.** The act of winding, or condition of being wound **2.** A winding, bend, turn, or twist, as, the path has a *wind* to the left

wind'age, 1 wind'ij; 2 wind'ag, *n* **1.** The rush of air that attends the rapid passage of an object, as a projectile or a railway-train **2.** The deflection of a projectile from its natural course due to wind, also, the amount of such deflection **3.** *Ordnance* (1) In a muzzle-loading rifled gun, the difference between the diameter of a projectile and the bore through which it is discharged (2) In a smooth-bore gun, the space between the surface of the bore and the projectile **4.** *Mech* The free space, or its amount, between some piece and the socket in which it plays or fits (1) The air-cap between the armature and the pole-piece of a dynamo (2) The play between a spindle and its cavity, as in a gas-check measured by the difference of diameters **5.** *Mil Surg* A contusion generally regarded as caused by sudden compression of the air due to the passing of a ball or gunshot near to a part of the body, but without touching it by some referred to actual contact **wind's con-tu"sion‡. 6.** The surface offered to the wind by a vessel

wind'as, 1 wind'əs, 2 wind'as, *n* **1.** [Scot] A fan for winnowing **2†.** Same as WINDLASS [< D *windas*, < *winden* wind + *aes*, pole] **wind'aceț; wind'asse‡.**

wind'bag", 1 wind'bag', 2 wind'băg', *n.* [Slang] A wordy talker

wind'ball", 1 wind'bôl', 2 wind'bal', *n* **1.** *Surg* The concussion of the air regarded as producing wind-contusion See WINDAGE, 5 **2†.** An inflated ball, a windbag

wind'ber"ry, *n* Same as BILBERRY, 1

wind'break"ț, *rt* To make wind-broken

wind'break", 1 wind'brēk', 2 wind'brāk', *n* **1.** Anything, as a hedge, trees, or a high fence, to break the force of wind **2.** A small wooden building, like a sentry-box, for one who attends to the banking of logs **3.** *Forestry* (1) The breaking of trees by wind (2) See SHELTER-BELT (3) See WINDFALL **wind'break"er‡.**

wind'broach"ț, *n* The vielle or hurdy-gurdy

wind'-bro"ken, 1 wind'-brō'kn; 2 wind'-brō'kn, *a Vet* Affected with spasmodic shortness of breath or convulsive difficulty of breathing; asthmatic said of a horse

windeț, *rt* To wend, go

Win'del-band, 1 vin'dəl-bānt, 2 vin'dĕl-bānt, **Wilhelm** (9/11 1848–10/11 1915). A German historian of philosophy

win'der, 1 vin'dər, 2 win'der, *rt & rt* [Prov Eng] To winnow

wind'er‡, *rt* To wither fall

wind'er[1], 1 waind'ər, 2 wind'er, *n* **1.** One who or that which winds, as, a silk-*winder* **2.** That upon which or from which yarn or thread may be wound, as a reel, card, or stick **3.** A step or stair wider at one end than at the other, as in winding stairs **4.** A twining plant **5.** An appliance, as a socket-wrench, for winding up a spring that actuates a mechanism **—wind'er-hole",** *n* A hole into which a key is put to wind the works of a watch or clock, or other clockwork mechanism **—w.-rod,** *n. Carp* A rod on which the width of winders is marked on any fixed axis See WINDER, *n*, 3

wind'er[2], *n* One who winds a horn, bugle, etc

wind'er[3], 1 wind'ər; 2 wind'er, *n* **1.** A wind-breaking blow, as at the pit of the stomach **2.** [Prov Eng] A fan, winnow

win'der[4], *n* [Prov] A window

Win'der[5], 1 win'dər 2 win'der *n* A town in Gwinnett, Jackson, and Walton counties, Ga.

Win'der-mere, 1 win'dər-mir, 2 win'der-mēr, *n* **1** A lake in Westmorland and Lancashire England, 1 by 10½ m; 219 ft deep the largest of the English lakes **2.** A town in Westmorland, England former name **Birthwaite.**

wind'fall", 1 wind'fôl', 2 wind'fal', *n* **1.** Something brought down by the wind, as fruit from a tree, a limb, or a tree.

> Apples which you may smell but never taste
> Before your lord and his great friends are placed
> While you enjoy mere *windfalls*
> JUVENAL *Satires* tr by Gifford, satire v, l 234

2. The track through a forest, left by a tornado, as marked by fallen trees **3.** A piece of unanticipated good fortune, lucky happening or gain, as a legacy

> Why not work him in the field of foreign literature? . . . I guess it'll be quite a *windfall* to him
> HOWELLS *Hazard of New Fortunes* pt ii, p 49 [in 1890]

4. [Rare] *Meteor* Any stream of air, warm or cold, descending rapidly, after the analogy of a cascade or waterfall The so-called mountain and valley winds, the bora föhn, mistral and other like winds are included under this term **—wind'fall"en,** *a* Blown down by wind

wind'fish", 1 wind'fish' 2 wind'fish', *n* The fallfish

wind'flow"er, 1 wind'flou'ər, 2 wind'flow'er, *n* **1.** Any plant of the genus *Anemone*, especially the wood-anemone (*A. nemorosa*) of Europe and (*A quinquefolia*) of America **2.** A species of gentian (*Gentiana pneumonanthe*), autumn-bells

Wind'ham, 1 wind'əm, 2 wind'am *n* **1. William** (9/11 1750–4/11 1810), an English statesman and orator **2** A county in N E Connecticut 515 sq m., county-seat, Willimantic **3.** A county in S E Vermont, 788 sq m county-seat, Newfane **4.** A town in Windham county, Conn **5.** A town in Cumberland county Me

wind'herb", 1 wind'-hûrb', 2 wind'-hĕrb', *n.* An ornamental perennial herb (*Phlomis herba-venti*) of the mint family, with long, lanceolate leaves and whorls of purplish-violet flowers

Wind'hoek, 1 vint'huk, 2 vint'hoĸ, *n* A town, the capital of German Southwest Africa, taken by the troops of the Union of South Africa under General Louis Botha, May 12, 1915

wind'hov"er, 1 wind'huv'ər, 2 wind'hov'er, *n* [Eng] The kestrel, stanieł so called from its habit of hovering, with rapid beats of its wings over one spot in the face of the wind, when looking for prey **wind'bib"ber‡; wind'cuff'-er‡; wind'fan"ner‡; wind'-hawk"ț; wind'suck"er‡.**

Wind'ic, 1 wind'ik, 2 wind'ic, *n* A class of the northern division of the Aryan family of languages, embracing the Lettic and Slavonic branches or groups Compare WENDIC See LETTIC, SLAVONIC **—Wind'ic,** *a* Of or pertaining to these languages [manner

wind'i-ly, 1 wind'i-li; 2 wind'i-ly, *adv* In a windy

wind'i-ness, 1 wind'i-nes, 2 wind'i-nĕs, *n* The quality or condition of being windy (1) A condition of the weather in which winds prevail (2) Flatulence of the stomach and bowels (3) The quality of producing flatulence (4) Puffiness bombast, boasting buncombe

wind'ing, 1 waind'iŋ, 2 wind'ing, *pa* **1.** Turning spirally about an axis or core, as, a *winding* staircase **2.** Having bends or lateral turns, as, a *winding* stream **3.** Twisting from a plane, as, a *winding* surface Syn. see CIRCUITOUS **—wind'ing-stairs",** *n* A shellfish wentletrap

wind'ing[1], *n* **1.** The act or condition of one who or that which winds, a spiral turning or coiling, in mining, the act or process of hoisting ore to the surface **2.** A bend or turn, or a series of them, as of a valley

> The *windings* of the Meander are perhaps at the present day still more remarkable than they were anciently owing to the growth of the alluvial plain through which it flows
> RAWLINSON *Herodotus* vol ii bk ii p 32, note 6 [A 1859]

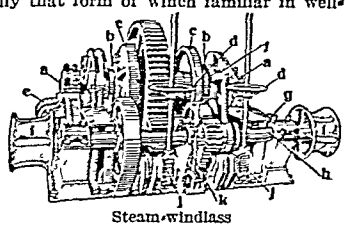
3. A warp or twist from a plane surface **4.** *Elec* (1) The manner in which the wire is wound in a coil, as of a galvanometer, a resistance-coil a dynamo-armature, or electromagnet (2) Any part of an electric circuit which is coiled See DIFFERENTIAL WINDING SERIES-WOUND SHUNT-WOUND **—compound winding** (*Elec*), a combination of shunt-winding and series-winding **—In w.,** warped from a plane **in wind‡.—lap'ș or loop'-wind"ing,** *n* A coil in which the wire laps back on itself at intervals **—mesh-w.,** *n* A meshed coil used on three-phase armatures **—multiple w**, a winding composed of armatures, field-coils, etc, forming a multiple circuit **—out of w**, having an unwarped or level surface **—parallel w**, a coil composed of several windings forming a multiple circuit **—potential w.,** a coil or winding that crosses a circuit when connected in shunt **—wave-w**, *n* A form of winding in which the undulations run forward, not lapping back as in lap-winding **continuous w.‡; undulatory w ‡.— wind'ing-en"gine,** *n* An engine operating a drum for a *hoisting-rope*, especially, one for use at a mine-shaft **—w machine,** *n* A device or machine for winding, as a reel or warping-machine **—w.-pendant,** *n Naut* A long rope pendant so arranged as to divide a heavy strain between the deck, the lower masthead and the lower yard used in connection with a pendant-tackle **—w.-rope,** *n Mining* A rope, usually a wire cable, wrapped round the drum of a hoisting-engine used for raising and lowering the cage in a mine shaft **—w.-shaft,** *n* See SHAFT **—w.-sheet,** *n* **1.** The sheet that wraps a corpse **2** By suggestion, the drapery-like overflow from a guttering candle, sometimes looked upon superstitiously *as ominous of death*

> Miss Jenkyns would never allow a servant to call the little rolls of tallow that formed themselves round candles *winding-sheets*,' but insisted on their being spoken of as 'roley-poleys'
> ELIZABETH C GASKELL *Cranford* p 174 [in 1864]

—w.-sticks, *n pl Carp* Two sticks with parallel edges, used to show whether a surface is warped or twisted **w.-strips‡.—w.-tackle,** *n* A tackle attached to a winding-pendant **—w. up. 1.** The act or process of winding, as a spring mechanism **2.** A conclusion, as the final liquidation and settlement of the business affairs of a partnership or of a joint-stock company in view of a dissolution **—W up Acts** (*Eng Law*), acts of Parliament regulating the final settlement of the affairs of joint-stock companies

wind'ing-ș, *n* A boatswains signal with a whistle

wind'ing-ly, 1 waind'iŋ-li, 2 wind'ing-ly, *adv* In a winding manner



win-dis'tle, 1 win-dis'ti; 2 win-dis'ti, *a* [Colloq] Same as WINDY 3

wind'lace, 1 wind'les 2 wind'lac, *n* [Archaic] A windlass

wind'lass[1], 1 wind'les, 2 wind'lac, *n* **I.** *t* To raise or draw with a windlass, as, to *windlass* the anchor **II.** *t* To use a windlass, haul something with or as with a windlass

wind'lass[2]‡, *r* **I.** *t* To turn or wind hence to confuse **II.** *i* To go around about go circuitously, as by artful approach in hunting hence to go warily to work

wind'lass, *n* **1.** *Mech* A horizontal drum for winding, or for hoisting by winding, properly, one operated by radial arms, removable bars, or a pawl-and-ratchet mechanism, loosely, any form of horizontal hoisting-drum, especially that form of winch familiar in well-*curbs, consisting of a drum and cranks* **2†.** A device in the form of a windlass for bending the bow of an arbalest [Cor of WINDAS, influenced in form by WINDLE]

Steam-windlass

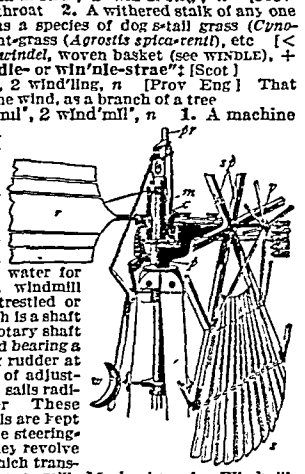
horizontal wheel and axle having two drums of different diameter on the same axis one of which pays out as the other winds up, the power being increased in inverse proportion to the difference of the barrel-diameters **—Spanish w.** *Naut* **1.** A purchase made by thrusting a handspike or the like through the bight of a rope with a rolling hitch **2.** A rope-purchase for bringing together parts of a shroud or other rope before seizing them **3.** *Surg* An improvised tourniquet made by tying a bandage about a limb or other part over a stick, and then tightening it by twisting the stick **—wind'lass-bitt",** *n Naut* One of the two bitts to which a ship's windlass is framed to bear the strain **—w.-jack,** *n* A jack having on the nut which surrounds its screw a crown wheel operated by a pinion and crank



win'dle, 1 win'dl, 2 win'dl, *n* **1.** [Dial] Anything used to wind or turn, a reel or a spindle· a term of variable local use **2.** A nearly obsolete dry measure See MEASURE **3.** The windthrush [< AS *windel*, < *windan*, wind]

wind'less, 1 wind'les, 2 wind'lĕs, *a* **1** Having no sensible movement of the air calm **2.** Being out of breath

win'dle-straw", 1 win'dl-strô', 2 win'dl-strą', *n* [Prov Brit] **1.** The whitethroat **2.** A withered stalk of any one of various grasses as a species of dog's-tail grass (*Cynosurus cristatus*) a bent-grass (*Agrostis spica-venti*), etc [< AS *windelstrēow*, < *windel*, woven basket (see WINDLE), + *strēow*, straw] **win'dle- or win'nle-strae"ț** [Scot]

wind'ling, 1 wind'liŋ, 2 wind'ling, *n* [Prov Eng] That which is torn off by the wind, as a branch of a tree

wind'mill", 1 wind'mil', 2 wind'mĭl', *n* **1.** A machine turned by the wind and designed to furnish motive power, as for operating a flour-mill or for pumping

Mechanism of a Windmill for Pumping

c crank and connecting-rod for driving the piston-rod (*pr*) *m* main spindle *p* pistons *r*, rudder *sp* spider to which are attached the rods holding the slats (*s*) that constitute the vanes *r* vane-bars *w* balance-weight

In the ordinary modern form, largely used in the United States for pumping water for domestic supply, a windmill consists of a tower, trestled or enclosed within which is a shaft having at the top a rotary shaft *set at right angles, and bearing a* feathering or steering rudder at one end and a system of adjustable slats, wings, or sails radiating from the other These radiating vanes or sails are kept facing the wind by the steering-mechanism, and as they revolve they turn a crank, which transmits motion to a pump, millstone, etc Older forms, in *which there is a rotating cap to* the tower with four adjustable *canvas-covered frames to receive* the wind are common in the Netherlands **2†.** A chimerical project or notion **—to fight windmills,** to contend against imaginary evils in allusion to Don Quixote's combat with windmills, which he mistook for giants

> Nowhere have so many *windmills* been *fought*, and so many real enemies been left unhurt as in Germany
> MAX MÜLLER *Chips* vol iii, p 28 [in 1874]

—wind'mill-cap", *n* A rotating cap on a windmill-tower that turns to direct the vanes or sails toward the wind **—w. grass,** *n* See GRASS, *n* **—w.-plant,** *n* Same as TELEGRAPH-PLANT **—wind'mill"y,** *a* Having numerous windmills

Win'dom, 1 win'dəm, 2 win'dom, *n* **1. William** (9/11 1827–7/11 1891), an American financier and politician **2.** A town, county-seat of Cottonwood county, Minn [door

win'doreț, *n* A window a corruption perhaps suggested by

win'dow, 1 win'do, 2 win'do, *rt* **1.** To provide with a window or windows; as, a house well *windowed* **2.** [Rare or Obs] To put in position at a window **3†.** To fill with apertures resembling windows

win'dow, *n* **1.** An opening in the wall or roof of a building or other structure (as a vehicle) for the admission of light, or of light and air, including, architecturally, the casement, sash panes, etc, in common usage, sometimes, the sash alone, as, raise the *window* often used figuratively, as, the eyes are the *windows* of the soul

>
> H VIZETELLY *Wines of World* intro, p 9 [W L. & CO 1875]

Wines are **dry** when they contain little or no sugar, and **sweet** when the proportion of saccharine matter is clearly perceptible to the taste Between these two extremes a very great number of wines exist, differing from one another by small proportions of various ingredients Wines consist essentially of water, alcohol, and flavoring matters the proportion of alcohol varying from 7 33 per cent in certain Chablis wines to 25 17 in certain sherries The average percentages of alcohol in the principal wines are as follows **Bordeaux** or **Claret**, 10 9 to 13 8, **Burgundy**, 10 1 to 13 2, **Champagne**, 12 6 to 14 4, **Madeira**, 19 0 to 19 7, **Moselle**, 8 7 to 9 4, **Port**, 18 0 to 22 0, **Rhine wine**, 9 5 to 13 0, **Sherry**, 17 0 to 21 0 The remaining constituents of wine are volatile oil œnanthic ether, grape-sugar, glycerin, gum, vegetable albumen, extractive and coloring matters, tannic, malic, succinic, phosphoric, carbonic, and acetic acids, potassium bitartrate, and calcium tartrate According to the wine, certain of the above ingredients may be present or absent Some of the volatile oils contained in wine have never been isolated they are supposed to be the cause of the flavor and odor, called the *bouquet* and differ with each variety The quality of the bouquet depends upon the variety of grape, locality of growth, climatic influences, and modes of manufacture Certain wines that have remained for a long time in bottles deposit tartrates called crusts, owing to the conversion of saccharine matters into alcohol In the manufacture of wines the juice expressed from grapes is called *must*, and is colorless, that from white grapes yields **white wine**, that from dark-colored grapes when fermented with the marc **red wine.** The must contains from 15 to 33 per cent of sugar and at the usual normal temperature of the air, about 60° Fahr, fermentation soon sets in and continues for some time When nearly all of the sugar has been converted into alcohol and carbon dioxid, the wine is considered formed It is then racked off into casks See table below, and WINE-MAKING

SOME VARIETIES OF WINE

In the following table the column of "class or type" is intended merely to give an elementary idea of the character of the various illustrations selected The terminology is unscientific, and is not that used by wine-merchants Where "U S" appears after Burgundy, Haut Sauterne, Johannisberger, Port, Sauterne, Barbera, Chablis, Chambertin, Château Margaux, etc, it is intended to mean that more or less crude imitations of the wines of those localities were formerly manufactured in the United States and sold under those names The wines described under the names of varieties of grape, such as Burger, Cabernet, Carignan, Frontignan, Herbemont, Jurançon, Mondeuse, Muscatel, etc, are simply wines made of those grapes This is usual all over the world, until a district or vineyard has, by the superiority of its production, gained a name for itself when its wines are then known by that name, as Château Margaux, Johannisberger, Sauterne, etc As most wines may be made in widely differing colors, only that color which may be regarded as typical has been here recorded The following list of wines embraces only those commonly known in commerce The classic and historic Albanian, Cæcuban, Falernian, Rhætian, and Setinian wines, of which little is known, are omitted as obsolete The superior figures in table refer to synonyms at end

Wire varies in diameter from one inch to $^1/_{7000}$ of an inch or less, but ordinarily when thicker than $^3/_{16}$ of an inch it is termed a *rod* In making iron and steel wire a billet of metal is passed through the rolls in a rod-mill until reduced to the desired size of rod This rod is thoroughly cleaned and scaled, usually by dipping in dilute sulfuric acid, and then *threshed*, after which it is pointed on one end so that the wire-drawer may be able to grasp it with his tongs as he starts it through the plate or die It is then run through the dies and reduced one or more sizes in diameter If further reduction is desired, it requires to be annealed, when the drawing may be repeated through a series of smaller dies Chilled iron and steel dies are commonly used, but for great accuracy and for fine wires diamond or ruby dies are sometimes used, the drilling of which requires much care and expense Steel wire low in carbon is spoken of as **low grade** tho of good quality and better for many uses than a **high grade**, which is high in carbon but the latter has greater tensile strength and may be hardened and tempered

Brass *wire* is made so fine that when woven into gauze there are 67 000 meshes in a square inch J D STEELE *Fourteen Weeks in Nat. Philos* p 28 [A S B 1872]

Varieties of wire are often specifically named (1) from their use or purpose or the thing with which connected or the article in the manufacture of which they are used as, **ball-wire** (for pails etc), **baling-w.** (soft annealed for tying up

bales, etc), **bolt·w** (for cutting into small bolts), **bonding·w.** (galvanized iron or copper wire for electrically connecting the joints of rails on an electric railway), **bonnet·w.** (for stiffening bonnets and for stems of artificial flowers), **broom·w.** (for binding the corn to the stick), **bundling·** or **binder·w.** (same as BALING-WIRE), **card·w.** (fine in size, tempered, elastic, and strong, for the staples of cards and carding-machines) **clock·w** (for pillars, arbors, pinions, etc , in clocks), **clothes-line w.** (of galvanized steel strands or a coarse wire made up into long links), **corset·w.** (for stiffening corsets), **covering·w** (for winding about music-wire, as in the bass strings of a piano), **feeder·w.** (see FEEDER *n* , 3 (3), for an electric feeder), **hat·w.** (tempered used in the rims of men's stiff hats), **heddle·w** (for loom-heddles), **lock·w.** (flat used in the internal mechanism of locks), **magnet·w.** (soft copper wire of best quality wrapped with cotton or silk as for induction-coils, or magnets in telegraph- and telephone-instruments), **mattress·w.** (fine wire, for wire mattresses), **needle·w.** (a very high grade of steel wire), **piano·w.** (same as MUSIC-WIRE see MUSIC), **pin·w.** (usually of brass or steel), **pinion·w.** (see PINION, and illus above), **reed·w.** (flat, for the reeds of looms or musical instruments), **rivet·w.** (for cutting into rivets), **rope·w.** (for wire ropes, usually of steel, and when for rigging, hawsers, etc , usually galvanized), **screw·w.** (see SCREW), **signal·w.** (for operating railway-signals), **skirt·w** (flat tempered steel wire used in crinolines), **spectacle·w** (usually grooved, to hold the glass firmly), **spline·w.** (rectangular for making splines or feathers), **trolley·w.** (an electric wire without insulation, so that the current may be transmitted at any point to a trolley), **umbrella·w** (tempered wire for the ribs or soft wire for the crossplecs of umbrellas), **vineyard·w** (for tying up grape-vines, etc), (2) from the material of which they are made as, **aluminum w** (made like steel wire, and one-third as strong for the same size), **brass w.** (useful for springs etc , where iron would rust), **copper w.** (valuable as a conductor, and increasing in use, but costly), **iron w.** (preferred to steel for some uses), **platinum w.** (used principally for incandescent lamps, and chemical and scientific apparatus, where it is exposed to great heat), **steel w.** (made in all grades and tempered for springs, drills, etc), (3) from the business, place, etc , in which used, as, **bookbinders' w.** (for wire-stitching), **cooperage w.** (usually of coppered steel, used with wooden hoops to strengthen a barrel), **market·w.** (suitable for the retail hardware-trade, usually soft steel wire in the common sizes), **office·w** (insulated copper conducting wire for use in wiring telegraph- and telephone-offices and also used in hotels and large buildings), **telegraph·** or **telephone·w** (frequently an iron wire, because it is a better conductor than steel, but a low grade of steel is *often* used on account of its strength, especially for short telephone-lines in cities often bimetallic wire, and sometimes, as for long-distance lines, pure copper wire) **2** The electric telegraph as a means of communication, as, the news came by *wire* **3.** The string of a musical instrument, hence, often, a stringed instrument

— **wire'draw"er,** *n* **1.** A person engaged in the business or act of wiredrawing **2** A mechanism for drawing out wire See WIREDRAW, 1 **3.** One who is overrefined or prolix in statement, also, one who distorts the truth **4†.** A stingy, grasping person — **wire'draw"ing,** *n*

wire'less, 1 wair'les, 2 wir'lĕs, *v* [Rare] **I** *t* To communicate by wireless telegraphy, as a message **II** *i* To send a communication by wireless telegraph, —**wire'less-ly,** *adv*

wire'less, *a* **1.** Having or using no wire or wires, specif indicating or characterizing a system of telegraph or telephony, or signaling, in which a message is transmitted through space by electric waves **2** Designating the messages so transmitted, as, a *wireless* telegram

wire'less, *n* [Colloq] **1.** The wireless telegraph or telephone system , as, via *wireless* **2** A message sent by wireless telegraphy or telephony, as, I sent him a *wireless* Compare RADIOGRAM, MARCONIGRAM

wire'less te-leg'ra-phy. An electric telegraph system by which *signals may be conveyed* from one station to another without the use of connecting wires

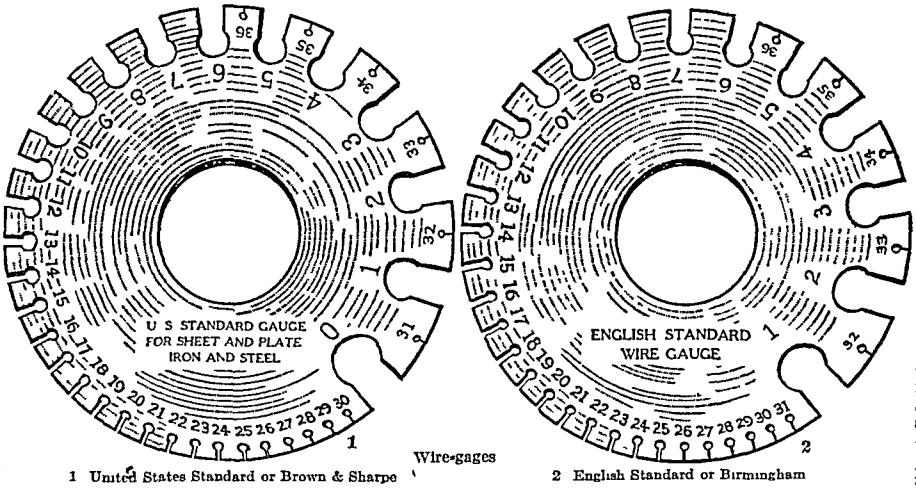
The earliest practical system demonstrated the applicability of Hertzian waves to the transmission of messages without wires In the transmitting device of this system, the current of a battery or dynamo connected with the primary winding of an induction-coil is controlled by a telegraph-key When the circuit is closed the current, interrupted by a vibrator or interrupter, induces a current of high frequency in the secondary winding, and a spark is formed between the two terminals of the secondary one of which is grounded and the other connected to the antenna from which the oscillations set up are radiated through space At the receiving station, a similar antenna receives the oscillations, which act upon a coherer, causing its resistance to vary in such a way that a receiver, energized by a local battery in circuit with the coherer, emits audible sounds corresponding to the contacts made by the operator at the transmitting station The foregoing embodies the method patented by Guglielmo Marconi, in March, 1897, and is typical of the art Other systems that have been put into practise include the Lodge-Muirhead, the Slaby-Arco, the *Braun-Siemens-Halske*, the *Branly-Popp* the Rochefort the Ducretet-Popoff, and the Guarini systems In the United States patents have been taken out by R A Fessenden, Lee de Forest, J S Stone, H Shoemaker, and others, and their instruments are in operation in various parts of the world, as from Costa Rica to Bocas del Toro, and between St Michael and Safety, Alaska, and on war-ships, etc See ANTENNA COHERER, CAPACITY-GAGE, HERTZIAN WAVES, TUNE, etc

wire'less te-leph'o-ny. A telephonic system in which the action of a telephone transmitter causes fluctuations in electric waves radiated through space by a high-frequency current, these fluctuations in turn affecting the receiver at the distant station in such a manner as to reproduce the original sounds It differs from wireless telegraphy in that it uses a *continuous* train of waves instead of interrupted groups of waves, but employs similarly placed antennæ as sending and receiving agents

wire'man, 1 wair'men, 2 wir'man, *n* [WIRE'MEN, *pl*] A man who has to do with wire, especially, one who handles wire for telegraph-lines etc , a wirer

wire'-pull"er, 1 wair'pul"er, 2 wir'pul"er, *n* One who pulls the wires, as of a puppet or *marionette*, hence, one who uses secret means to control others or to accomplish his own schemes, an intriguer **wire'-work"er†.** — **wire'pull",** *v* — **wire'-pull"ing,** *n*

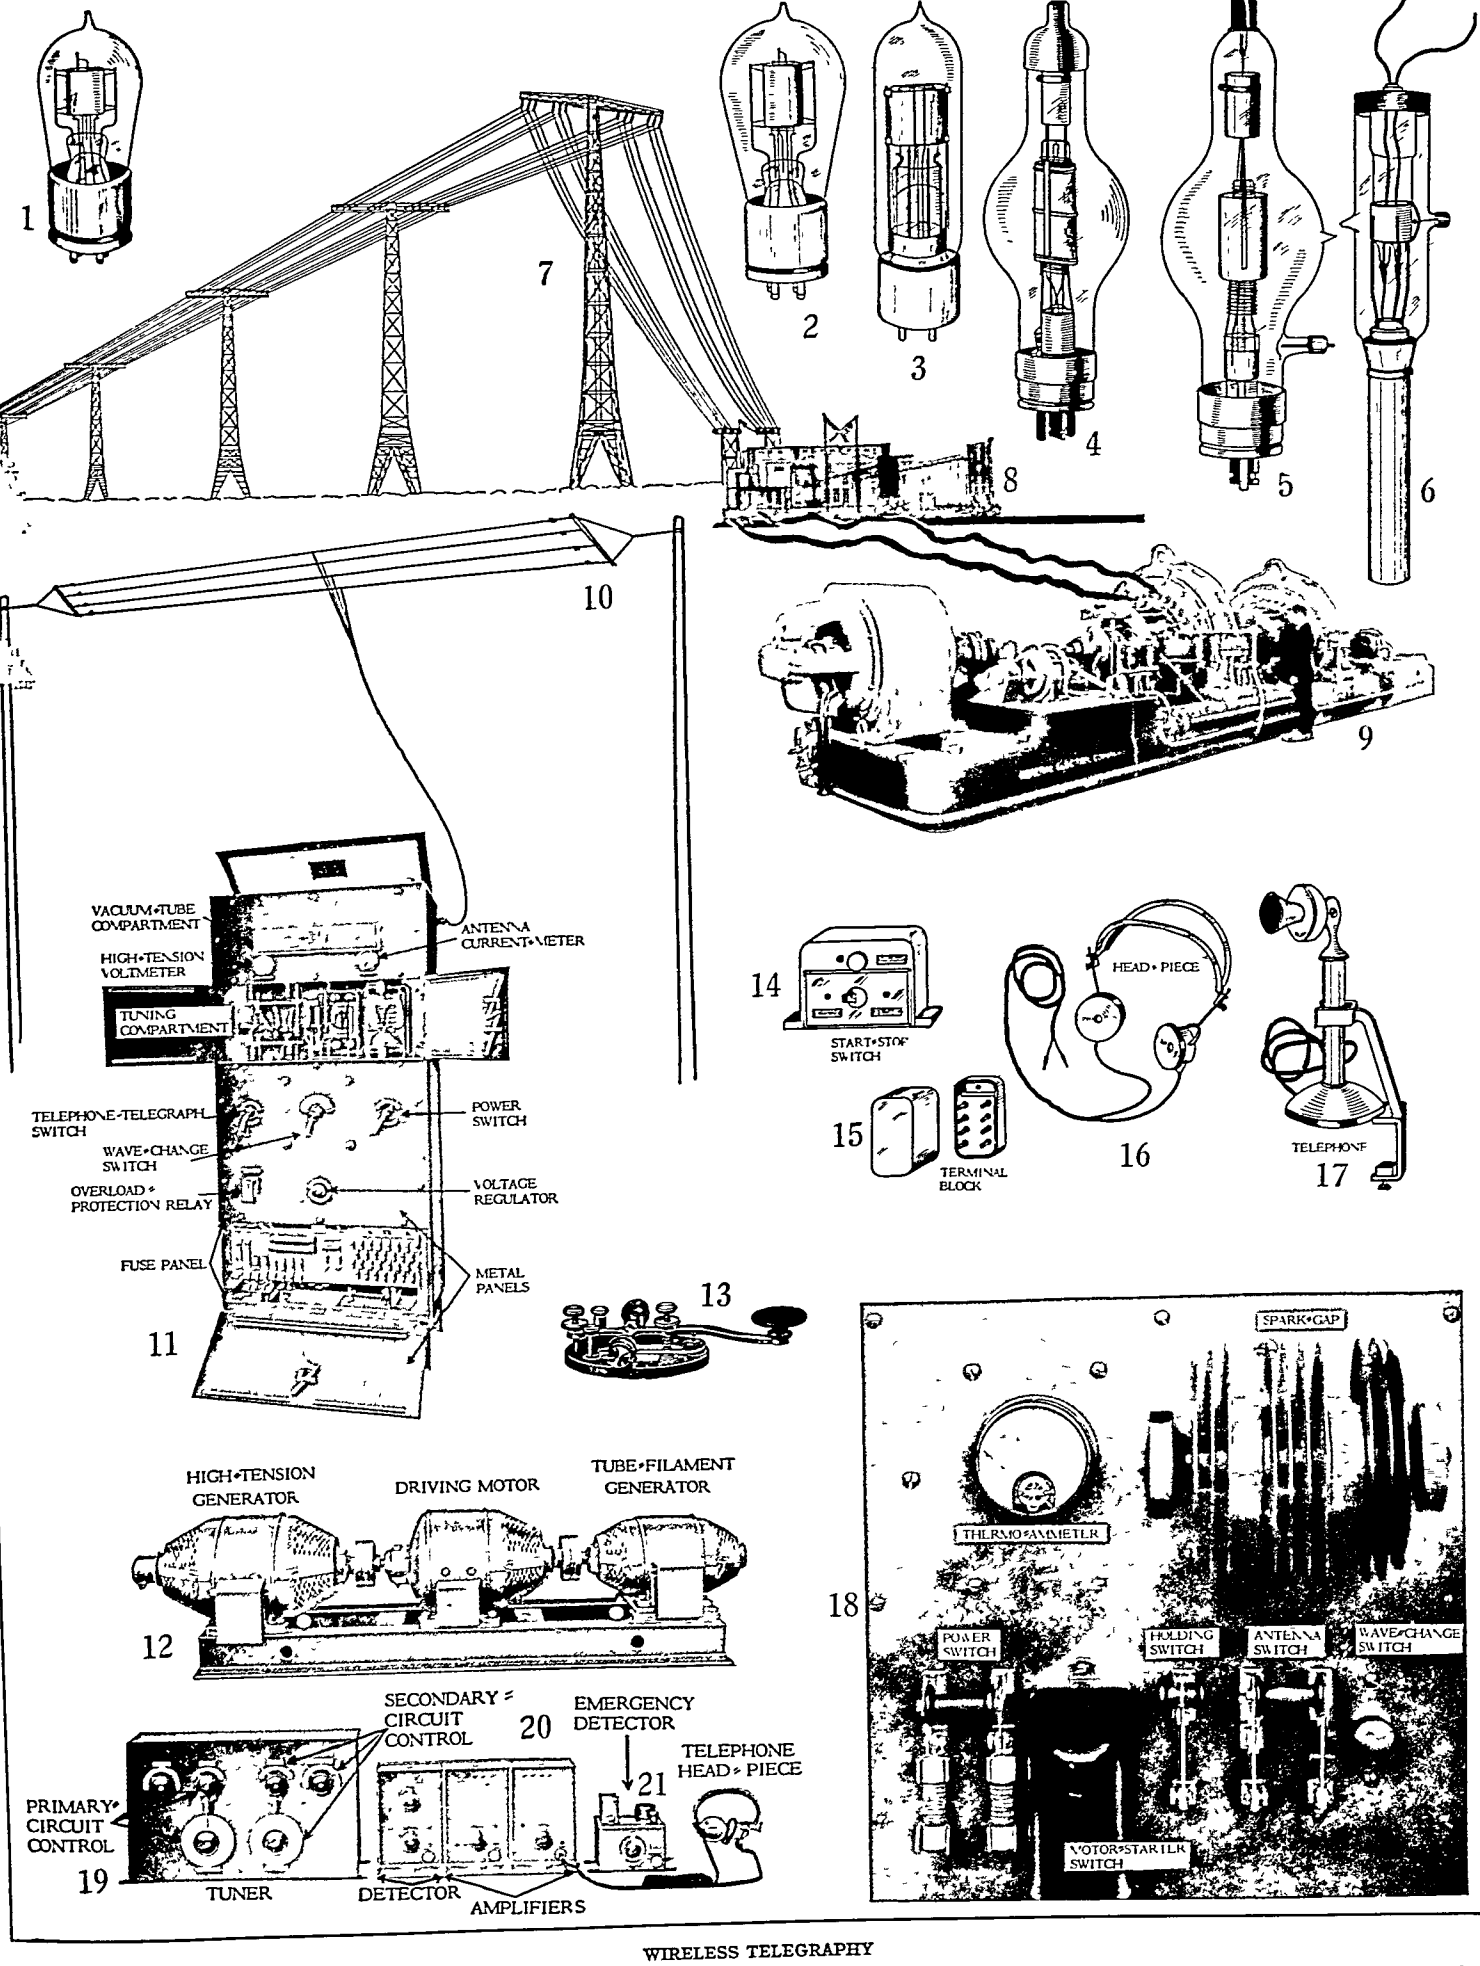
wir'er, 1 wair'er, 2 wir'er, *n* **1.** A trapper who snares with wire contrivances **2.** A wireman



wire'smith", 1 wair'smith", 2 wir'smith", *n* A wire-maker by the old method of hammering

wire'way", 1 wair'wā", 2 wir'wā", *n* **1.** Same as ROPE-WAY **2** A cash- or parcel-railway **3** A pipe or channel for wires, especially for electric wires in a building

wire'work", 1 wair'wûrk", 2 wir'wûrk", *n* Small articles made of wire or wire cloth, wire fabrics in general



wire'worm", 1 wair'wûrm", 2 wir'wûrm", *n* **1** The hard-bodied worm-like larva of a click-beetle or elaterid destructive to plants by devouring the roots See illus on opposite page **2** [U S] Anild myriapod, galley-worm **3** A strongyle (*Strongylus contortus*) infesting sheep

wir'ing, 1 wair'ing, 2 wir'ing, *n* **1.** A network or entire system of wire installed in a building for the distribution of electric power **2.** *Surg* The joining of the

2. A high degree of knowledge, such as is gained by research or close study, erudition, learning **3.** In Scripture (1) Ready insight into the divine law, with obedience to such law so used especially in Proverbs, where it is sometimes personified (2) Sometimes, in the Pauline epistles, worldly opinions, especially Greek speculation or rhetoric, as, the *wisdom* of this world an opprobrious sense (3) The Christian spirit or heavenly character, as, the *wisdom* that is from above is first pure, then peaceable, etc (4) The higher Christian knowledge, or "strong meat," such as that set forth by the Apostle Paul, as, howbeit we speak *wisdom* among them that are perfect (5) [W-] The Book of Wisdom of Solomon See below **4.** [Rare] A wise saying or action **5** A collection of wise sayings, or a recital of wise conduct **6.** A wise or prudent person, the personification of that which is wise, as, if your *wisdom* consents [< AS *wisdōm*, < *wīs*, wise, and see -DOM] Syn: attainment, depth discernment, discretion, enlightenment, erudition, foresight, information, insight, judgment, judiciousness, knowledge, learning, prescience, profundity, prudence, reason reasonableness, sagacity sense, skill, understanding *Enlightenment, erudition information, knowledge, learning,* and *skill* are acquired, as by study or practise *Insight, judgment, profundity* or *depth reason sagacity, sense,* and *understanding* are native qualities of mind but capable of increase by cultivation The other qualities are on the border-line *Wisdom* has been defined as 'the right use of *knowledge*,' or "the use of the most important means for attaining the best ends," *wisdom* thus presupposing *knowledge for its very existence* and exercise *Wisdom* is mental power acting upon the materials that fullest *knowledge* gives in the most effective way There may be what is termed "practical *wisdom*" that looks only to material results but in its full sense *wisdom* implies the highest and noblest exercise of all the faculties of the moral nature as well as of the intellect *Prudence* is a lower and more negative form of the same virtue, respecting outward and practical matters, and largely with a view of avoiding loss and injury, *wisdom* transcends *prudence*, so that while the part of *prudence* is ordinarily also that of *wisdom* cases arise, as in the exigencies of business or of war, when the highest *wisdom* is in the disregard of the maxims of *prudence* *Judgment*, the power of forming decisions especially correct decisions, is broader and more positive than *prudence*, leading one to do, as readily as to refrain from doing, but *judgment* is more limited in range and less exalted in character than *wisdom* to say of one that he displayed good *judgment* is much less than to say that he manifested *wisdom* *Skill* is far inferior to *wisdom*, consisting largely in the practical application of acquired *knowledge* power and habitual processes or in the ingenious contrivance that makes such application possible. In the making of something perfectly useless there may be great *skill* but no *wisdom* Compare ACUMEN, ASTUTE KNOWLEDGE PRUDENCE SAGACIOUS — Ant: absurdity error, fatuity, folly, foolishness idiocy, imbecility, imprudence, indiscretion, miscalculation misjudgment, nonsense senselessness, shallowness, silliness, stupidity Compare *synonyms for* ABSURD IDIOCY

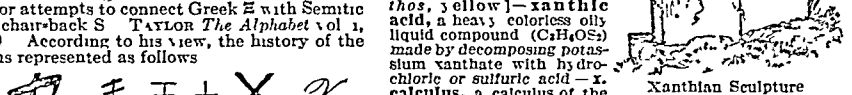
X



Roman	Black Letter.	Script
X x	𝔛 𝔵	𝒳 𝓍

X¹, **x**, 1 eks, 2 ĕks, *n* [EXES, X's, or Xs, 1 eks'ez, 2 ĕks'ĕz, *pl*] **1** A letter the twenty-fourth in the English alphabet It is a sign for the combination *ks* as in *extra* or *gz*, as in *exact* When initial, as in *Xanthous*, it is pronounced like *z* The name *ex* is Latin

In the Latin alphabet *x* was redundant, as it is now in our own It usually stood for *ks*, but the *k* was often the result of assimilation, especially from *g*, cp *rexī* for *reg-sī* In Anglo-Saxon it stood for *hs*, as in *nēxta*, next, for *nēhsta*, sometimes also for *sc*, as in *āxian* < *āscian*, ask In modern English the *x* of unstressed *ex-* preceding a vowel usually becomes *gz* cp *exact*, *exhaust*

The character X is from Latin X = *cs* < Early Western Greek Χ + = *ks* [7th cent B C], an addition of the Greeks to the Phenician alphabet This same character (X) is used in Eastern Greek and in classic Greek for *ch* = *kh*, and Ξ, *ξ* is used for *ks* In Latin therefore, x appears in words spelled in Greek with *ξ*, Ξ *Xanthus* represents Greek Ξανθός, *Xenophon* Greek Ξενοφῶν There is no rune for the digraph ks, but x appears as the rune for *g*

Dr Taylor attempts to connect Greek Ξ with Semitic samech < chair-back S TAYLOR *The Alphabet* vol 1, ch 2, p 99 According to his view, the history of the characters is represented as follows

Y y Y y *Y y*

Roman Black Letter Script

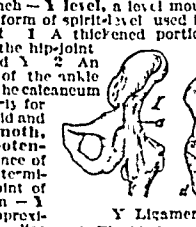
Y, **y**, 1 wai, 2 wȳ, *n* [WYES, Y's, or *Ys*, 1 waiz, 2 wȳz, *pl*] **1.** A letter the twenty-fifth in the English alphabet It is a sign of the palatal semivowel, heard in *yet*, and is also used, interchangeably with *i*, for the diphthong *ai*, as in *type* for *tipe* as in *physic, city*, and for the final element of a diphthong, as in *boy* In the respellings in Key 1 in this dictionary it is used only for the sound heard in *yet*

As a palatal semivowel English *y* takes the place of Latin *i* with its later variant *j* Its sound is the initial stage too brief to form a syllable, of an *i* that is very high, but not quite high enough to produce a "fricative" effect Note the difference between *y* in dissyllable *minion*, and the shortest of short *i*'s in trisyllable *radiate* See under I In this use *y* helps to form various diphthongs, *ya, ye, yo*, etc In the diphthong *oy* interchanging with non-final *oi* as in *boy, boisterous*, *y* is a short unstressed *i* In *ay* (*day*), *ey* (*they*), it is often not heard at all

The normal *y* is voiced If it is uttered without vibration of the vocal cords the result is a voiceless or "whispered" *y* heard in *few, hew* when pronounced fyū, hyū For the palatalization of a consonant before *y* (*nation* < nāsyon, *nature* < nātyur), see under C S, T On account of the frequent diphthongization of ancient ū (see under U), it has come about that many *y*s are now unwritten, cf *unite eulogy, azure*

Diphthongal y, as in *type* and its corresponding short, as in *typical*, are now simply orthographic variants of *i* They derive from Greek upsilon, *v* which was at first u, then ü In the second century A D the Romans took over the letter in the form *y*, with the sound ü, and in time passed it on to Anglo-Saxon and the Romance languages In Middle English ü was unrounded to simple i and as the letter was a favorite with the penmen on account of its final flourish, they fell into the habit of substituting it for final *i* hence, to-day *city, carry, goodly*, but *cities, carries goodliest* *Y* for *ai* or *i* is now useless in English spelling, but was used frequently in Old English as imbecyllyte, nothyng, thynketh, impyteous wynds

The occasional use of *y* for *th* in print affecting "quaintness," as ye for *the*, is due to a confusion of the letter *y* with Anglo-Saxon Þ *The* was never pronounced *ye*



According to the examination of Professor Whitney, the sound of the semivowel *y* averages 66 of one per cent on the pages of English literature W D WHITNEY *Oriental and Linguistic Studies* second series p 274 [s 1874]

Capital Y is from Anglo-Saxon Y < Latin Y < Greek Y, upsilon for whose earlier history see above Anglo-Saxon ȳ had a dot over it The rune for ȳ was a combination of the runes for u and i, the 27th in the futhorc, third of the six added by the Anglo-Saxons and named *ȳr* = dr, *bow*? *n* The Latin and French name, following the sound of the letter, is ü that is, nearly üi > English wī > (regularly) wai written wy The name of the Anglo-Saxon letter for *i* consonant whose sound *y* has now taken was *gĕr*, year, or later *gĕfu* gift

Yan'kee Doo'dle. 1. A song, including many humorous verses, popular in pre-Revolutionary times, and generally regarded as one of the national airs of the United States The origin of the words is entirely obscure The statement is made in Duyckinck's *Cyclopædia of American Literature*, and also by Mary Mapes Dodge (*Hans Brinker*, p 33 s 1891), that it was taken from an old Dutch harvest-song, the refrain of which, as quoted from the latter book, was

Yanker didee *doodle* down
Didee dudel lawnter,
Yankee river yoover, yown,
Botermelk und Tawnter.

Edward Everett Hale attributes the present version to Edward Bangs, who graduated from Harvard in 1777 The most popular theory, however, assigns the authorship to Dr Richard Shuckburgh, an English surgeon and wit, who wrote the verses in 1775 to deride the fantastically uniformed Colonial troops The tune has been ascribed to various countries and to the medieval church but probably had its origin in England It occurs in *Two to One*, an opera of Samuel Arnold's London 1784
